Now here are some of the biggest

EXAMPLES

of the infinite rewards for everyone that come from people being

***helpful*,**

and MOST REWARDINGLY from the world's most influential fields of Media, Politics, & Religion.

And also of the economy-and-peace-and-prosperity-

POISONING OF EVERYONE

by its "opposite," i.e., people being

***selfish / hurtful*,**

MOST DESTRUCTIVELY by the world's most influential fields of Media, Politics, & Religion.

First, our definitions of these terms:

Helpfulness = Limiting bother and / or increasing enjoyment overall.

When **EVERYTHING** is considered, **MORE THAN 99%** of **all human behavior is intended to be, and *is* ultimately HELPFUL in some way. And that accounts for more than 99% of value-creation in the world.**

Selfishness = Impatient self-help that does not care if it hurts or bothers others.

Selfishness can be called the opposite of helpfulness. When **EVERYTHING** is considered, **LESS THAN 1% of all human behavior is SELFISH in some way. But that accounts for MORE THAN 99% of ALL human bother and suffering. And even "tiny" selfishness** (just as a drop of benzene can poison >2000 gallons of drinking water) **can be massively destructive.**

And while everyone agrees on >99% of what is helpful and selfish, ultimately that is subjective.

So again, the only way to sustainably resolve issues in that regard is to have the most mutually helpful conversations possible.

See "Optional Reading" below and our Free Online Guide™ about that.
