LIKE A BOX OF MACAROONS

Fermob envy to spread the famous French art-de-vivre has led them to new territories and can now be found across the globe, not only in the green spaces and iconic locations of cities worldwide, but also in the privacy of the home, and luxury of hotels.

Fermob is adding an innovative touch to a market that has, up until now, been noticeably lacking in colour. Fermob's robust and aesthetically high-quality articles represent the next generation following on from some illustrious ancestors, continuing in the vein of this joyful, invigorating, elegant and innovative brand.

Fermob's garden furniture creations are always focused on producing a design with soul. This creates an emotional attachment between the brand and its customers, who are not just buying chairs or tables, but are buying into an aesthetic outlook on life that is inextricably linked to French art-de-vivre.

Fermob's legendary and timeless creations can be used to match any style. Fitting a pastoral look just as well as refined, urban style, they can be used in any outdoor setting, from an old stone-built country house, to a contemporary home or the balcony of a city-centre flat.

Luxembourg The Luxembourg range, initially produced for the Jardin du Luxembourg in Paris, has become something of a legend in its own right. Its style is an emblem of French design – an expression of French culture in furniture form! Today, Luxembourg is a fabulous collection made from aluminium whose watchwords are lightness, joie de vivre and conviviality. Recently, Fermob asked Frédéric Sofia to reinterpret the legendary chairs and armchairs of the Jardin du Luxembourg, created in 1923 in the Paris parks department workshops, and which Fermob still manufactures today for the city's public gardens. The result was a whole collection of furniture with the same distinctive lines and forms, combining the lightness and resistance of aluminium with the comfort of curved seat slats.

Plein Air represents an ideal in terms of simplicity, lightness and mobility, in line with new lifestyles. Its qualities? The designer invites you to take flight on this chair, with its wings spread wide... for a moment of escape among the clouds.

Monceau Armchair

This low armchair is the perfect place to relax and will undoubtedly be the future "guest star" of your garden or patio. Its clever design includes accessories such as a footrest that also doubles as a low table. It's also practical, with a stackable design for easy storage.
