

Crop: Cucumber
Type: Greenhouse
Variety: 301 F1

Variety Description

Plant: Medium vigor, compact and semi multi plant well adapted for warm condition with short internodes and good tolerance to mild cold. Early Variety.

Fruits: Good fruit quality along the whole cycle.

Resistances: IR: CVV, Px.

Positioning & Features: It's suitable for Autumn.

Crop: Cucumber
Type: Greenhouse
Variety: 302 F1

Variety Description

Plant: compact and single plant with medium side shoots and small leaves.

Fruits: good quality along the whole cycle.

Resistances: IR: Px.

Positioning & Features: variety well adapted to winter cycles.

Crop: Cucumber
Type: Beit Alpha Greenhouse
Variety: 303 F1

Variety Description

Plant: multi variety, vigorous plant with concentrated yield.

Fruits: good quality fruit

Resistances: IR: CVV, CMV, ZYMV, PRSV, Px

Positioning & Features: variety adapted for short cycles. Very good setting under heat conditions. Very flexible variety.

Crop: Cucumber
Type: Greenhouse
Variety: 304 F1

Variety Description

Plant: multi and well balanced, vigorous plant with very good setting.

Fruits: cylindrical nice ribbed fruit. 16 - 18 cm fruit length with medium green color.

Resistances: IR: CVV, CMV, ZYMV, PRSV, Px. HR: Ccu.

Positioning & Features: adapted for all cycles; spring, summer and autumn.

Crop: Cucumber
Type: Greenhouse
Variety: 305 F1

Variety Description

Plant: strong plant, semi multi, short internodes, vigorous plant, small leaves.

Fruits: green color, productive from lateral shoots, 18-20 cm.

Positioning & Features: late Autumn, winter and Early Spring seasons in greenhouse.

Crop: Cucumber
Type: Greenhouse
Variety: 306 F1

Variety Description

Plant: strong plant, multi fruit, productive also from lateral shoots, big size leaves, short internodes.

Fruits: green color, slightly veined, 17-19 cm.

Resistances: IR: CVV, CYSDV.

Positioning & Features: spring season in greenhouse.

Crop: Cucumber
Type: Greenhouse Blue leaf
Variety: 307 F1

Variety Description

Plant: strong plant, multi setting, dark green leaves, early.

Fruits: dark green fruit, slightly veined, 16-18 cm.

Positioning & Features: autumn, Spring and Summer seasons in greenhouse.

Crop: Cucumber
Type: Greenhouse
Variety: 308 F1

Variety Description

Plant: cornichon cucumber, single fruit, strong plant, productive lateral shoots, dark green leaves.

Fruits: dark green color, 13-15 cm, firm.

Positioning & Features: early spring and late autumn seasons in greenhouse.

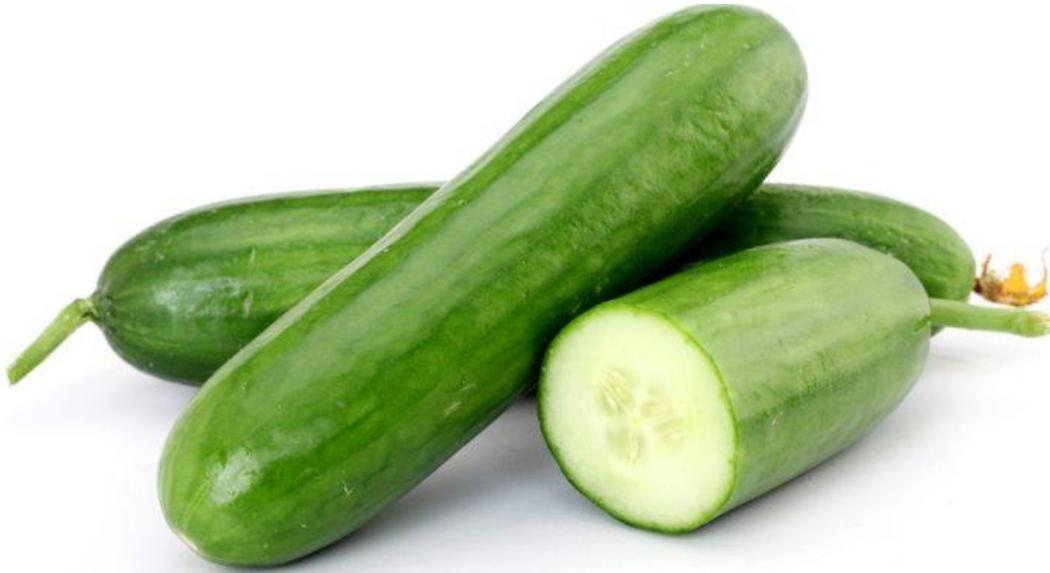

Crop: Cucumber
Type: Greenhouse
Variety: 309 F1

Variety Description

Plant: strong multi fruit setting, mini cucumber small size leaves, short internodes, mid-early.

Fruits: green color, 11-12cm.

Positioning & Features: autumn and spring seasons in greenhouse.

Crop: Cucumber
Type: Greenhouse
Variety: 310 F1

Variety Description

Plant: strong plant, multi fruit, early, productive, tolerant to hot weather

Fruits: dark color, high quality, 17-19 cm.

Positioning & Features: spring, autumn and summer seasons in greenhouse.

Crop: Greenhouse Cucumber F1
Type: Parthenocarpic Slicer
Variety: 311 F1

Variety Description

Plant: medium strong open plant with self-pruning side shoots and short internodes. Early variety with good field adaptation.

Fruits: medium long fruit 22-26 cm. Medium dark green colour with evenly distributed white spines.

Resistances: HR: Ccu IR: CMV, CVV, Px

Positioning & Features: for spring and early summer segment. Attractive fruit with high fruit uniformity, good shelf life and high productivity.

Crop: Cucumber
Type: Greenhouse
Variety: 312 F1

Variety Description

Plant: semi multi, early, small leaves, short internodes.

Fruits: green color, very high quality, slightly veined, 16-18 cm.

Positioning & Features: autumn and spring seasons in greenhouse.
