

Thank you for purchasing a Greenhouse Kit from Karmen's Garden! In order to make your pickup process go smoothly, we've compiled a short list of things to consider.

1. It is best to have a 16' Flatbed trailer to make the loading and transportation process efficient.
A full size 3/4 ton truck with a lumber rack is also adequate for greenhouses under 24'W
2. Full Payment of remaining balance is due upon arrival for pickup.
3. Arrive NO LATER THAN 3:00PM to begin the pickup process. If you arrive later, it is at our staff's discretion to re-schedule pickup. Things like payment reconciliation, cutting fabric, and loading materials, take more time than it would seem.
4. Bring a minimum of 2, preferably 3 able bodied persons(50lbs<) to help load and lift materials.
The more people you bring, the faster it goes!
5. Fabric is cut last, on site with customers help measuring.

A sales representative will contact you when your kit is ready to schedule a pickup date.

See you soon!
