16 week base training program

Max weekly hours - 10

weeman
coaching.com

Triathlon training is about consistency. It does not have to be complicated. That's why this easy to follow 16-week plan contains 160 simple sessions each telling you how hard to work and for how long to ensure you build a solid endurance base upon which to start specific race training.

It contains three weekly sessions for each discipline and two strength sessions. Weekly volumes start at 8.5 hours and peak at 10 hours. It is a standard three week build and one week recovery approach. The recovery week is also a testing week to monitor your progress.

You can add extra sessions if you wish or alternatively move those that are there to fit your own lifestyle. It is based on a traditional Monday to Friday 9 to 5 job with the longer sessions falling at the weekend. If this isn't you feel free to change. There is also not a specified complete weekly day off although Fridays generally only include a strength session. If you prefer to take a complete day off, then you just need to double up on one of the single workout days or drop the second strength session.

Bike and run training zones are based on your 'lactate threshold heart rate' (LTHR). If you have a power meter, then use the data from that (your functional threshold power) rather than your heart rate and choose the appropriate zone to match. For swimming, we use 'critical swim speed' (CSS).

For more information about testing and setting zones visit:

<https://weemancoaching.com/blog/f/how-to-calculate-and-set-your-training-zones>.

If you have any questions, please get in touch.

Good luck

16 week base training program

Max weekly hours - 10

KEY TO ABBREVIATIONS AND DESCRIPTIONS	
Strength 1	3 x 20 reps of each exercise starting with low weight
Strength 2	3 x 15 reps of each exercise starting with more weight
Strength 3	3 x 10 reps of each exercise ending on max weight
Swim CSS	Threshold pace based on latest CSS test
Descend	Get faster on each repetition
Run strides	30 left foot strikes with 80% acceleration good form
Bike spin ups	45 secs building cadence to >110 RPM
Bike jumps	First 10 secs @ max effort
Bike BG	Big gear cycling i.e. harder gears
Bike RPM	Revolutions per minute – 80-90 is 'standard'
Single leg drills	Best done on a turbo. Alternate 30-60 seconds with one leg only - the other on a chair. 7-10 minutes per leg total in the workout.

KEY TO ZONES	
Zone 1	Recovery <85% LTHR
Zone 2	Aerobic 85% - 90% LTHR
Zone 3	Tempo 90% - 95% LTHR
Zone 4	Threshold 95% - 100% LTHR
Zone 5	Super threshold 100% - 105% LTHR

STRENGTH EXERCISES*

1. Squat (front or back)
2. Seated low row
3. Deadlift
4. Chest press or push up
5. Lunge or step up
6. Lat pull down or chin up
7. Leg extension
8. Shoulder press
9. Leg curls
10. Leg press

*Do odds on day 1 and evens on day 2 of strength sessions.
Specific core work is in addition to the above.
Allow 50-60 mins per session including core work.
