“

**Often we look around our communities and see things we want to change, improve, or do differently. By working with the United Way, you have the opportunity to BE THE CHANGE you want to see in your community. Your contribution to the United Way can support the changes that ensure our communities are strong and vital for all.**

## Education

Education is a cornerstone for success in life. It benefits the whole community: high school graduates have higher earning potential, contribute more to their local economies, are more engaged in their communities, and are more likely to raise kids who also graduate on time. The United Way invests in programs that create a positive educational culture.

## Financial Stability

When people are able to find decent jobs, provide for their families and save for the future, they and their children are more likely to enjoy healthy lives and succeed in school. Everyone benefits, because financially stable individuals and families lead to a more competitive workforce and a stronger community.

## Healthy Lives

The United Way is building healthier, more resilient communities by promoting healthy eating and physical activity, expanding access to quality health care and integrating health into every day practices.
