GLOSSARY

MATERIALS

STEEL	<p>All the steels (metal alloys) we use are manufactured to precise specifications.</p> <p><u>COLD-ROLLED STEEL</u> The laminated steel is passed through a set of rollers, which transform it from a block into a sheet (e.g. table top). Cold rolling is Fermob's technique of choice, since it makes the steel more resistant, gives it a precise, uniform thickness, and promotes better paint hold.</p> <p><u>ELECTRO-GALVANISED STEEL</u> This technique involves applying a layer of zinc to the surface of the steel, to delay the onset of corrosion.</p> <p><u>GALVANISED STEEL</u> A thicker layer of zinc is applied to the surface to offer even greater corrosion protection.</p>
ACRYLIC	<p>Synthetic fibre that is soft and silky to the touch, does not pill, and is ultra-light.</p> <p>Fermob mainly uses Dralon® acrylic, which is widely employed in outdoor textiles because of its numerous advantages:</p> <ul style="list-style-type: none"> - extremely resistant to tearing, snagging and wear - rotproof (i.e. prevents the formation of mould) - keeps its shape: can be folded even when wet, does not shrink or expand - does not retain heat or moisture - water-repellent - UV-resistant – the fibre is solution-dyed (not fabric-dyed) for improved colour-fastness; Dralon® fabric is extremely resistant to sunlight and intensive washing (average 6/7 on a scale of 8) - resistant to temperature variations (-30° to +70°C) - resistant to chemicals - easy to clean: machine-washable at 30°C, no ironing required.
ALUMINIUM	<p>Metal alloy that is three times lighter than steel. At Fermob, this malleable metal is used to manufacture tailor-made profiles (specially shaped tubes). Fermob mainly uses superior-grade aluminiums for their robustness and more uniform thickness.</p> <p>Aluminium furniture is recommended in humid or coastal climates, since the material does not corrode.</p>
CAST ALUMINIUM	<p>This name refers to a light alloy used to make moulded aluminium parts.</p>
DURAFLON ®	<p>Exclusive to Fermob, this polymer (a type of plastic) is used to manufacture Bistro chair slats. Very similar to metal in design, it is a light, comfortable material that is guaranteed to be sturdy and UV-resistant and does not retain heat.</p>
STAINLESS STEEL	<p>Stainless steel is an alloy of steel and chromium that is highly resistant to corrosion and rust. Fermob uses stainless steel to make the screws for its products.</p>
SOLUTION-DYED (textile)	<p>Fermob uses solution-dyed textiles (the dye is applied to the fibre, not the surface). This dyeing technique means that the colour lasts five times longer than a conventional dye.</p>
CAST IRON	<p>Cast iron is a carbon-rich iron alloy. Its density, weight and sturdiness mean that it is ideally suited for stability purposes. Fermob mainly uses cast iron for pedestal table (Concorde) and parasol (Zébulon) bases.</p>
HPL (TRESPA)	<p>High pressure laminate (HPL) is a composite material comprising several layers of Kraft paper and a decorative design, coated with resin. Fermob uses Trespa® HPL – a hard-wearing, scratch-resistant and UV-resistant material.</p>
FOAMS	<p><u>OPEN-CELL FOAM</u> A foam that allows liquid to pass through. It does not retain water and dries very quickly, meaning that the cushion does not stay wet.</p> <p><u>HIGH-RESILIENCE PU FOAM</u> A polyurethane foam selected by Fermob for its ability to return to its original shape after deformation, even following an extended period of use.</p>

GLOSSARY

(Continued)

MATERIALS (continued)

FERMOB PAINTS	<p>Fermob uses polyester powder coatings, which offer several benefits:</p> <ul style="list-style-type: none"> - polyester (polymer) is highly resistant to UV and weather conditions - powder coatings are highly resistant to impacts. These eco-friendly coatings contain no solvents or lead and are fully aligned with Fermob's environmental policy. <p>Fermob offers three furniture paint finishes:</p> <ul style="list-style-type: none"> - Smooth: a uniform, regular surface, with no bumps, showing off the paint colour in its best light. - Textured: a slightly textured surface with a more matt finish and enhanced scratch resistance. This finish is generally preferred for large tables. - Speckled textured: contains aluminium or pearl particles that bring out the bright side of the paint colour.
SKAI® OUTDOOR IMITATION LEATHER	<p>Fabric coated with a synthetic material that imitates the natural grain of leather, with its texture, colour tones and softness.</p> <p>For the Lorette padded chair, Fermob has selected Skai® Neptun Caleri fine-grain imitation leather (88% PVC, 10% polyester and 2% nano-component).</p> <p>This innovative, cutting-edge material is designed chiefly for demanding outdoor environments and for commercial, professional and public premises (such as boats and yachts). Waterproof, tearproof and resistant to mould, chlorine and UV, it is made to last.</p>
TEAK (grade C)	<p>Teak is a tropical tree that belongs to the Verbenaceae family. It produces oleoresin, making it naturally resistant to inclement weather.</p> <p>The wood is highly prized in the shipbuilding and garden furniture sectors. Fermob sources its teak from government-controlled plantations in Indonesia (with certified reforestation programmes). Grade C teak comes from the outer layers of the tree.</p>
TEXTROL	<p>Natural plant oil-based wood saturator that helps wood retain its natural appearance for a long time. Does not form a film or chip off, does not peel away over time, does not darken under the effect of UV rays. Fermob uses this product on its Bistro Natural chairs.</p>
JACQUARD FABRIC	<p>On a Jacquard fabric, the patterns are made by criss-crossing threads. The Jacquard loom, developed in 1801 by Joseph Marie Jacquard from Lyon, is capable of creating weaves with complex patterns.</p>
Outdoor Technical Fabric (OTF)	<p>Outdoor Technical Fabric (OTF) is a Batyline fabric (manufactured in France by the world's leading firm, Serge Ferrari). This polyester and solution-dyed PVC technical fabric offers exceptional colour-fastness.</p> <p>OTF keeps its shape, is light, flexible and sturdy, and does not deteriorate over time. It is resistant to both moisture and micro-organisms, and is treated with an anti-fungal product. OTF is easy to clean with soap and water.</p>

PROCESSES

LASER CUTTING	<p>This involves using a laser beam to cut a piece of metal. At Fermob, the technique is used to cut a detailed, precise pattern into sheet metal.</p>
HYDROFORMING	<p>A manufacturing process in which a material is shaped by injecting a high-pressure fluid and working with the material. This process is mainly used in high-tech industries such as aerospace.</p>
THERMO-COMPRESSED	<p>A seamless cushion finish. This technique means the cushion can be perfectly adapted to the shape of the chair. Because there are no seams, the fabric is even more resistant to outdoor conditions (Skin, Kate and Bistro chair cushions).</p>

GLOSSARY

(Continued)

TREATMENTS/ CONCEPTS

ABRASION	Wear caused by rubbing.
ANTI-UV	Anti-UV treated products are resistant to alteration cause by ultraviolet rays (present in sunlight and moonlight), meaning colours do not fade over time. All Fermob products are UV-resistant.
ELECTROLYTIC COATING	A surface treatment originally used in the automotive industry. An electrophoresis paint (sub-layer) technique where a part is immersed in a bath of water-soluble paint. Electrolytic coating means that the product benefits from Very High Protection treatment and is suited to intensive use or use in extremely wet/humid environments.
WATER-REPELLENT	A water-repellent fabric does not instantly absorb water droplets. Instead, water slides off the surface. This property is either natural or the result of treatment. However, if the water is not removed quickly, it will end up being absorbed into the fibre (water-repellent is not the same as waterproof).
ELECTROSTATIC COATING	An eco-friendly painting technique that involves using powder instead of solvent-based paints. An electrostatic force attracts the powder coating to the metal, achieving optimal coverage. The coating is then baked onto the furniture.
COATING	A treatment process in which a coating is applied to the surface of a textile to make it waterproof.
STOVING	A process by which a product is left in a heated chamber until all water is removed (before painting). This is a critical stage of the process, ensuring that the paint attaches firmly to the raw material.
WATER-RESISTANT	Offers long-lasting protection against moisture.
ROTPROOF	Guarantees against the formation of mould over time. This is an important guarantee for outdoor products.
SILENCING PADS	An exclusive, patented technology that allows furniture to slide effortlessly across the floor and features an integrated shock absorber to reduce vibrations. Comes as standard on Luxembourg, Croisette, Pétale, Stripe and the Luxembourg Kid table, and as an optional extra on Facto and on Monceau (spare parts) NOISE REDUCTION OF 14 DB = 10 TIMES QUIETER!
HIGH PROTECTION TREATMENT VERY HIGH PROTECTION TREATMENT	Fermob furniture benefits from anti-corrosion treatment, ensuring it can withstand the elements all year round. The basic treatment, applied on the painting line, delivers around 800 hours of resistance under the salt spray test. Additional electrolytic coating treatment can be applied to some products (as standard or on request), offering improved outdoor resistance of around 1,200 hours. A product's corrosion resistance (and therefore its classification – "High Protection" or "Very High Protection") is determined by the combination of design, material and surface treatment.

STANDARDS

NF EN 1022	Seat stability standard.
NF EN 50102	Standard on the degrees of protection provided by enclosures for electrical equipment against external mechanical impacts.
NF EN 581-1 NF EN 581-2 NF EN 581-3	European standards setting out general safety, resistance and durability requirements for outdoor seats and tables.
NF EN 60529	Standard on the degrees of protection provided by enclosures for electrical equipment with a rated voltage not exceeding 72.5 kV (IP, IK rating)
IK 11	The IK rating indicates protection against mechanical impact.
IP 45	The IP rating indicates the degree of protection provided against the intrusion of solid objects (first digit) and liquids (second digit).

THE FERMOB GUARANTEE CHARTER

THE EUROPEAN FURNITURE GUARANTEE

When we design our products, we pay special attention to three key aspects:

- making sure the piece will continue to fulfil its intended purpose for many years to come
- anticipating how it will age as time passes
- designing it so it is suited to our customers' requirements.

As a manufacturer, we have a duty to guarantee that our products are fit for purpose, no matter how our customers use them.

We never stop listening to our customers. That is why we have amended our European Furniture guarantee to reflect painstaking laboratory testing and customer feedback.

Because we use only the highest-quality materials and finishes, we are now in a position to go one step further and offer two separate guarantees – a 5-year **functional guarantee** on all our items of furniture, plus a 2-year **ageing guarantee**, provided that the product is used as per our recommendations.

FUNCTIONAL
GUARANTEE
5-YEAR

AGEING
GUARANTEE
2-YEAR

Each of our products comes with a recommended usage setting, so you can better cater to your own customers' requirements and keep the guarantee valid:

1. **Domestic:** product designed for private use in non-public spaces such as gardens, winter gardens, patios, terraces and balconies.
2. **Professional:** product designed for professional use in supervised public spaces such as restaurants, outdoor pools, beaches and recreational facilities.
3. **Intensive professional:** mobile product, not fixed to the ground, designed for professional use in unsupervised public spaces such as motorway service stations, public parks and squares that are accessible around the clock.

• 5-YEAR FUNCTIONAL GUARANTEE

Fermob guarantees that products will remain fit for the purpose for which they were designed for 5 years. The guarantee covers all functional aspects of the product such as welding, fasteners, rivets and folding.

If a product is not used as per Fermob's recommendations, the functional guarantee is reduced to 2 years.

• 2-YEAR AGEING GUARANTEE

The speed at which a product ages depends on how carefully it is treated by customers. Please read the exclusions so you can advise customers how to care for and maintain their products.

The ageing guarantee covers premature and abnormal deterioration in the appearance of the product's materials.

Fermob's 2-year ageing guarantee applies in Europe (excluding Russia) only. Elsewhere, the guarantee is 2 years for aluminium furniture and 1 year for steel furniture.

THE AGEING AND FUNCTIONAL GUARANTEES DO NOT COVER:

- Damaged, converted or modified furniture.
- Furniture not used as per Fermob's recommendations.
- Any damage arising from insufficient care, or from failure to comply with the supplied instructions and advice for receiving, assembling, using, maintaining and storing furniture supplied to the customer.
- Rings or stains undeclared when unpacking (including stains related to a combination of humidity retention + heat).
- General wear and tear or natural fading of the materials used.
- Corrosion originating from scratches or abrasions that result from general wear and tear and which cannot be removed via standard cleaning and maintenance processes.
- Minor spots of rust under table tops and seats or on bases. These are a natural outcome of the material used (iron) and can be treated using the maintenance tools made available to customers by Fermob.
- Corrosion of stainless steel parts due to use in a confined, chlorinated environment.
- Corrosion of steel furniture (including stainless steel furniture) as a result of use in a coastal environment.
- Any changes in the visual appearance of wood that are directly linked to ageing. As wood is a living material, the appearance of its surface changes naturally over time.

This guarantee is limited to reimbursement (with application of a reduction) or replacement of the product, and applies only upon presentation of the purchase receipt (cash register slip or purchase invoice).

THE EUROPEAN LIGHTING GUARANTEE

All lamps are covered by the relevant European statutory guarantees. Fermob lamps are certified to European standards NF EN 60529 and NF EN 50102 (protection ratings IP 44 and IK 10).

USAGE	DOMESTIC	PROFESSIONAL	INTENSIVE
GUARANTEE	2 YEARS	1 YEAR	-

THE GUARANTEE SPECIFICALLY EXCLUDES :

- Lamps that have been altered, changed or modified.
- Damage related to a lack of proper care or failure to observe the precautions (e.g. do not open the lamp) and advice for use, maintenance and storage provided to the customer.
- Rings or stains not declared when unpacking.
- General wear and tear or natural fading of the materials used.
- Corrosion originating from scratches or abrasion resulting from general wear and tear and which cannot be removed via standard cleaning and maintenance processes.

This guarantee is limited to reimbursement (with application of a reduction) or replacement of the product, and applies only upon presentation of the purchase receipt (cash register slip or purchase invoice).

For intensive product usage, please contact our sales department for advice.

The local statutory guarantee applies outside the European Union.

THE EUROPEAN ACCESSORIES GUARANTEE

Like its furniture, Fermob accessories (cushions, etc.) are designed to last, based on a careful selection of materials. They are covered by the statutory European guarantee.

USAGE	DOMESTIC	PROFESSIONAL	INTENSIVE
GUARANTEE	2 YEARS	1 YEAR	-

- Acrylic textiles and PVC are guaranteed against UV, wear and tear, mould and tearing.
- Reticulated foam filling is guaranteed against mould.
- Metal accessories are covered by the same guarantee terms and exclusions as items of Fermob furniture.
- Deterioration caused by failure to observe storage and maintenance instructions is not covered by the guarantee.

This guarantee is limited to reimbursement (with application of a reduction) or replacement of the product, and applies only upon presentation of the purchase receipt (cash register slip or purchase invoice).

For intensive product usage, please contact our sales department for advice.

The local statutory guarantee applies outside the European Union.

FERMOB: NO.1 FOR COLOURFUL, METAL OUTDOOR FURNITURE

For more than 25 years, Fermob has been designing and manufacturing metal outdoor furniture that is accessible and full of joie de vivre - perfect for anyone wishing to create a stylish, relaxing and friendly garden. Fermob furniture stands out from the crowd thanks to its original, patented designs and extensive range of colours. Fermob works with renowned designers who create original and exclusive products for the brand, protected by copyright. The name of the designer can be found alongside each item of furniture.

Drawing on its outdoor know-how and colour expertise, Fermob has also developed the Accessories collection – outdoor lifestyle accessories that are perfect for creating truly liveable spaces. In doing so, Fermob redesigns gardens and terraces from top to bottom, with coherence and beauty being the watch-words. Fermob is much more than a manufacturer. It is your very own outdoor space designer.

FERMOB: MATERIALS AND TREATMENTS FOR OUTDOOR USE

For its furniture, Fermob chooses to use metal (steel or aluminium) – the "ideas material", as Gustave Eiffel put it – won over by its incredible versatility. The metals we use are top-grade steel and aluminium. Fermob furniture can be either exclusively metal or a combination of metal and OTF (Outdoor Technical Fabric, a type of PVC-coated polyester), woven polymer (Sixties), or outdoor fabrics developed in conjunction with top-quality, renowned suppliers such as Ferrari and Dickson.

ALUMINIUM

STEEL AND OUTDOOR
TECHNICAL FABRIC

ALUMINIUM AND
OUTDOOR TECHNICAL
FABRIC

ALUMINIUM AND
WOVEN POLYMER

Fermob furniture is subject to intensive tests according to general safety (NF EN 581-1), stability (EN 1022) and mechanical security standards for collective use (NF EN 581-2, EN 581-3). It also benefits from special anti-corrosion treatment for outdoor use. Two treatments are offered: the first is the High Protection treatment, which can be further improved with the second treatment, the Very High Protection treatment, which provides optimum protection for steel furniture that is constantly exposed to very wet, humid or salty conditions. The paint used is a 100% polyester, anti-UV powder paint, subject to standard tests for baking, hardness, resistance to scratches and corrosion. It is applied electrostatically to the furniture for optimal coverage, and then baked at very high temperature.

For its Accessories collection, Fermob has opted to work with experts, applying a similar approach to that adopted for its furniture. It reflects the fundamental values of the brand: creativity, design, technical sophistication and colours. A range of innovative, refreshing new products are developed each and every season. The Accessories collection is a guarantee of quality, with all products designed for 100% outdoor use.

Fermob's lighting range, the lamps, are High Protection treated and subject to the statutory guarantees that apply to this product type. They meet standards NF EN 60529 and NF EN 50102 giving degrees of protection IP 44 and IK 10 (guaranteed for outdoor use).

FURNITURE THAT MAKES ITS MARK ON PEOPLE'S MINDS, NOT ON NATURE

Fermob furniture is designed for natural environments and is made using materials and processes that respect the environment.

METAL: AN ENVIRONMENTALLY FRIENDLY CHOICE

Some 98% of all iron and aluminium is now recycled worldwide.

This means that Fermob can guarantee that its furniture is fully recyclable.

ECOLOGICAL PAINT THAT PROTECTS BOTH THE ENVIRONMENT AND YOUR HEALTH

The powder paints used by Fermob contain no solvents. They are 100% recycled and recyclable.

They are applied in a zero-waste facility, with multiple successive dips for guaranteed outdoor use.

RECYCLED FABRICS

To procure its Outdoor Technical Fabrics (OTFs), Fermob selects only the most rigorous suppliers in terms of sustainable development. Ferrari, a French manufacturer and the main OTF supplier, has committed itself to a unique, patented recycling process – Taxyloop® – which guarantees that 100% of the fabric constituents are recycled.

This approach means that:

- OTF offcuts are salvaged and recycled.
- Fabrics are recycled when they reach the end of their lifespan.

RECYCLED AND RECYCLABLE PACKAGING

Fermob has been participating in the Eco-Emballages ("Eco-Packaging") scheme for many years now.

CONTINUALLY IMPROVING TO REDUCE OUR ENVIRONMENTAL IMPACT

Optimising energy consumption remains one of Fermob's key concerns, as regularly demonstrated through concrete action such as regular reductions in the temperature of our paint ovens (-10°C in 25 years), using low-consumption baking (-10%) and investing in a new painting line, saving 8 tonnes of powder per year.

ECO-DESIGNED FURNITURE

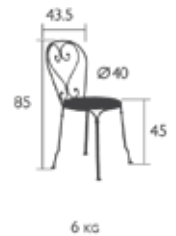

The design and aesthetic qualities of Fermob's creations, together with their lightness and resistance, are also solutions to key environmental challenges: saving materials and limiting waste as well as transport impact.

One-piece pads
Parasol hole Ø 41 mm (pole = Ø 39 mm)
Weight: 12 kg

0237 - TABLE (Ø 117 CM)

Steel frame
Electro-galvanised steel sheet table top
One-piece pads
Parasol hole Ø 41 mm (pole = Ø 39 mm)
Weight: 16.5 kg

CADIZ

8701 - CHAIR

DESIGN BY ANTOINE LESUR

Aluminium frame
 Seat and backrest in Batyline® OTF : tearproof, resistant to stains, mould and deformation
 See p. I Bis for available colours
 Weight: 2.9 kg
 Stacking capacity: x 10 (Height – stacked : 113 cm)

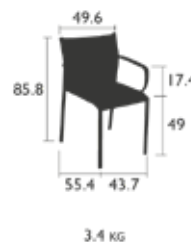

8702 - ARMCHAIR

DESIGN BY ANTOINE LESUR

Aluminium frame
 Hydroformed armrests
 Seat and backrest in Batyline® OTF : tearproof, resistant to stains, mould and deformation
 See p. I Bis for available colours
 Weight: 3.4 kg
 Stacking capacity: x 10 (Height – stacked : 113 cm)

8704 - LOW ARMCHAIR

DESIGN BY ANTOINE LESUR

Aluminium frame
 Hydroformed armrests
 Seat and backrest in Batyline® OTF : tearproof, resistant to stains, mould and deformation
 See p. I Bis for available colours
 Weight: 3.5 kg
 Stacking capacity: x 10 (Height – stacked : 108 cm)

8705 - HIGH ARMCHAIR H.65 CM

DESIGN BY ANTOINE LESUR

Aluminium frame
 Hydroformed armrests
 Seat and backrest in Batyline® OTF : tearproof, resistant to stains, mould and deformation
 See p. I Bis for available colours
 Weight: 3.3 kg
 Stacking capacity: x 8 (Height – stacked : 126 cm)

CADIZ

8703 - HIGH STOOL H.75 CM

DESIGN BY ANTOINE LESUR

Aluminium frame
Seat and backrest in Batyline® OTF : tearproof, resistant to stains, mould and deformation
See p. 1 Bis for available colours
Weight: 3 kg
Stacking capacity: x 8 (Height – stacked : 123 cm)

FURNITURE

**Fermob is celebrating
the 90th birthday of the world's
most famous mouse!**

A co-branding exercise with Disney
on a special Mickey Mouse range.

The designer collection, comprising
four products, is inspired by two iconic Fermob
pieces: the Bistro chair and the outdoor lamp.

The collaboration illustrates the values that
both brands share: accessibility, warmth,
simplicity, innovation and joie de vivre.

THE SURE-FIRE WAY TO
ACHIEVE DOUBLE
DIGIT GROWTH!

OUR TIPS FOR STAGING YOUR ACCESSORIES

Using monochrome palettes of colours in your accessory display cases is a great way to show how the ranges complement one another and to encourage customers to mix and match.

Stage your accessories in an appealing way in the top part of the display case.

To add dynamism, change the position of the cushions (front-on, in piles, side-on, etc.).

Place Color Mix and Basic seat cushions in the bottom part of the display case.

Place Color Mix cushions between two patterns to make them stand out.

Place trivets on suitable stands and position the stock below.

Remember to hang a fouta towel or kikoy on the dedicated stand.

TO STAGE LIGHTS IN AN APPEALING WAY

Use lots of different stands to add dynamism to your display and showcase the full range of colours.

Create piles of lights to catch eyes and encourage customers to buy on the spot.

NEW! THIS BRAND-NEW LIGHT DISPLAY CASE FROM FERMOB IS THE PERFECT WAY TO DISPLAY ALL YOUR LIGHTS IN ONE PLACE

For an added boost, there are also visuals showing how to use the product.

NEW

Balad H38

Balad - upright stand

Balad H25

Moon ! H40

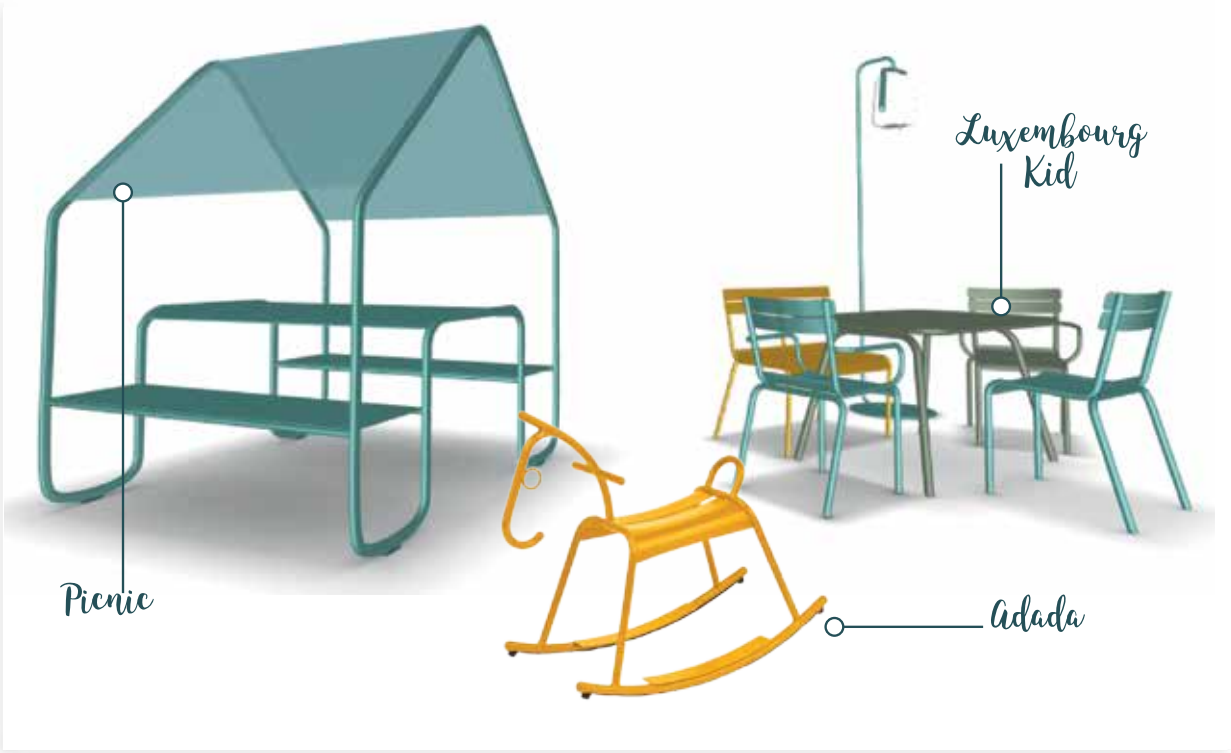

More than 30 lamps in stock ready to take away!

As well as being a place to **SHOWCASE** and **STORE** your lamps, the display case also comes with an integrated **MULTI-PORT CHARGER** (adapter required).
