

Monica's Bio

Monica was 63 years old when she passed away in 2024. She took her first picture when she was 10 years old, most likely at a hydroplane race in Seattle. She has left us several hundred thousand pictures from the half-century she crisscrossed the world with her camera.

Her passion for speed is evident throughout these images. She loved the challenge of catching that microsecond where a hydroplane would skim the water, a military jet would engage its afterburners, Lance Armstrong would ride across the finish line in the Tour de France, or an eagle would dive into a lake for prey.

She was an avid cyclist and an accomplished treasurer for several of America's largest companies. But the true treasury lies in these pictures she left us.

How to Download

We are currently working on an easy downloadable link.

In the meantime, simply right-click on the picture and save and copy it to your computer. Once on your computer, there are many software programs that can allow you to format to JPG's, DOCX, PNG etc.
