

Pool Size	Sand (in tons)
15'	5 tons
18', 12x24'	6 tons
21', 15x24'	7 tons
24', 15x30'	8 tons
27', 18x33'	9 tons
30', 18x45'	10 tons
33', 20x40'	11 tons

If you want to make sure you have enough, or want to have extra for your property, you can absolutely buy more sand than stated in the chart. However, never order less than what's stated in the chart, or you run the risk of not having enough.

Sand should be "Fine-washed Masonry Sand" with no shells, rocks, sticks or abrasive materials. If you order the incorrect sand, it could void the warranty on your install, require you to sign a waiver, and/or potentially delay your pool build. Make sure you're clear to the company you order from that the sand is for a pool build and should be fine washed.
