APRIL 2025 • ISSUE 2 • VOLUME 1

CHECK OUT OUR TWO NEW SERVICES FOR THE
2025-26 SCHOOL YEAR

Education360

CAMPUS SCHOOL-YEAR LAUNCH SUPPORT

Set the foundation for a successful school year

8-WEEK PLAN

Goals

- Routines & procedures
- Design and deliver standards-aligned instruction
- Student discourse and use of academic language

Optional Add-On:

Family and community engagement

Tailored support for your campus

Math Curriculum and Instruction Support

- Professional development
- Instructional coaching
- Learning walks feedback
- Curriculum implementation support
- Making math relevant
- Increasing access to rigorous math learning

Education360

◆ During your most hectic time of the year, Education360's **Campus School-Year Launch Support** stands in the gap by providing targeted, on-the-ground coaching and collaborative planning that helps teachers establish strong routines, deliver standards-aligned instruction, and foster academic language from week one.

◆ Math opportunity gaps persist across the country, especially for students who have been historically marginalized. Education360 provides **Math Curriculum and Implementation Support** that helps schools improve math instruction and learning by providing coaching, PD, and curriculum support that makes instruction rigorous, relevant, and accessible.

A DAY IN THE LIFE OF NICOLE

Read Across America at Harper-Archer Elementary School 📖🍏

Our CEO, Nicole, had the immense honor and pleasure of being a guest reader for two 3rd grade classes as Harper-Archer Elementary celebrated Read Across America and College & Career Week! 🇺🇸👩🏫

She read a book by former VP Kamala Harris titled “Superheroes are Everywhere”. Nicole also spoke to the students about her international experiences including showing them her passport and different currencies. Nicole said, “I left with my heart FULL!” ❤️❤️ (They are holding up Honduran lempiras in the picture. 😊💡🌟)

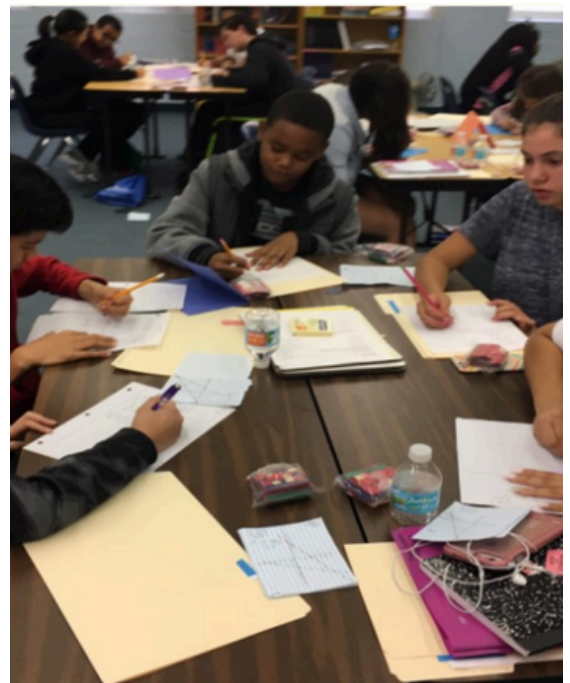

IN TARYN'S WORLD

Rethinking Math Instruction—Insights from the Classroom

Every Thursday, Taryn volunteers with a middle school math tutoring group—an experience that brings joy, humility, and deep reflection.

Many of these students are placed on a track that makes reaching Algebra I by 8th grade nearly impossible—a milestone strongly correlated with high school success and future college access.

It does make clear the need to rethink what we value in math classrooms. Is it about calculating—or thinking? Especially in the age of AI, there's a growing urgency to reframe math as a tool for reasoning and sense-making, rather than just computation and memorization.
