

INSIGHT ANALYSIS:

- Determining IP-related rights for Non-Property Items included within existing contracts or encountered in the context of: implementing open-source software; managing the open-source provisions of existing contracts and other agreements; and defining protocols related to the successful management of these matters.
- Defining boundaries among Unaffiliated Entities for the purpose of managing the risk assessment and threat detection functions on behalf of an Unaffiliated Stakeholder and Independent Source.
- Defining a reasonable protocol when a determination has been made that an Employer has violated the terms of its own policies by failing to provide a safe working environment for an Employee.
