

Btu Sizes:

9000Btu - covers a room size up to 15sqm

12000Btu - covers a room size up to 24sqm

18000Btu - covers a room size up to 35sqm

24000Btu - covers a room size up to 48sqm

36000Btu - covers a room size up to 63sqm

48000Btu - covers a room size up to 81sqm

60000Btu - covers a room size up to 100sqm

You can base the aircon size you require by checking the room size of the room you wish to air condition.

If you're unsure how to measure sqm [square meters] simply measure the length of the room in meters and multiply it by the width of the room in meters.

Caution:

The BTU ranges above are for standard rooms with average insulation and ceiling height. Unusual factors such as high ceilings, large windows, strong sunlight, poor insulation, many occupants, or heat-generating appliances may require a higher-capacity unit. Consult us for precise sizing and recommendations.
