

➔ Digital Workflow

Maximize Productivity for Your Business by Digitizing Workflows

Improve your workflow every step of the way.

hmt-1

OVERVIEW

Digital Workflow solutions with **RealWear HMT-1™** enable workers to reference visual instructions, complete checklists, enter data, and capture images while on the go.

FLOW OPTIMIZED

Hardware like the HMT-1™ enables digital workflow to reach workers when and where they need it—improving productivity and reducing operational errors.

READY TO DEPLOY FOR:

- Test & Inspection
- Manufacturing & Assembly
- Maintenance & Repair Logistics
- Logistics

The RealWear HMT-1™ is a powerful, fully rugged Android computer that is worn on the head and replaces the touch screen with an articulated micro-display to simulate a 7-inch tablet screen.

BENEFITS

Increase

- Data quality
- Safety
- Speed to completion
- Measure compliance and efficiency
- Workflow productivity and accuracy when using hands-free navigation

Decrease

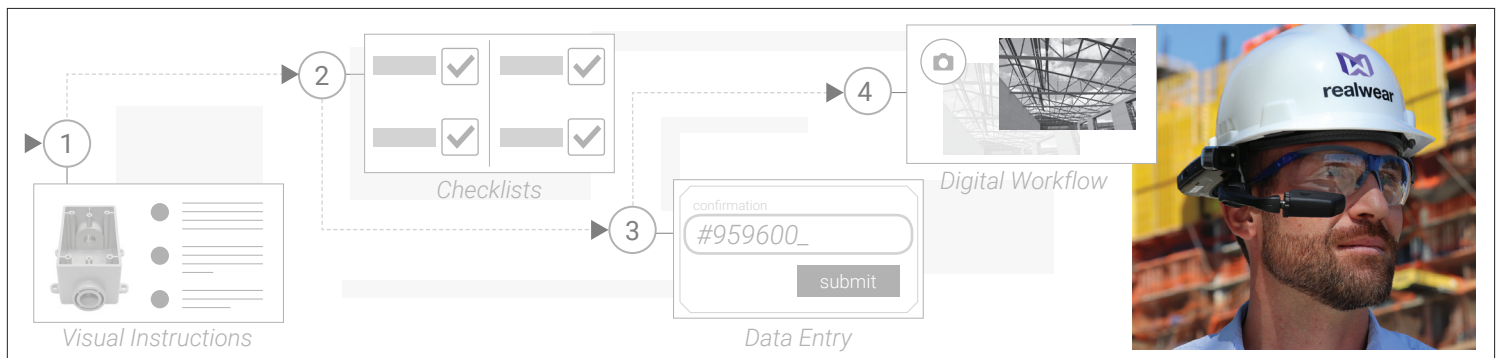

- Form completion time
- Cycle time for updates
- Errors
- Task time by 30%
- Assembly errors by 88%
- Workflow customization and update time

BEFORE

- Paper forms get wrinkled, damaged or lost.
- Tools must be offloaded and gloves taken off prior to manually writing or entering data.
- Best practices and instructions must be memorized.
- Lose your place in the workflow and risk making mistakes.

AFTER

- All work orders and forms are digitized for real-time sharing.
- Use voice-driven data entry to simultaneously log activities and do the job.
- Easily record & access photos/videos for training & reference.
- Easily access instructions to stay on track, reducing errors.

CAPABILITIES

Capabilities vary by software provider and may not be supported by all applications. Capabilities to consider when selecting applications include:

Create

- Create custom workflows using desktop or web tools
- Supplement instructions with extra materials (photos, videos, manuals, etc.)
- Add steps for capturing photos, videos and notes to document progress
- Assign workflows to specific workers
- Link work flows to geo-tagged equipment

Complete

- Transfer workflows locally onto an HMT-1, or access them online in the field
- Follow step-by-step instructions for completing tasks
- Reference photos, videos, user manuals and other materials for guidance
- Call a designated support line for help if needed
- Document step-by-step progress & completion with photos, videos and notes
- See equipment in the field with overlaid AR task notifications
- See completed and remaining work orders
- Sync with work order systems

Report

- Generate reports showing progress and completion
- Offload content automatically or manually—wired or wirelessly
- Store content for compliance records, analysis and process improvements
