ROOF CLEANING

Our roof cleaning service takes one day and follows the steps below:

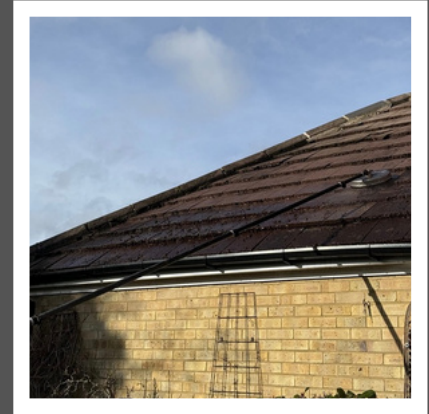

Site Set Up & Scaffold

We arrive on site and set up the scaffold tower or safe access to the roof.

Moss Removal

Heavy moss is manually scraped from tiles to prevent damage and stop debris entering gutters.

Soft Wash Roof

The roof is carefully washed to remove remaining dirt and organic growth.

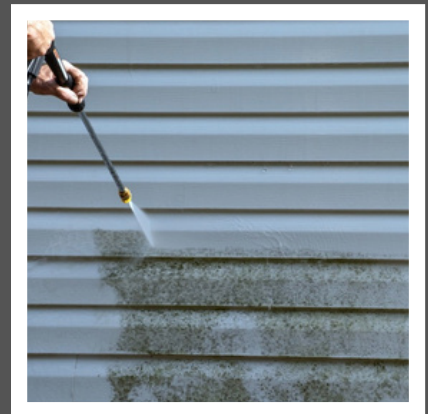

Apply Biocide Treatment

A specialist treatment is applied to slow regrowth and kill spores.

Clear Gutters

All gutters are cleared of dirt and debris collected from the cleaning process.

Final Clean Down

We rinse the surrounding areas, walls, paths and windows so the property is left clean and tidy.

PRESSURE WASHING

Powerful, professional pressure washing that restores surfaces, removes grime, and leaves your exterior clean, safe, and refreshed.

1

Once our team have arrived, we will conduct a full clean of the area, removing any algae and weeds for the exterior of your property.

2

As part of the service, we will decide if a chemical treatment needs to be used to treat tougher organic growth, the results for which you will see over the following month.

BEFORE

AFTER

GUTTER CLEANING

Professional gutter cleaning to remove leaves, moss, and debris — ensuring proper water flow and protecting your home from leaks and damage.
