

Directions for use: For best results, apply BioOne® during times of minimal water usage.

RESIDENTIAL

Preventive Maintenance: Apply ½ capful per month directly into each drain.

Slow Drains: Apply ½ capful per day directly into drain for 5 consecutive days or until drain flows freely.

Septic Systems: Flush ½ gallon down the toilet immediately after pumping. Add 1 capful per month directly into drain to maintain system.

COMMERCIAL

Preventive Maintenance: Apply 1 capful per week directly into each drain.

Slow Drains: Apply 1 capful per day directly into drain for 5 consecutive days or until drain flows freely.

Grease Traps: Apply 1 gallon per month directly into grease trap.

For best commercial results, ask your plumber/pumper to explain the benefits of a BioOne® Auto-Dispensing System. Each BioOne® Auto-Dispensing System provides a carefree maintenance program for all commercial wastewater.

THE PROVEN FORMULA FOR BIOLOGICAL MAINTENANCE IN:

- Drain Lines
- Septic Systems
- Drain Fields
- Grease Traps

What is BioOne®?

BioOne® is a patented natural biological drain line, septic, and grease trap maintainer and performs without harmful chemicals or additives. BioOne® will keep systems clean and free flowing by unleashing natural-occurring bacteria that thrive on the grease, oil, and stubborn organics found in every wastewater system.

Daily use of household and commercial-strength chemicals and detergents destroy the natural population of friendly bacteria that every wastewater system relies on to reduce oily and organic components. BioOne® safely, effectively, and economically eliminates the resulting organic buildup by replenishing friendly bacteria in the wastewater environment, eliminating the constant greasy slime buildup and odorous residue.

BioOne® can be safely used in all septic systems, cesspools, leach and drain fields, grease traps, vehicle holding tanks, boat bilges, and all drain lines — sinks, toilets, urinals, tubs, showers, floors, and garbage disposals. BioOne®, unlike dangerous drain-cleaning chemicals, is safe for both human handling and the environment.

BioOne® is designed to work in conjunction with professional plumbing and septic system maintenance. BioOne® will not clear a completely clogged system, repair broken pipes and mechanical defects, or degrade inorganic materials. BioOne® will maintain free-flowing systems and remedy sluggish systems.

- Biologically digests organic wastes
- Helps to prevent drain odors
- Safe for human handling, environment and pipes

BioOne® liquid is available in 64 ounce, 2.5 gallon and 5 gallon. BioOne® powder is available in 2.0 pound containers.
