

HAND AND UTILITY PADS

Application

A complete offering from non-abrasive polishing pads to aggressive, heavy duty cleaning pads. Hand and utility pads are made from a non-woven, nylon fiber web that can be surface coated or completely impregnated with abrasive grain and bonded with synthetic resins. The unique manufacturing process produces a uniform dispersement of abrasive grain throughout the web for consistent coverage.

Tough and resilient, Norton hand and utility pads resist snagging or tearing and will not shred. Additionally, they can be used wet or dry, will not rust, oxidize or cause metal contamination.
