Smarter Home Automation

Security Comfort Saving

About us

- Based in Melbourne, we offer Smarthome consultation, installation and maintenance services. We also offer Security and Renovation packages.
- Automation packages offer products that control and monitor lights and electrical appliances, giving you a more comfortable and safer lifestyle, regardless existing or new build houses. Our smarthome solutions use stable and compatible devices with reasonable cost and easy to upgrade in the future.
- Security packages get you seem to be at home anytime, anywhere. Every risk, such as gas leakage, water spillage, a fire or an intrusion will be detected and controlled accordingly.
- Renovation packages include motorised solutions, transferring your conventional gate, garage door, roller shutters and, curtains into controllable gadgets. Upgrading your existing house would add more value to your property and bring you a new modern and comfortable lifestyle.

Home Automation System

A smarthome is a home with an advanced control and monitoring system which combines features of

- Secure
- Safe
- Control
- Stable
- Efficiency
- Convenience
- Comfort
- Customisation

Standard – Control & energy saving

Automatically, the light turns on when you walk in and switches off if you walk out of the room

Air-con turns on when you are in the room and room temperature is set. It will remain the temperature in within range you wish.

You are at home anywhere, anytime by watching your home live via smartphone or internet devices.

Lights and appliances can be controlled, manually or remotely by smartphone

Silver – Standard + Burglar alarm

- ◆ Update state of open or close of your door or windows on your smart phone
- ◆ Monitor your home sensitive areas using motion detection sensors
- ◆ Notify you if there is an unwanted visitor by calling or sending you a text

Golden – Silver + Scene control

Daily wake up, 7:30am: Light turns on automatically. Curtain slowly opens to sunlight. Water heater and coffee machine switch on by themselves. Speaker automatically plays your favorite music.

Daily leave for work, 8:00am: Lights and almost all electrical appliances are switched off except for the fridge. Burglar alarm is armed and then the garden is watered, automatically. During the day, your beloved one, who needs your assistance, can notify you by pushing an SOS button and you get a call or text.

Daily get home, 6:00pm: Entrance light is turned on before you walk in. Scene control can get you through a "movie mode" or a "sleep mode" by pressing only one button. The scenarios are endless.

Smart door lock can be accessed by fingerprint, PIN, app, card, voice or, mechanical key. Gas detector, water leak detector or, smoke sensors will activate solenoid to shut the main valves. CCTV camera saves data into cloud. Alarm system is activated if any camera cable is cut or, any door and (or) window was broken or, when smart lock was malicious, even with out internet.

Diamond Golden + Voice control

Voice control can be used to switch on or off lights and appliances. You also can open your gate or curtains by a single command, such as "hey siri, open the curtain in living room, please". Under this package, doors and windows are shut automatically in case of having thunderstorm.

CCTV surveillance – Record and Notify

- ◆ HD Analog DVR/NVR wired cameras, save data in HDD, notify you via SMS
- ◆ Wired or wireless HD IP cameras, save data in HDD or cloud, observe your home from smartphone
- ◆ Wide-angle, rotatable Smart Cameras with Night vision option. Check your house in side out via App on smartphone
- ◆ Battery power 4G IP or Integrated Solar Energy cameras

Anti-theft/Shoplifting

- ◆ Burglar alarm system varies from PTSN/GSM/3G (4G)/Wifi options
- ◆ HP IP Security cameras record moving objects, notify you of movement on your smartphone
- ◆ Night vision, wide angle and support Micro SD card camera using 2.4G Wifi or RJ45 10/100M connection

Motorise

- ◆ Sliding or swing gate
- ◆ Garage door
- ◆ Roller shutter
