

The Applebee Preschool

Jan & Feb 2023

Happy New Year 2023!

What an amazing year 2022 was at Applebee! Letters were learned, numbers were counted, paintings were painted and friendships grew just like we did. We discovered new play spaces, welcomed new friends and said see you soon to some of our besties. We even welcomed Ms. Greta to the mix! We are constantly blown away by the kindness each of your children bring to preschool. They have created such incredible friendships! How lucky are we to be able to foster their growth and development through play!

As 2023 approaches, we will continue to focus on the kid's interests and explore what they want to learn more about. We have created a list of themes based on their input. We will focus on their ideas and implement new things they uncover along the way. All of these themes will incorporate creative arts, letters, numbers, math, science, fine and gross motor skills, social skills and emotional growth.

Our Jan & Feb themes will focus on Horses, Weather Together, Post Office/Valentine's Day, and Dinosaurs & Geology.

Happy Holidays,

Joanie, Savannah, Lizzie, Greta and Hannah

Horses

We will gallop into the new year on horseback! We will discover where horses live, what they eat and how to take good care of them. We will play with hay, wash horses and learn about all the different horse breeds there are. We will compare and contrast their sizes and colors and talk about their life cycle.

Weather Together

Watch as we transform our playhouse into a weather center! We will all become meteorologists for a few weeks as we discover all we can about the weather. We will create a map of the world and talk about time zones and how different the weather is depending on where you live. We will make tornadoes in bottles, paint in snow and track the local weather by making charts! The sky is the limit!

Post Office & Valentine's Day

"Love is something if you give it away," and that's what we will do! We will create our very own post office, talk about how our mail gets delivered and spend some time talking about friendship and love!

Dinosaurs & Geology

ROAR...we end the month going on a dinosaur dig! We will talk about Paleontologists, create our own fossils, discover the types and names of different dinosaurs, do some dino dancing, digging, and do some prehistoric play! We will also learn about volcano's and even make our own. Watch for Lava slime, dino eggs, dino bones and more!
