

Patient Reviews

August 18, 2021

Dr. Lebon has carved out a very comprehensive - in-depth way to get to the major issues a patient is suffering from. She does not make the patient feel they are indecisive. She is compassionate and empathetic, sharing with the patient her own experiences and outcomes. She is suffering from her own health issues; thereby, she is able to sever the patient in the best way. **Barbara P.**

This was a great experience! I did not feel rushed and the doctor was very detailed in her assessment. I look forward to working with her. **Dr. Joseph C, MD**

It is wonderful to talk with a doctor who is seeking to find the cause of your illness rather than treating the symptoms. **L. M.**

Dr. Lebon is a wonderful soul filled with joy, light, and passion. It is obvious that she really cares about her patients. I love the fact that she is a fully trained Naturopathic Doctor and that we have access to her living South of Atlanta. We need more medicine that addresses the root cause of issues instead of placing band-aids over our ailments. I highly recommend her services. **Jenna P.**

Dr. Lebon has constantly helped me to manage my own health. I recently had my annual physical with my General Practitioner. They continually want you to take Medications and so-called preventive shots (The Flu Shot, among others) without giving you any options and very little info. Nor do they have time for an explanation. I don't know what I would've done if without Dr. Lebon. She is teaching me how to manage my own health. Thank Goodness for Dr. Lebon! **Yvonne W.**

Dr. Lebon is knowledgeable and very brilliant of natural medicine. She is caring and concerned about the healing of her patients and goes out of the way to make sure her patients are on the road to health.

The remedies she prescribed worked and the detailed action plan she provides is catered to your individual needs.

She has a great book that can help you on your healing journey and for years to come. She also gives good, wholesome hugs. **Embry A.**

I recently retired. Dr. L has been working closely with me. better overall health is my goal, but I find myself fixated on weight loss. Dr. L helped me to understand that, by working on the overall health issues, for example, high blood pressure, diabetes, and an under active thyroid, the weight loss will naturally follow. **Yvonne W.**

I love Dr. Lebon. She is amazing and so insightful. She really listens to me and helps me get to the root of my problem. Then, together, we correct it so I feel better.

Thanks Dr. Lebon. You're the best. **Kalen V.**

I am excited to share real-life, extraordinary results with my blood sugar and A1C levels from following Dr. Lebon's plan in managing my diabetes. My A1C within a 3 month period trended down from 7.2 to 6.6. and am also enjoying added benefits in weight loss from 194lbs to 188lbs. The weight loss is obvious to my co-workers who comment daily on how loose my uniform fit. If you are struggling with weight issues or high blood sugar and elevated A1C levels don't hesitate to contact Dr Lebon. **C.C.**

June 2, 2017

Dr. Megan has worked with me on long-term goals and health needs. Her constant encouragement and support have helped me keep trying when I thought I could not make progress. Making changes and continuing them is a challenge, but she is so positive and helpful that I am willing to keep working on it.

Karen G.

If you are looking for a great naturopathic doctor look no further. I highly recommend Dr. Lebon. She is a knowledgeable, skilled and efficient practitioner. She takes a genuine interest in treating the root cause to my medical issues. Last week was my third visit with her and I am already noticing a big difference in my health. Usually doctors hardly have time to spend listening to patients' concerns. Not so with Dr Lebon, the least time I have ever spent with her is 1hr. 30 minutes. **C.C**
