

DRIP CATCHING

URINAL SCREEN

MULTI-FUNCTIONAL & PATENTED.

**FOR CLEAN,
DRIP-FREE RESTROOMS.**

THE DRIP PROBLEM BY THE NUMBERS.

350,000 liters

today's standard urinals contribute to massive drip and splash issues—with over 56 million fixtures in the U.S. alone resulting in more than **350,000 litres of urine splashing onto floors daily.**

Source: [Good.is](#) | Article

PIONEERING **SOLUTIONS** FOR **DRIP FREE** URINAL AREAS.

+ We're pioneers in urinal care, holding the world's first patent for a urinal screen designed to manage both the fading stream and the drips.

U-R-IN® revolutionizes restroom hygiene with innovative, patented drip-catching technology.

Our mission is to transform public and commercial restrooms into cleaner, more inviting spaces, that smell great.

REINVENTING THE URINAL SCREEN.

Standard urinal screens miss one critical detail: residual drips that occur after the user steps away. These drips fall to the floor, creating slippery conditions, stains and release unpleasant odors.

We created the **U-R-IN®** screen to solve this often overlooked hygiene issue.

STAYS IN PLACE NO FLOAT ON FLUSH

PATENTED PRECISION

The **U-R-IN®** urinal screen features a unique funnel system that captures post-use drips directly into the drain.

A CATCHY DESIGN

The unique and one of a kind design helps to catch and stop these often overlooked drips before they hit the floor.

CLEAN & DRY FLOORS

This helps to keep floors and surfaces around the urinal area, clean and dry, reducing slips and bad odors.

A DIFFERENCE MAKER, NOT JUST A DISRUPTOR.

- ✓ Keeps restroom floors clean and dry
- ✓ Minimizes urine odor between cleans
- ✓ Reduces slip risks and cleaning time
- ✓ Discreet, hygienic, and easy to replace
- ✓ Fits standard commercial urinals

THE **DRIP PROBLEM** BY THE NUMBERS.

94%

of commercial restrooms
**experience urine drips on the
floor**, even with conventional
screens installed.

FABULOUSLY FRAGRANT.

What makes U-R-IN® screens distinctive is the way it combines scent with real-world functionality.

The screens are shaped to capture post-use drips — a common cause of floor staining and ongoing odor — while gradually releasing their high quality fragrance for up to 30 days.

U-R-IN's fabulous fragrances bring a new standard to restroom hygiene and scent control. Designed with both performance and practicality in mind, these patented drip-catching urinal screens don't just manage splash — they actively tackle lingering odours using high-quality, slow-release fragrance compounds. Each screen is infused with a carefully chosen scent blend that adds a subtle layer of atmosphere to the environment.

Whether installed in a sports venue, busy service station, or executive office suite, U-R-IN® screens help create a more pleasant and considered user experience, meaningful, and consistent enough for future issues.

FRAGRANCE OPTIONS.

From zesty citrus notes to deeper, wood-based blends, **U-R-IN®** offers a fragrance option for every setting. This is a practical, thoughtful approach to odor control that supports both perception and performance.
