"Highly recommend InstaHeadshots! I needed to update my LinkedIn profile photo and a friend told me about the service. My last headshot with a professional photographer cost around \$300. I far prefer my new headshot and it cost only \$49. I also have multiple headshots I can use with different looks - business casual, casual and business attire. And all I had to do was upload selfies. Love Instaheadshots!"

Are AI-Generated headshots suitable for professional use?

Absolutely! Our AI-generated headshots are designed to meet professional standards. They are high-resolution, well-lit, and look just as polished as images taken by a professional photographer. Many professionals use them for their LinkedIn profiles, resumes, company websites, and other professional platforms.

What kind of pictures should I upload?

To get the best results, upload a minimum of 10 photos of yourself or the person you're generating headshots for. Who owns the generated images? Can I use them anywhere?

You have full rights to use the images generated with your photo inputs. You may also use these for commercial purposes as you see fit, within the terms of our service. Can I use AI headshots on LinkedIn and other social media platforms?

In fact, many of our users proudly showcase them on LinkedIn. The key is to choose a headshot that accurately represents you and aligns with the professional tone of the platform.

Is this service free to use?

Unfortunately, the computation cost of the training a custom model for each profile is too high for us to offer for free. You will be required to pay for each profile picture generation. The money goes directly toward delivering a great product experience. Please reach out to us at info@foster-ai.com if you would like to discuss a custom plan for your needs.

Is it safe for my data?
