

DINOSAURS REVEALED

A large, textured dinosaur head sculpture, possibly a Tyrannosaurus Rex, is the central focus of the image. The sculpture is rendered in a dark, reddish-brown color and is positioned in a museum or exhibit space. In the background, several people are visible, some looking up at the dinosaur head. The lighting is dramatic, with strong highlights and deep shadows, creating a sense of scale and immersion. The overall atmosphere is one of awe and discovery.

In **DINOSAURS REVEALED**, guests journey through 200 million years of history to encounter dinosaurs from world famous geological dig sites. Included are 26 life-like and life-size animatronic dinosaurs, actual fossils, full dinosaur skeletons, and interactive exhibits including the Paleontologist's Hangout, where guests hear from experts about their fossil hunting expeditions and see what discoveries they've used to piece together unimaginable prehistoric drama.

Developed in partnership with the Kansas University Paleontology Department to ensure complete scientific accuracy for all aspects of the exhibit

Dinosaurs Revealed is a 7,500 – 15,000 Sq/Ft touring exhibition. Featuring 26 life size animatronics, 3 full skeletons, 3 full skulls, an assortment of fossils, epoch specific foliage, extensive scenic elements and ground cover.

My children (8,5,and 2) were enthralled. We loved the attention to detail and the discussions with paleontologists.

Those responsible for the exhibit have done a great job!

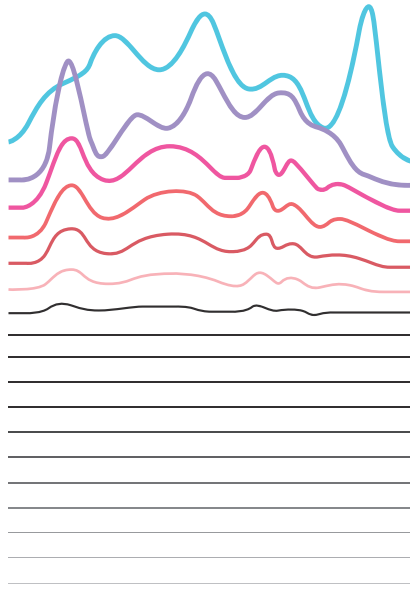

“I wasn’t a huge dinosaur lover before visiting the exhibition, but this was actually really interesting and the animatronic dinosaurs are impressive.”

“We loved the mix of hands-on and visual displays. Lot’s to do for our entire family”

“My family thought it was really cool. Our son wants to be a paleontologist when he grows up. Thanks for putting together such an impressive educational experience suitable for all ages!”
