

"All the News
That's Fit to Print"

The New

That may seem like a lot to ask
of you, **media** and **leaders**, to put that first on
your screens. But I propose that when enough of
you prioritize helpfulness that way and in all you
do, to inspire enough of our world to do so too,

that will **start limiting** its opposite, relatively
tiny but highly toxic benzenelike **selfishness***,
which now **divides** and **dominates** the world.

- Again, mostly through **misleading political
messages** and **leaders**, **media**, and **tech** who
profiteer from those through **divisive algori-
thms**, as they reach ever more insidiously

into the psyche of the "goose" of hard-

working consumers who

'lay the golden eggs.'

**But history shows when an enterprise puts
helpfulness above all else, their rewards from
that can grow far more than any other way,
and "breed" INFINITELY more such "geese"!****

*1 drop of benzene can ruin 2500 gallons of drinking water.

**Again, the most vivid example of this is representative demo-
cracies which, despite their messiness, are 20%+ richer (/capita/
yr GDP) than **profiteering authoritarian states** = over 3700% richer
every 20 yrs, compounded, from then on. And that has been
vividly verifiably evidenced since in WWII, when America's
helped Europe's to prevent **global profiteering authoritarianism**, to then establish our mostly representative dem-
ocracy-led much wealthier world for **EVERYONE**, worldwide,
overall. That is because profiteering authoritarianism is self-
ish rule that says loudly "I, one person, get the very best of
wealth, power, and everything else I want, instead of all of
you people under me getting what you want. I do not really
care what you want, I am mostly just using you. And if you
bother me too much, I will hurt you. I need total control."
It is rule by terror/terrorism and it is manipulated for ulti-
mately one person's profit at everyone else's expense.
- Which ultimately limits that profiteering authoritarian's
prospects as they run out of victims and pretend-friends/
enablers/coattail hangers-on/detritus-scavengers to mani-
pulate/be manipulated by. As with that fable's murdered
"goose." And that is now greatly accelerating through AI.

Again, see my Free Online Guide™, link below,
for abundant verifiable evidence of all that.
