

Meet Christine Pryor of Christine Pryor Designs

Where does your story begin?

I've always been drawn to beautiful things not in a flashy way, but in a deeply curated, meaningful way. My journey began long before I called it 'design.' It started in antique stores, watching how objects held stories. It evolved through working with contractors, learning what quality actually looks like, and developing a sixth sense for finding the pieces no one else can. The golden rule in my business? Never reveal your sources. I believe every client deserves a home that feels entirely their own not something bought off a showroom floor. That's what drew me to interior design: the hunt, the artistry, and the transformation. My work blends my love of storytelling, my eye for detail, and my commitment to never duplicating a design. It's personal. It's layered. It's never generic.

We all face challenges, but looking back would you describe it as a relatively smooth road?

Smooth? Absolutely not and that's what makes it worth it. Building a business rooted in creativity means learning to navigate uncertainty with style. There were seasons where I had to rebuild from scratch new countries, new markets, new networks. Each challenge shaped the way I design. Managing contractors, timelines, and budgets taught me how to solve problems fast and keep the vision intact. Every bump in the road sharpened my instincts and ultimately gave me the edge I bring to every project today.

Alright, so let's switch gears a bit and talk business. What should we know about your work?

Christine Pryor Designs is all about thoughtful transformation creating homes that reflect who you are and how you actually live. I don't follow trends or fill rooms for the sake of filling them. Every element I bring in has a reason for being there. I manage the design process end-to-end from layout to sourcing to styling with a refined eye and relentless attention to detail. What truly sets me apart is how I source: I work privately, selectively, and globally. The result is a curated blend of old, new, and totally unexpected. My work is for people who want their homes to feel collected, not copied.

Let's talk about your city what do you love? What do you not love?

Kansas City has this understated cool factor it's warm, welcoming, and full of surprises. Whether you've lived here your whole life or just found your way here recently, there's something about this city that makes you feel like you belong. I love the architectural variety: from charming old bungalows to modern lofts and mid-century

gems, theres so much potential to explore. Whats not to love? If Im being honest, I sometimes miss the drama of more exotic landscapes coastal views, tropical color, desert stillness. But KC keeps me inspired in new ways especially when Im digging through antique barns or stumbling across a vintage treasure. This place has stories to tell you just have to know where to look.

Pricing:

Design thats high-touch, not high-stress.
