

And speaking of  
**Artificial  
Intelligence,**  
I cannot emphasize enough  
how strongly I propose that  
**“The ‘First Principles’  
of Value Creation,”**  
above, describe, absolutely,  
unequivocally, what is

**By Far The Most Comprehensive,  
Relevant, Most Self-Helpful**  
(universally profitable, rewarding,  
problem solving & preventing, peace  
& prosperity maximizing, etc.)  
**& thus**

**By Far The Absolute  
Smartest, Most  
Intelligent  
Human Process  
and thus  
Context  
that exists:**

**Helpfulness.**

So to keep AI from **becoming INFINITELY  
WORSE THAN BENZENE SPREAD THROUGH-  
OUT** ALL of the WORLD'S WATER, and  
**INSTEAD** be ever-increasingly  
infinitely universally helpful,

in the strongest, most adamant terms  
possible, I recommend that all AI  
creators use  
**helpfulness,**  
and state that  
**first, above all, “out loud”**  
and **fully transparently**  
as their all-defining, all-guiding,  
overriding, directing, orienting  
**context.**

But again, that's just my observation and  
opinion. Try, test, reject, refine, etc. all of  
this. As always, I welcome your input!

For a more detailed version of that context  
and those principles, see my Free Online  
Guide™, link below.
