AUDIT TYPE:

Announced Audit

AUDIT EXECUTIVE SUMMARY:

The field is dedicated to production under organic principles, which is irrigated by furrow using canal water, depending on the crop and stage. No treatment is carried out on the irrigation water, and it is tested during the period of use. Application of crop protection chemicals is done by an outside contractor and there are no chemical storage areas on site. The ranch was audited as part of the group of ranches owned by the company, so the report was made based on documents (records and analysis), randomly chosen and SOPs reviewed during the audit as well as practices observed in the field during the tour

Addendum(s) included in the audit:

Not Applicable

Product information for each product

Product Group/Product Name	Observed Product	Seasonality	Country of destination for product
Cantaloupe Melons	Observed on the day of audit	From: December To: June	United States
