

EcoBorder 36 in. Recycled Rubber Tree Ring Installation Guide

Introduction: The EcoBorder 36 in. Recycled Rubber Tree Ring is an innovative, no-dig tree ring made from recycled rubber. It is designed to help contain mulch or other ground cover around your trees, providing a clean and finished look while protecting your trees from lawnmowers and trimmers. This guide will walk you through the steps to install your EcoBorder tree ring.

Materials Needed:

- EcoBorder 36 in. Brown Recycled Rubber Tree Ring (1-Pack)
- 9 stakes (included in the package)
- Rubber or wood mulch, or other ground cover (optional)

Installation Steps:

1. **Prepare the Area:**
 - Clear the area around the tree where you want to install the tree ring. Remove any grass, weeds, or debris to create a clean surface.
2. **Assemble the Tree Ring:**
 - Lay out the three pre-shaped L-profile EcoBorder pieces around the tree. Ensure that the pieces fit together to form a complete circle with a 36-inch inner diameter.
3. **Secure the Tree Ring:**
 - The EcoBorder tree ring has specialized flaps that overlap to give it its structure. Insert the stakes through the pre-drilled holes in the EcoBorder pieces and into the ground. Use a mallet or hammer to drive the stakes into the soil, ensuring that the tree ring is firmly anchored.
4. **Add Mulch (Optional):**
 - If desired, fill the area inside the tree ring with rubber or wood mulch or other ground cover. This will help retain moisture around the tree's root system and enhance the overall appearance of your landscape.
5. **Final Adjustments:**
 - Check the alignment and stability of the tree ring. Make any necessary adjustments to ensure that the tree ring is level and securely in place.

Maintenance Tips:

- Periodically check the tree ring to ensure that it remains securely anchored.
- Replenish the mulch or ground cover as needed to maintain a neat and tidy appearance.
- Clean the EcoBorder tree ring with water and mild soap if it becomes dirty.

Conclusion: Installing the EcoBorder 36 in. Brown Recycled Rubber Tree Ring is a simple and effective way to enhance the look of your landscape while protecting your trees. With its easy installation and durable design, this tree ring is a great addition to any garden.
