In progress

- Altmetric and Dimensions (citation monitoring in issues)
- LinkedIn 1-week feedbacks (in email and attached to Altmetrics)
- Involvement of AE-s as manuscripts increase (zoom conf. prep.)
- Mailchimp feedbacks to corresponding authors
- AE zoom meeting (timing)
- Waiting for: PMC (NIH database), Clarivate, (Scopus - 2022)
- Ongoing negotiations for co-marketing agreements:
 - BSNM
 - Jenny Stanford Publishing (Singapore)
 - Indian Society for Nanomedicine
 - SFNano

Discussion

- First performance review of the EB in May – contribution as a reviewer has been limited
 - (A: No communication, B: No contribution) – How should we approach this issue?
- Should we have an additional Board category for junior scientist members? (Name/category?)
- Any questions, comments?
- Any advice you may have for the journal?

Marisa

- Joined imperial college in Nov 2019 – 1 article in one year; from the EU Medicines Agency
- Importance of our presence in India, **Australia**
- Young sci are the future “Young Talents Board” – observing what is going on – regulatory point of view –almost impossible to get Nanomedicine /nano as a priority topic
- 1. No such culture in the regulatory structure after I left (taking up this other than Adriale) – the PRODUCTS are interesting, not the TECHNOLOGY – not a drive to anticipate... mRNA-, Novavax etc.,
- “What I should have done” – **write a few emails inviting people for PRNANO**
- Identification of Juniors: **CLINAM AWARD winners – invite them to publish in PRNANO – Marisa can work with some of them**, adding regulatory remarks
- 2nd: - She can help with contacts in Switzerland with POfCare diagnostics – can USE NM; emerging trend as a core element at low price; view of nanotech is that it is very complicated and not many journals publish; search PubMed for the is topic; e.g., **antimicrobial resistance**
- Her MEDTECH participation – an area, which is barely covered Nano-POC – what happened to nanostring in gene sequencing? Planning to present in October at DDRS2020 on complex pharmaceuticals that require nano-POC; **Lab-on-chip contacts to invite submissions**;
- **3. Writing a commentary on changing regulations** May 17th; Nanomaterials
- **Utilize/emphasize citations** – these are more important than JIF. Show that they are growing!
- Organizations to link with:
- Very Active countries (put me in touch in Ireland + Finland – European Chemical Agency was selected to host a web site for Nanotechnology Observatory (Helsinki) can have an agreement to publish their articles with no CHARGE
- Very active in nano (have a committee on nano) **EU food Safety Agency** – very-very active (one is in Parma and Helsinki/Finland)
 - She has a 2 years garden leave
- **Scott McNeil – involve him!**
- **ISO groups** publications – relevant regulations to publicize – before leaving make sure you can take ASK HEATHER – get between them and the Nano Observatory

Greg

- Sam Wickline moved out to U. of South Florida – Cardiovascular Institute...close to family
- Junior scientists (postdoc is fine, asst prof must swim with the fish), one way: meetings – send invitation **to highlight the young scientists** -
- Papers invite, (posters) highlight young people's work
- “Rising stars” - give them a title and MERIT
- Highlighting – **SPECIAL ISSUE** of “Rising Stars” “Nanomedicine in South America”, “Nanomedicine in India” – specific and reasonably good
- Invite **opinions** – **pose key questions** – requesting ops on issues- is it a hobby? Is it a growing industry? *Communication of ideas*;
- Michelle and Greg have translation experience – education is needed ; manufacturing safety- regulatory environment [LESSONS IN TRANSLATION]
- The main concept may be shareable; the real way is to do it piecemeal and then assemble
- There is a need for process chemists!!!

Moein (Molecular Therapy)

- Asking for suggestions for EB members in geographic areas

- Join a bigger society? CLINAM is small

Call for a competition for people on these geographic areas – PRIZE:
admittance to CLINAM

“Name and shame” – remind EB members to their promise in a public letter and thank for those, who has submitted

- **Affiliate with AAPS?**...JCR for **referrals**
- CLINAM meetings pre-condition, publishing **Proceedings**,
- Affiliate with Pharm Research or something to collaborate with for referrals
- Open competition to invite the best paper’s senior author get on the Editorial Board

- KSNM depends on people; Kang tried to include industry nano-bio
 - Korea manufactures Pfizer vaccine – they struggle to understand the vaccines
 - => Include one more person KW Kang, (who is from industry and **now has his own company**) – AFM person used to be in charge in nano – in Korea – the best liaison got together with industrial people to advertise nanomed
 - Approach the Chinese Society... (Chinese FDA) Chinese colleges do not get access to Google and Youtube... FORMAL CONNECTION with the current leadership; Ask Yuliang who to work with...
- CLARIVATE: Nuclear Medicine and Molecular Imaging J. was listed in emerging SCI (2015) [**CHECK SCOPUS**]
- DSL: **Baidu – ads?**
- Invitations to write manuscripts?

Discussion

- First performance review of the EB in May – contribution as a reviewer has been limited
 - (A: No communication, B: No contribution) –
 - "Reconfirm your status" letter with options
- Should we have an additional category (*Active, "Supporters," "Junior"?)
- Major hindrance is to get into publishers' organizations
- ANHI question: pricing and long-term funding opportunities?
- Any advice you may have for the journal?
- Any questions?

Liszi

- Precision Nanomed – kevés Prec és sok Nano; bővíteni a Prec felé -> personalized
- Junior nem tetszik... ☹ Ha megérdemli, akkor megérdemli hogy benne legyen
- Emailek – invitation NEM
- Archival - bioarxive - hasznosítása – pl., nyitott Peer-review (?) – kérni is!

Paolo

- Paolo: must listen to it again
 - First talk to silent members
 - Pres. Of the Italian Chapter of the CRS society; 2 journals – contact?
 - Strategic Goal?

Discussion

- First performance review of the EB in May – contribution as a reviewer has been limited
 - (A: No communication, B: No contribution) – How to approach this issue?
- Should we have an additional category for juniors and less active members? (Name?)
 - archive?
- Any questions, comments?
 - Yesterday the Eu. Innovation Council was launched with 10B Euro – how to maximize input; new innovative strategy? Who will lead?
 - Alternative to BREXIT publishers (Nature)
- Any advice you may have for the journal?
 - MDPI aggressive campaign to catch all manuscripts
 - Give you discount if you do a review; reward points for a review
 - discount to publish
 - In IJNM just a certain group of community publishes

How to cover the Costs in the future? “Pt customers!”

AI involvement? SOCIAL MARKETING SOFTWARE

Nominate at least one talented people from your group to the “Rising Talents’ Board” of PRNANO

Marina

- First performance review of the EB in May – contribution as a reviewer has been limited
 - (A: No communication, B: No contribution)
- Should we have an additional category for juniors and less active members? (Name?)
 - – through recognition! Young people are more sensitive to titles
 - Project Management Society – give out badges for a specific years;
 - More involved the stronger the journal
 - Terminology –
- Where do Russian scientists communicate with each other?
 - Does not know.
 - She publishes in MDPI...
- Any questions?
- Any advice you may have for the journal?
 - Chezy's 80th birthday is this year! – Special issue by Marina

KKYW

- First performance review of the EB in May – contribution as a reviewer has been limited
 - (A: No communication, B: No contribution)
- Should we have an additional category for juniors and less active members? (Name?)
- Any questions?
 - Twitter, FB for the journal... **WeChat ID** – send it to Ken
- Any advice you may have for the journal?

Baffy

- First performance review of the EB in May – contribution as a reviewer has been limited
 - (A: No communication, B: No contribution) –
 - "Reconfirm your status" letter with options
- Should we have an additional category (~~*Active~~, "Supporters (sounds as a fundraising), sounds financial" "Junior"?)
 - Consultant? Advisor keep them connected – brain-power ready to step in?
 - Special advisors, process; breath and scale; ["Special Talents Board"]
 - Financial advisor
- Any advice you may have for the journal?
- Any questions?
- Irt 85 cikket... - 5000 citations

Discussion

- First performance review of the EB in May – contribution as a reviewer has been limited
 - (A: No communication, B: No contribution) –
 - "Reconfirm your status" letter with options
- Should we have an additional category (*Active, "Supporters," "Junior"?)
- What is the importance of publications in the MD community? Clinicians?
- Any advice you may have for the journal?
- Any questions?

Christoph

- First performance review of the EB in May – contribution as a reviewer has been limited
 - (A: No communication, B: No contribution)
- Should we have an additional category (*Active, “Supporters,” “Junior”?)
 - “Junior” is a good idea – **Scott McNeil** – have some guidance from a senior?...a forum in 3m?) Help juniors connect with other similar position; Australia? Sidney meeting?
- Any advice you may have for the journal?
 - Precision, etc.? Special teams? Specific issues (imaging, cancer treatment, toxicology...? A part of the next issue? Invitations?
 - Platform: CLINAM abstracts? published
- Any questions?
- Too much “corona”

Bert

- First performance review of the EB in May – contribution as a reviewer has been limited
 - (A: No communication, B: No contribution)
 - [You may list your AE position on your web site] 😊
- Should we have a “Supporters” category?
- Any advice you may have for the journal?
 - Acknowledging contributors; in a short editorial (web page, listing, ty letter;
 - “Active” [“perspective”]
 - New volume introduction in an editorial; prospects, contributions; national facilities, etc. “zoom-disciplinary” e.g., Physics Today, - highlight activities; that count as citations; Nano Today, Physics Today, etc. references
 - European Cells and Materials - take a look, They publish not only the papers, but communications with the reviewers; -
- Do you have questions?

Lily

- First performance review of the EB in May – contribution as a reviewer has been limited
 - (A: No communication, B: No contribution)
- Should we have a “Supporters” category?
- What advice do you have for the journal?
 - Like Cancer res. J – senior, junior, etc. categories (awards, etc.)
 - Emory - how many editorial boards
 - Was in the gene-therapy field; Nano-panel NIH
- Do you have questions?

Chezy

- Altmetric and Dimensions (citation monitors)
- LinkedIn and Mailchimp feedbacks
- Waiting for: PMC (NIH database), **Clarivate LETTER?**
- Ongoing negotiations for co-marketing agreements:
 - BSNM
 - SFNano
 - Jenny Stanford Publishing (Singapore)
- Pieter Cullins Vancouver – pioneer (invitations list)
- Hunziker – Lancet referrals
- 24 hrs running zoom channel – 8 Nobel laureates' speeches Q and A plan
- Technical GB zoom –company
- Patrick - ISNM activity? Research activities are declining...
- Tax-deductible donations from companies?
- Amazon orders 1% (smile.amazon.com)
- Gert Storm

Indian Soc of Nanomedicine contacts?

- Talk to Beat about CLINAM-ISNM connection
- What would juniors publish?
- Communicate with people in India

Jura

- Jura

- “bluechip” – progresszive
- Elég ha 3 usp van...
- Fejlodo orszagok + orszagonkenti lebontás (olvasók)
- Tartsuk a színvonalat, de ez nem anakronisztikus egy kicsit?
- A masodik sor felsorakozik

ROTACIO

- Csak 2-3 evig lehet egy pozicioban valaki (automatikus)
- Kis kiadok – PUBLISHER”S associations? Konzorcium alakitasa?

Penzugyek: - EXCEL table ingyenesseg nem folytathato a vegletekig
pici penzek –ive – egyszeru cash-flow-tablat felállítani
