

Hat Box Assembly Instructions (cont.)

Rope

You will notice that there are three holes on two sides of the base of the box (two, side by side and 1 centered above it). You will use the three holes on one of the sides and one hole on the other. The rope has a metal barb on each end.

1. Take one end of the barb and poke it through the bottom, right hole with the barb on the inside.
2. Take the long part of the rope and poke it through the other side of the bottom, left hole and pull the rope all the way through.
3. Next, take the long part of the rope (which should be on the inside of the box) and poke it through the top, center hole and pull the rope all the way through. Your rope should now be on the outside of the box above the two holes with the rope going from one side to the other.
4. Take the long part of the rope and bring it to the opposite side of the box and poke the other metal barb through the top hole. Your barb should be on the inside of the box.
