

A-Series

Analogue gas detector for combustible, toxic and refrigerant gases.

Available for over 100 different gas configurations.

Three wire analogue gas detector. For connection to DGC, MSC, WSB, or any analogue gas detection controller.

- Internal functional control with integrated Watchdog
- Power supply 18–29 V DC, reverse-polarity protected
- 4–20 mA analogue output
- Dimensions 94 x 130 x 57 mm
- IP65 protection
- Easy maintenance and calibration.
- Hardware and software according to SIL compliant development process
- Optional display.
- Optional display with transistor output for AV alarm connection, (Switching capacity 24 V DC / 50 mA).
- Certified to international standards for gas detection and safety applications
