Hundreds of New Innovative Microfiber Fabrics • Thousands of Products • Millions of Uses

It's all in the details...

Absorbent • Superior • Durable

Leading Edge Products, Inc. is committed to providing exceptional Value, Quality and Service. Leading Edge is a provider of superior, extremely durable, eco-conscious, Microfiber Cleaning Products and non-toxic Liquid Cleaning Solutions. Our customers know they can depend on us for amazing innovation, on-going client education, and exceptional customer service and support.

Our New Line of **GREEN CLEAN Janitorial Equipment and Waste Receptacles** are the only modular cleaning tools in the world using a blend of 85 to 100 percent post consumer recycled tire rubber and plastic and made entirely from regionally sourced materials. *See back cover.*

Super Absorbent

Our Microfiber Cleaning Materials absorb 7 to 10 times their weight in fluid. The Engineered Microfiber acts like capillary tubes soaking up incredible volumes of liquid.

Easy Care

Our Super Soft Microfiber Cleaning Mop Heads and Cloths are easy to handle, wring out easier and dry faster than synthetic, natural chamois or conventional cotton cleaning products.

Long Lasting

Our commercial and industrial customers report that their Leading Edge Microfiber Products have been commercially laundered well over 700 times, while maintaining their effectiveness, original composition, and visual appeal.

Health Benefits

Our Leading Edge Microfiber Mop Heads and Cloths have a weave and fiber structure that absorbs bacteria that typical cloths can't. Leading Edge consulted, provided technical support and Microfiber Mop Pads for the ground breaking EPA and UC Davis Microfiber Mop studies.

PAD ATTACHMENTS

Velcro

Pocket

Leading Edge Microfiber is a blend of microscopic polyester and polyamide fibers which are split in such a way as to create microscopic hooks and grooves. These act like "micro-fingers" which pick up and then hold, dust, dirt, and grime until released by washing.

MICROFIBER CLOTHS

Available in sizes 4" x 4" to 30" x 60"

No chance of loose ends

8-25-1212-G

First and last stitches are under label to prevent unraveling

Continuous serging and rounded corners stops fraying

Designed to look good and last longer
