

# Global Health Connections

Annual Report 2022

A photograph of four individuals standing in a row in a parking lot, wearing full-body white protective suits and hoods. The suits appear to be hazmat or biohazard suits. The person on the far right is holding a red bag. In the background, there are several cars parked and a multi-story building with many windows. The text "Together We Can..." is overlaid in the center of the image.

Together We Can...

A group of people, including a woman in a white shirt and a man in a blue shirt, are standing in a field. In the background, there is a small hut and some trees. The scene is set in a rural area, likely in Western Kenya.

# Welcome to Global Health Connections

We are an organization unlike no other—one that is in the pursuit of promoting health education, and social and economic empowerment in Western, Kenya.

We are focused on an entirely new way of providing assistance—we don't give or do, rather we teach and empower communities to solve both current and future problems.

We respect people and believe in their capacity to build up themselves and their villages.

Join us on our journey...

A group of women are standing in a field with several tall, thin trees. The woman on the left is wearing a green jacket and a dark skirt, with her hands raised. The woman next to her is wearing a yellow dress with a sun pattern. The woman in the center is wearing a grey apron over a patterned dress and is holding a long wooden staff. Other women are visible in the background. The sky is blue with white clouds. The right side of the image is darkened to provide a background for the text.

# Our Mission

To connect, engage, and empower individuals to improve the health and economic sustainability of their community.

# Our 15 Villages...

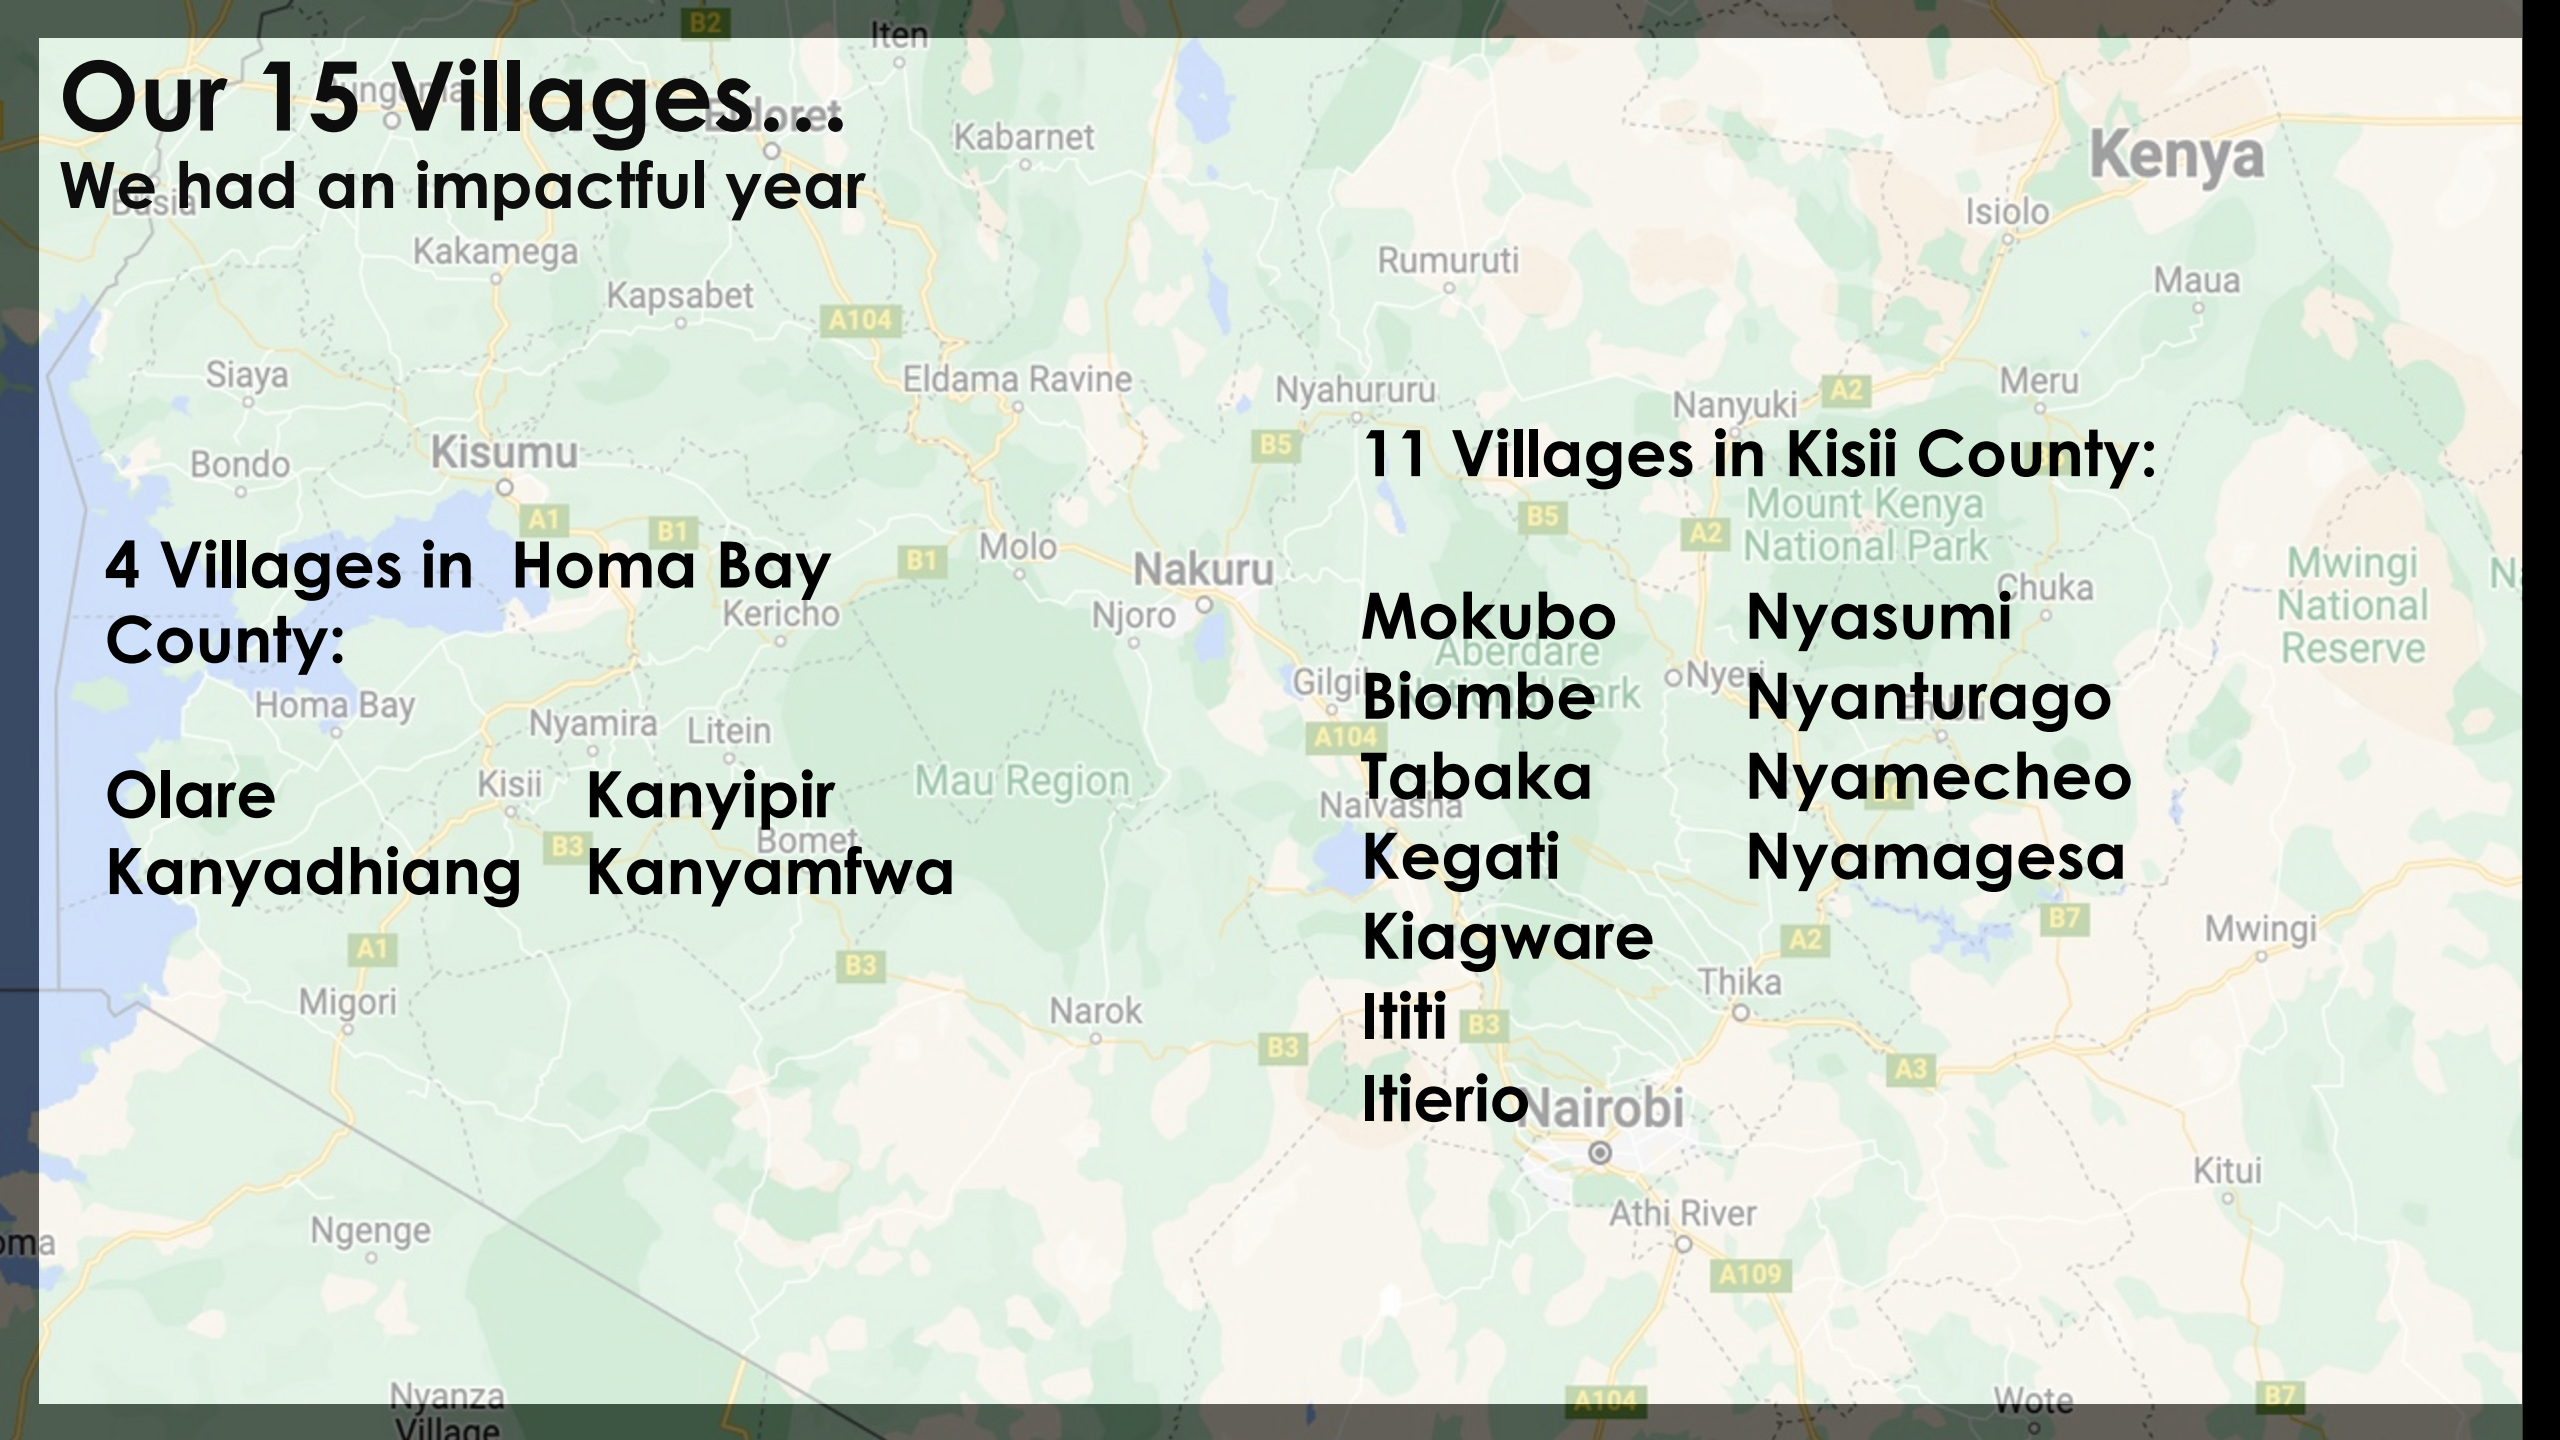

We had an impactful year

## 4 Villages in Homa Bay County:

Olare  
Kanyadhiang  
Kanyipir  
Kanyamfwa

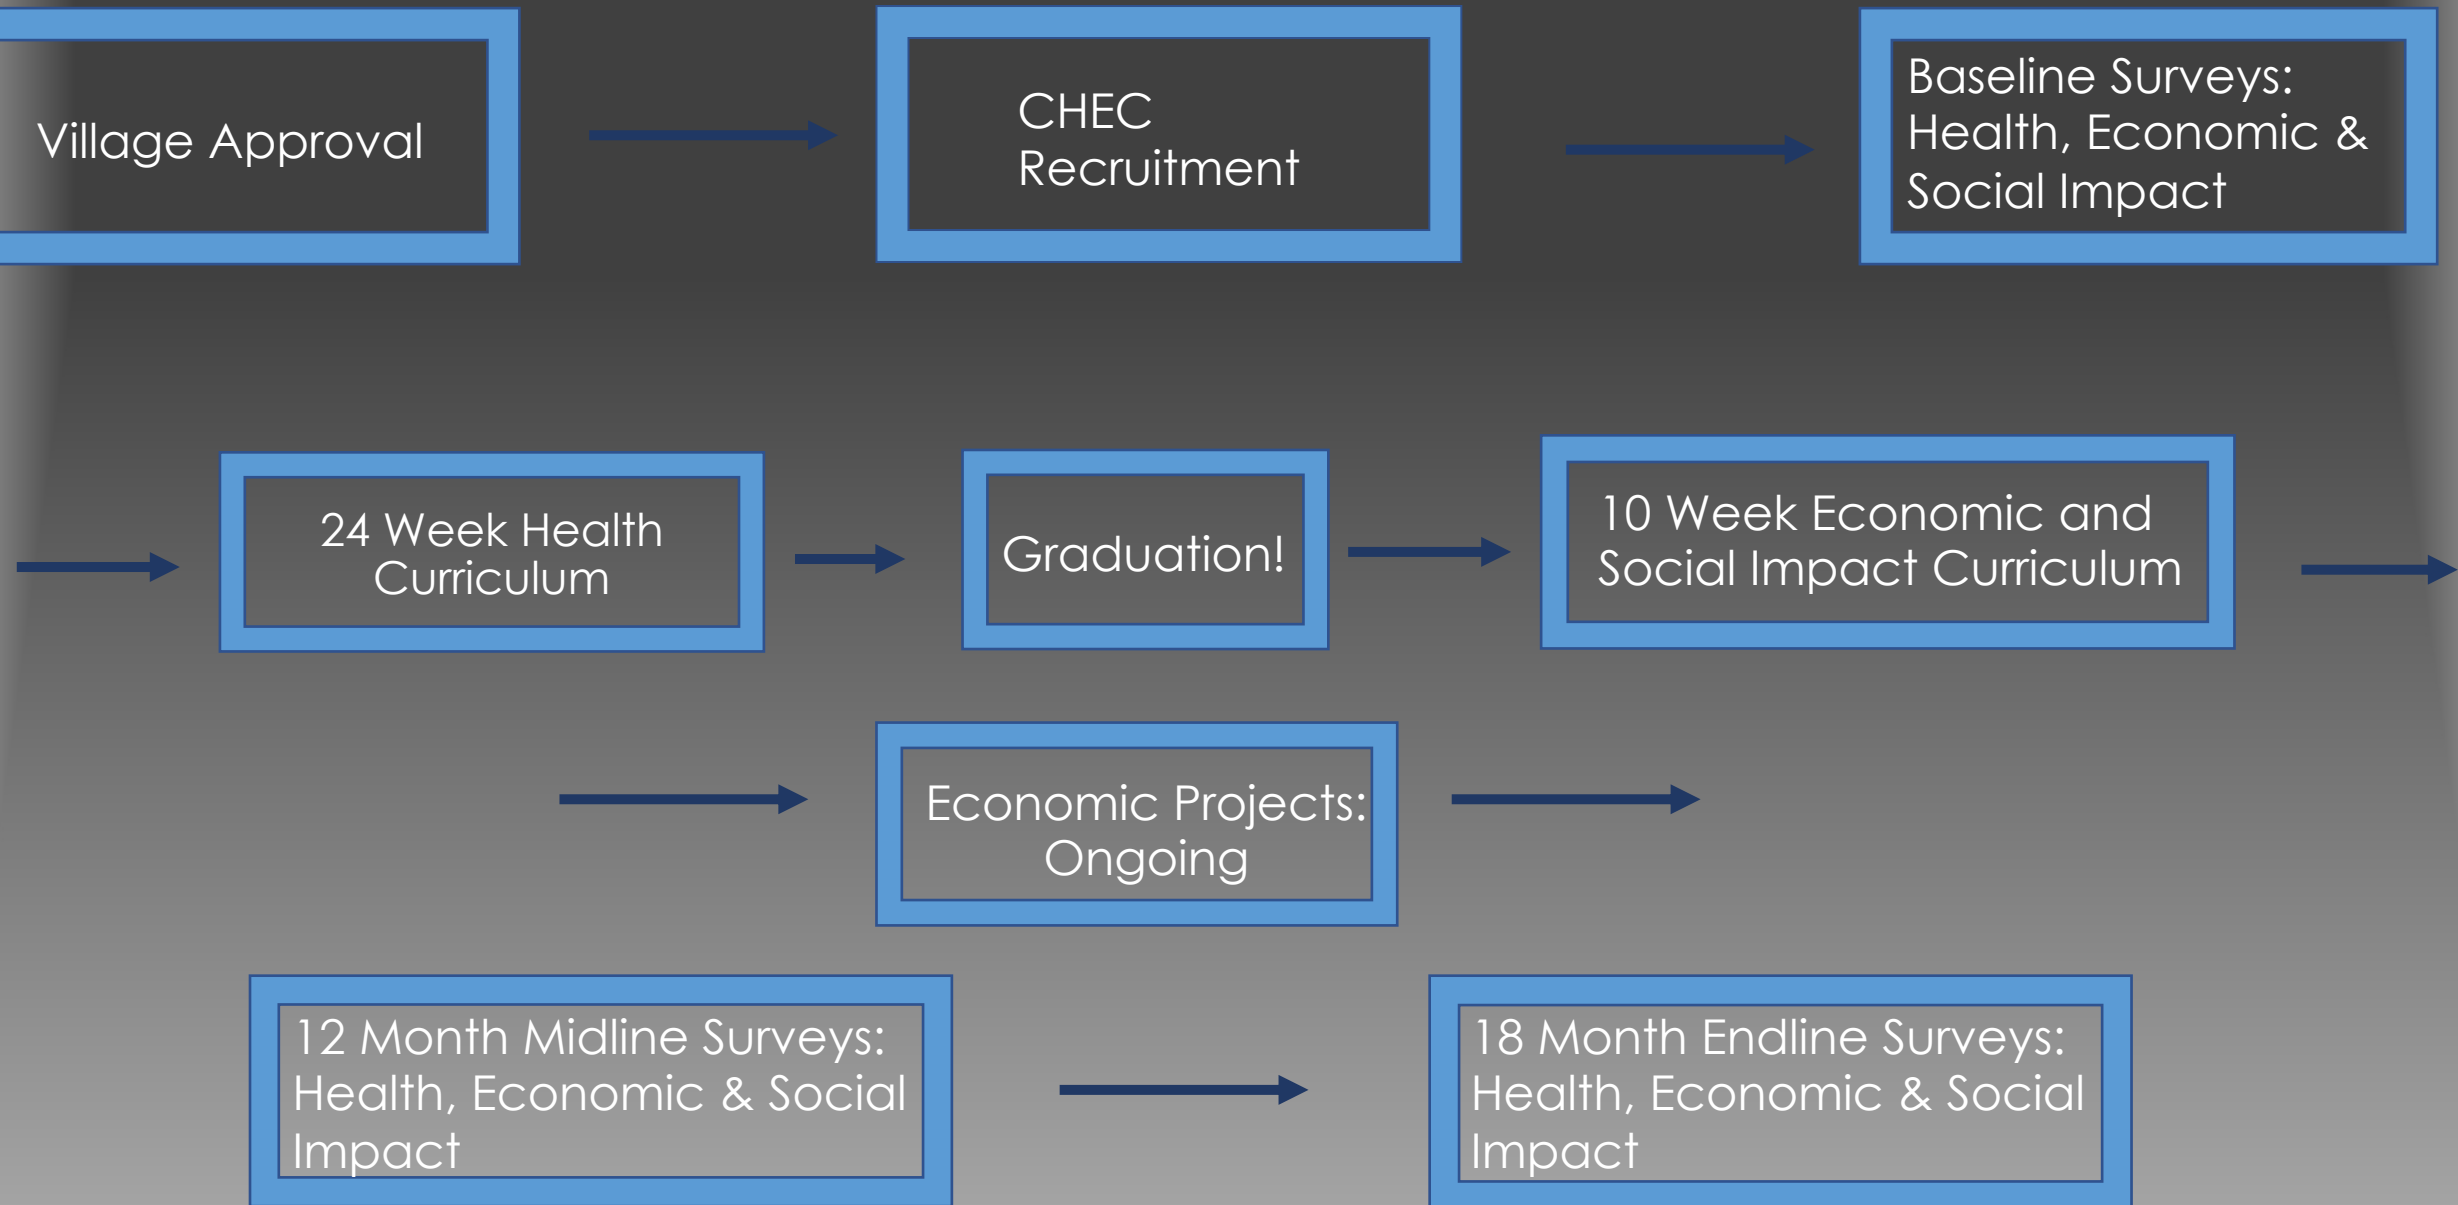

## 11 Villages in Kisii County:

Mokubo  
Biombe  
Tabaka  
Kegati  
Kiagware  
Ititi  
Itierio  
Nyasumi  
Nyanturago  
Nyamecheo  
Nyamagesa

# Our Programmatic Strategy

## 24 Week Health Curriculum

Our 24 Week Program includes topics such as WASH, Nutrition, Disease Prevention and more.

We train CHEC members on the importance of sanitation and hygiene, nutrition, and disease prevention. We gauge behavior change by comparing and analyzing data from our Baseline, Midline and Endline survey tools.

We also spend time on building model kitchen gardens, latrines and tippy tap handwash stations.

# Program Details

## 10 Week Economic and Curriculum

Our 10 Week Program includes topics such as Entrepreneurship, Financial Literacy and Business Financing.

Every village has unique needs and resources. Our team takes into account existing conditions, terrain, and population as we determine which economic programs will best serve each individual community. This means a variety of different projects—beekeeping, soap making, millet and napier grass farming—may be implemented.

# THE GHC DIFFERENCE & COMPETITIVE ADVANTAGE...

Local, On the Ground Expertise

Analytics to Measure Impact

Household Follow-up for Accountability

Health Training, Along with Economic Training and Income Generation

Traditional and Non-traditional Revenue Generation

Focus on Empowerment and Increasing Social Capital

Sustainable Governance

A photograph of a group of people in a village setting. In the foreground, a man with a joyful expression is smiling broadly and raising both hands in a celebratory gesture. He is wearing a light grey zip-up hoodie that has a small circular patch on the left chest. Behind him, several other people are visible, some also smiling. A woman to the left is wearing a patterned yellow and black top and a grey skirt. To the right, a man in a red and white striped shirt is also smiling. The background shows a building with a corrugated metal roof and lush green trees. A semi-transparent dark grey overlay covers the entire image, and white text is centered over it.

# Village Highlight:

Itierio

## Itierio Village

Itierio is our second Adopt-a-Village village in Kisii Country. GHC completed the health training in June 2022 and 26 members, all women, graduated. The first session of the economic curriculum began in mid-August and the 26 women decided to focus on planting a large tree nursery as the main economic project.

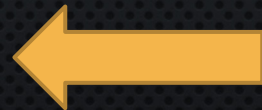

Our challenges in Itierio were many. GHC found many compounds in an unkempt state, with dirty and unmaintained pit latrines and no hand washing stations. Some households had kitchen gardens, but they were not well cultivated and cared for. Furthermore, most households were not treating their drinking water and had no place to store it.

Some residents were also uncooperative and GHC found the village inaccessible whenever it rained due to poor roads and minimal infrastructure.

But we took on the challenges and are seeing amazing progress being made. The CHEC members are eager to improve their lot and live more sustainably. They are truly an inspiration.

Hygiene

## Tree Nursery: Economic Empowerment Project

The Itierio CHEC, consisting of 26 women, was empowered with a tree planting project. The group of women set to work and planted 5 types of trees on a large plot of land donated by one of the members. The members worked hard to transplant thousands of Eucalyptus, Grevillea, Whistle Pine, Kayaba and Cyprus seedlings into polyethylene tubes. When the seedlings grow into small trees the women will then sell them in the local markets and in Nairobi as well.

## CHEC Members Prepping the Site of the Tree Nursery

A photograph of a beehive yard in a forest. Numerous yellow beehives are arranged on wooden stands, some with corrugated metal roofs. The scene is filled with trees and dappled sunlight. The text "Village Opportunity: Beekeeping" is overlaid in the center.

# Village Opportunity: Beekeeping

# Beekeeping

- GHC has helped 6 villages set up apiaries and sent 7 appointed apiary managers, along with 2 GHC employees, to the National Institutes of Beekeeping for a week-long training session.
- We have over 200 hives spread across the 6 villages
- We had multiple harvests in our first three villages in 2022—Mokubo, Biombe and Tabaka—and sold all the honeycombs.
- GHC plans to set up two central processing operations in 2023—both in Kisii—to process the honey and wax ourselves.
- The honey and wax produced from the bees will provide a sustainable source of income for the villages.

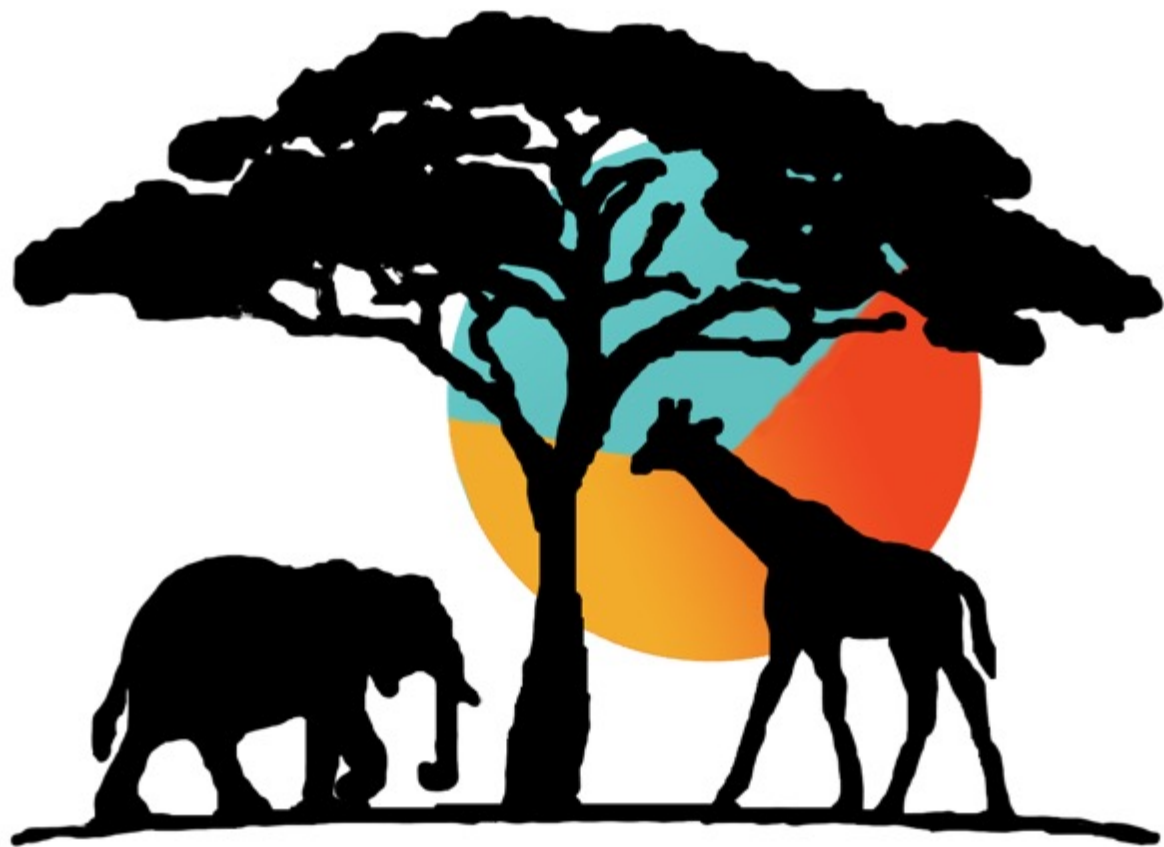

A giraffe with brown and white patterned fur is the central focus, partially obscured by green bushes. The background shows a vast savanna with scattered acacia trees and distant, hazy mountains under a clear sky.

# GHC Opportunity:

## Entourage Tours

# Entourage Tours

*Entourage Tours*  
[www.entouragetours.org](http://www.entouragetours.org)

GHC is excited to announce its brand-new partnership with Entourage Tours. We have come together to form a unique partnership in the world of travel safari.

Entourage Safaris is guided by a set of core values — quality, dedication, trust and a commitment to the environment-- that GHC shares.

Entourage offers customized day and multi-day trips throughout Kenya, that include safaris, treks, mountain climbing, and visits to villages.

# Accomplishments

GHC's mission is focused on empowering individuals from a health, economic and social perspective.

Our goal from day one was to build sustainable villages—healthy, economically viable and empowered villages that have learned how to flourish and govern as the years go by.

We've accomplished many great things thus far and we have big plans for the years ahead!

A group of five people, three men and two women, are sitting outdoors in front of a corrugated metal wall. They are all smiling and looking towards the camera. The man on the far left is wearing a grey t-shirt and a baseball cap. The woman next to him is wearing a blue and white patterned shirt. The man in the center is wearing a red and white checkered shirt. The woman next to him is wearing a white t-shirt with a logo. The woman on the far right is wearing a light blue shirt and a patterned skirt. In the foreground, there are several plastic jugs and a smartphone on a wooden surface.

- 6 new Community Health and Empowerment Club graduation classes. Overall we now have 15 active CHECs in Kisii and Luo tribe villages

- CHEC participants have demonstrated at the household level improved health behaviors in: nutrition, hygiene, sanitation, water sourcing, malaria prevention, and compound cleaning

- GHC helped initiate over 25 income generating projects in villages, including beekeeping, detergent production, tree cultivation, and tailoring.

- GHC is starting a honey and wax processing center and sent 7 village leaders to the National Institute of Beekeeping in Nairobi for a week of training.

- CHEC participants are becoming more engaged in community activities, developing more equitable relations with domestic partners and getting involved in sustainable governance of their respective villages.

## Village Accomplishments

# Organizational Accomplishments

- Statistical Analysis of CHEC programs has provided strong evidence of a large, positive impact for improved health behaviors, financial management, and empowerment of women at the household level. This proof of our CHEC concept will lead to support from additional foundations.
- GHC has greatly enhanced its organizational capabilities in accounting/finance, information technology, human resources management, and marketing/social media.
- Both our governing Boards in Denver and Kenya have become stronger with key additional members joining in 2022.
- GHC has improved its financial sustainability through grants (Rotary, Google, Jabs Entrepreneurship), donations, and our Adopt-a-Village program. In addition, GHC is starting Entourage Tours and a honey processing business to support our CHEC program.

A photograph of three people walking across a grassy field. On the left, a woman in a vibrant, patterned dress walks towards the camera. In the center, a woman wearing a headwrap and a dark jacket walks alongside her. On the right, an older man in a dark suit and trousers walks with a cane, looking down. The background is a dense line of green trees. The word 'Financials' is overlaid in white text on the left side of the image.

# Financials

We are currently a small operation, with big dreams and plans to expand. From day one, we've relied on generous private donors and grants to fund our operating expenses. It hasn't been easy, but it's an approach we believe in deeply.

Our commitment to focusing on empowering individuals from a health, economic and social perspective inspires this support. From passionate donors, enthusiastic fundraisers, long-standing clubs, and loyal volunteers, we have found a community that believes, as we do, that teaching and empowering is the way towards a sustainable and prosperous future.

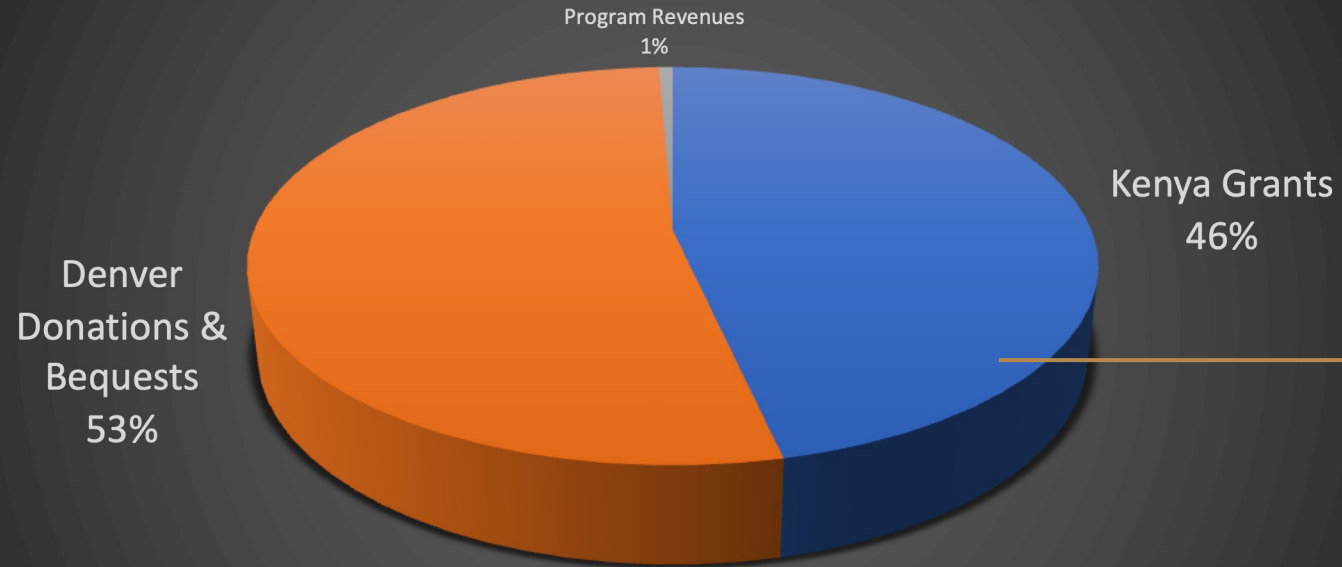

# 2022 Financial Summary

TOTAL OPERATING EXPENSES FOR 2022: \$ 91,463

- We do our best to keep our operating costs in both Denver and Kenya as low as possible. Operating costs in Kenya include the extensive surveying we do in all our villages and the data analysis that goes along with it.
- The majority of all grant and donation money received goes towards funding new villages, economic projects, ongoing village costs and direct support for these projects.
- Adopt-a-village sponsors help support the on-going operations of the respective sponsored village.

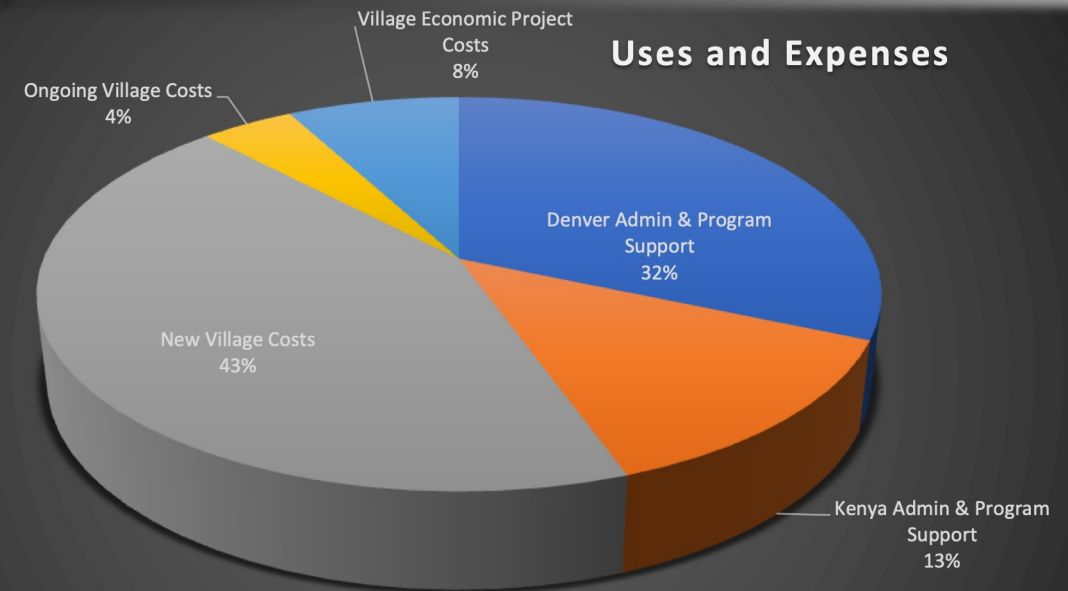

## Sources of Revenue

■ Kenya Grants ■ Denver Donations & Bequests ■ Program Revenues

## Uses and Expenses

■ Denver Admin & Program Support ■ Kenya Admin & Program Support ■ New Village Costs  
■ Ongoing Village Costs ■ Village Economic Project Costs

As 2022 comes to a close,  
we reflect on the  
unbelievable year we  
have had.

## **GHC's Future is Bright!**

In 2023, we look  
forward to...

- Focusing on further developing our 15 CHECs
- Broadening awareness of GHC's powerful and impactful CHEC Model
- Publishing results of our CHEC programs' impact at improving household health, finances and empowerment
- Advancing a sustainable governance model in CHEC villages
- Growing our Adopt-a-Village program and gaining 2-3 more sponsors
- Developing social enterprise aspects of GHC such as honey processing and Entourage Tours
- Forming partnerships with top organizations, including HEART Kenya and the Kenya Medical Research Institute (UC Anschutz Medical Campus affiliate)
