"Elevated Risk" and "High Risk" scores trigger law enforcement officers to offer follow up responses in the form of providing or connecting victims to supportive resources or resource information.

- Victim referred for follow up based on responses to the tool
- Victim referred for follow up based on the officer's professional judgment
- No referral

* To be considered at Initial Appearance. See A.R.S. § 13-3967(B).

These questions are asked, with the permission of the victim, in intimate partner violence incidents resulting in arrest of the alleged offender (or where the alleged offender has fled but will be arrested when apprehended). Participation in this assessment is entirely voluntary and victims must be informed that they may decline to answer any or all questions. This form is included with the police report provided to the court, the prosecutor, and defense counsel.

Victims who score at “Elevated Risk” or “High Risk” are referred to a victim advocate if one is available and to a domestic violence services agency or referral service that can provide safety planning and information about additional available services.

Victims who score in the “Elevated Risk” category (a “Yes” response to 2 or 3 Tier 1 questions) experience a 6 times higher risk of severe re-assault or near lethal violence within seven months when compared to those with fewer than 2 Tier 1 risk factors present. It is estimated that 9 percent of victims at “Elevated Risk” will experience severe re-assault within seven months, versus 1.6 percent of victims that answer “Yes” to fewer than 2 Tier One questions.

Victims who score in the “High Risk” category (a “Yes” response to 4 or more Tier 1 questions) experience a 10.5 times higher risk of severe re-assault or near lethal violence within seven months when compared to those with fewer than 2 Tier 1 risk factors present. It is estimated that 15 percent of victims at “High Risk” will experience severe re-assault within seven months.
