

And speaking of
democracy's vital need for the
**absolute highest quality
journalism
humanly possible:**

Again, one of the
biggest obstacles
to having the most
profitable and rewarding
affordable democracies is
**media-facilitated short-
sighted selfishness**

(as yes, all selfishness is short-sighted)

as I cite in the Promo Note™, above.

And that is just media simply striving to
maximize shareholder profits,
as all good businesses are expected to do.

But **their seemingly uncaring, myopic avarice**
in **conveying "deceptive out-of-context
political messaging"** exposes their share-
holders and tens of millions of people, and
potentially billions of people worldwide
**to much larger medium-and-long-term over-
all value-destroying, economy, job, income,
and affordability-crippling falsehoods.**

Actual inflation-adjusted affordable living.

**And that has led to the widely verifiably
evidenced deaths of 100,000s people, from
cuts in medicine and nutrition in 2025 alone.**

**As well as facilitated continued wars that
have destroyed, ultimately, millions of lives**

And that ultimately **undermines, limits** and
cripples THEIR OWN long term prospects,
profitability, and peace of mind.

See my free online guide below for vast
verifiable evidence of all the above.
