

Announcement: Satellos CSO, Dr. Michael Rudnicki, elected as Fellow of the Royal Society

April 29, 2020

Satellos Bioscience is incredibly proud to announce that our Chief Scientific Officer, Dr. Michael Rudnicki has been elected as a Fellow of the Royal Society. The Royal society is the world's oldest and most esteemed scientific institution, having been founded in 1660 and comprised of the likes of Isaac Newton, Charles Darwin, and Albert Einstein.

Dr. Rudnicki has been specifically recognized for his key discoveries related to the identification and characterization of muscle stem cells, and the role they play in Duchenne Muscular Dystrophy. To have these findings serve as the catalyst for the bestowment of this incredible honor only strengthens our commitment to developing Dr. Rudnicki's ideas into an equally powerful and meaningful treatment for DMD patients.
