Alarm Testing Procedures
(Recommended Once/Month)

1. **PUT ALARM IN TEST by calling your monitoring station. (Alarm Central phone # 1-888-463-6023) Make sure you have Account # and/or password/passcode to authorize test mode.**
2. **Make sure all zones are "closed" as if you were leaving for the day and then arm the system.**
3. **Open each zone, ie: front door, back door, walk under motions, safe/vaults doors, each panic, etc. A complete zone list can be provided to you from your monitoring station. PLEASE NOTE: The alarm will sound.**
4. **Enter code in keypad to disarm/clear/reset alarm AFTER all zones have been triggered/opened. (For DMP Alarms, hold #2 button on keypad for sensor reset)**
5. **Call your monitoring station back to remove from test mode and verify signals were received from each zone you tested.**
6. **If just completing a simple communication test, PUT ALARM IN TEST, push a holdup, and verify with monitoring station it was received when removing from test mode.**
