

The Zodiac and the Salts of Salvation

Part ONE

The Relation of the Mineral Salts of the Body to the Signs of the Zodiac

(15th and Memorial Edition)

By Dr. George Washington Carey

Copyright **1932** by Inez Eudora Perry, Hollywood CA USA

**Healing with the 12 Cell Salts!
Give yourself the gift of good health!
It's the greatest source of true wealth.**

The following is my summary version of Part 1 of this book that I assembled because I found the contents so incredibly valuable in helping humanity heal its sicknesses, and know most people won't take the time to plow through it all.

To those who have the time and interest to read this 350 page book I highly recommend it to the serious student. It is jam packed with historical wisdom taken from The Bible, Greek and Roman texts and mythology, the Secret Doctrine, Sanskrit, Buddhist and Asian wisdom.

Barbara D. Kennedy, December 2017

bdkennedynd@live.com

**These Cell Salts can be purchased at health food stores, Sprout's and Whole Foods.
I tend to the Hyland's brand, but Boiron is very good also.**

After thoroughly studying this book, I have decided to take the recommended dosage daily of the "All In One Bottle 12 Cell Salts – on a regular basis as a minimum baseline to my constructive health regime - adding the separate Cell Salts as any symptoms may dictate OR add to the baseline 12 salts that specific one for the astrological sign of the month.

It seems to me - with the challenges humans have giving the body what it needs - daily - that it is wise for everyone do the same!

Creative fun!

If you have an interest in knowing more about the specifics of how these cell salts work within your individual body based on your unique astrological influences, contact me. I've been studying astrology for many years to understand myself, human nature and Life better – at deeper levels!

Food For Thought:

Through astrology we may become cognizant of the relationship existing between the Macracosm or body of the universe and the human body. In this way we discover how and where or in what part of the body Nature's forces are constantly reacting. For example, when powerful planetary forces impinge upon that part of the anatomy of the "Grand Man" known as Cancer, Calcium fluoride is tremendously active; and if in that part of the body of man its essential salt, calcium fluoride is not present in sufficient quantity to set up the same rate of vibration which is the perfect health ratio, then dis-ease manifests. One is not then working with nature, but against her. (p. 127).

Part One

Introduction

By Inez Eudora Perry

The author became immersed with Dr. George W. Carey's booklet, "The Relation of the Mineral Salts of the Body to the Signs of the Zodiac" so much so that for fifteen years she earnestly researched it. It almost became food and drink because she was so convinced of its immeasurable value to humanity.

Dr. Carey discovered that which unlocks the door to mental as well as physical health. The understanding and use of this key will accomplish the psychic-chemical process whereby humankind may regenerate. This means the slow but sure rise from physical and mental degeneracy, disease, unhappiness and death to that glorious state which is the heritage of every one - perfection. (Matt. 5:48) She felt a sincere duty and wish to help humanity.

Our solar system is entering the sign of Aquarius, the Son of Man, and those who know the Truth, or any part of it, must write, speak and live it. Aquarius is the humanitarian, and Uranus (higher mind) is the ruler of this division of the zodiac, which is the path of the solar system.

Therefore, as this is the Age of Truth, those who work with and for it are working in harmony with natural law, while those who follow the opposite course will wonder why they are not prospering ("prosper," meaning to have sufficient for one's necessities, to be physically and mentally comfortable).

It is only truth that matters; opinions do not count.

A knowledge of, and the practice of, the process necessary to the attainment of perfection is absolutely impossible without a thorough understanding of physiological chemistry.

Dr. William Schuessler's Biochemic System of Medicine is the only true system of medicine, for it is the method of supplying the blood with its component parts. (Leviticus 17:11: "For the life of the flesh is in the blood - for it is the blood that maketh an atonement for the soul." Atonement means at-one-ment or harmony. If the blood were chemically perfect, the highly differentiated and attenuated nerve and glandular

fluids, which constitute the soul, would also be perfect. It is only when the blood is chemically perfect that the full quota of Spirit, otherwise God-power, can enter the body, for "Like attracts like."

Spirit manifests imperfectly when material is deficient. Deficiency means dis-ease, lack of ease, inharmony, imperfection.

Thought corresponds to the nature and condition of the brain cells, for they constitute our thought medicine, and the quality and value of that which it brings forth depend entirely on its condition.

Herein lies the explanation of all the trouble in the world: sin, crime, disease, death, unhappiness, insanity, fear, cowardice, lack of positivity, differences in opinion and wars of nations and peoples.

Each one of us represents a consensus or aggregate of vibrations, a sum total of those present in Nature at the time we come into birth. Indeed, it is what makes birth possible. A certain rate of vibration is manifested at that particular time and a corresponding result is produced.

"Whatsoever a man soweth, that shall he also reap." Sowing and reaping, reaping and sowing constitute the ongoing cycle of birth and death. If we were not responsible for the kind of life we live, we would not then be accountable for the form of death which we attract.

Is it not, then equally logical that a reincarnating ego must, because of the vibratory law of attraction, come to birth in an environment and into conditions which are decided by this self-same law? Otherwise justice would not exist. *Justice* is conformity to divine law. It is the working out, the expression of administration of law – doing the *right* thing because it is *best*.

Therefore, a perfect supply of the right chemical elements means perfect cells, a perfect brain, perfect thought, perfect acts, perfection: a GodMan or GodHuman!

Truth is the water of life! May you drink deeply and begin to learn how to live in a most high way.

In Memoriam of Dr. George Washington Carey (1845-1924) – Pioneer of Biochemistry. With a number of physicians, Dr. Carey founded the College of Biochemistry in Yakima,

WA, but back then not much interest in the subject was aroused, and the project given up due to lack of support. In 1928 the Eclectic College of Chiropractic of Los Angeles added biochemistry to its curriculum. Biochemistry actually is an ancient Sanskrit science.

Dr. Carey was deeply interested in life's chemical mysteries, but his searching mind longed to solve the greatest of all, that of physical regeneration and spiritual illumination, and the plan or process necessary for its attainment.

He discovered that "esse," the substance of being, the elixir of life – in other words the brain or life substance – is the protoplasmic seed material which is found to be the possession of every human being. The herculean task or *great work* which everyone must perform, eventually, is the purification and perfection of this material, for it then *becomes* the Christ or ("spiritually perfected human being.")

The climb must begin at some point. The climb to the heights is not the work of one lifetime, but of many, for the simple reason that it is too great a task to accomplish, in a few short years. Death, aside from accident, is the result of dis-ease, inharmony in the chemical elements of the blood, hence cell starvation. Therefore, we will overcome this type of unpleasant death when we know enough to live within the laws of Life. One link of the chains of bondage (ignorance) falls off at a time, until we are free.

The Aquarian Age requires 2,160 years to pass through and is also called the Age of the Son of Man. Humanity must begin to look upward, for it will be forced to by this very vibration. The mind must begin to expand and the "animal-man" make a decided effort to purify himself of his animal nature and become really humane.

Then will humanity work with Nature, and not against her, and thus, will the earth be made new. "And there shall be a new heaven and a new earth."

Dr. Carey and Inez Eudora Perry co-authored *God-Man, The Word Made Flesh* that included a large physiological chart giving much data on occult physiology and indicating the position of the seven great nerve centers or chakras (also called the Seven Churches of Asia). Dr. Cary published two other books: *The Chemistry of Life*, and *The Chemistry and Wonders of the Human Body*.

Dr. Carey's flights into mental ether where facts are born were so lofty that his journey was a lonely one. In his early forties he gave up smoking and never took liquor in any

form as he realized what effect they both had on the delicate tissues, membranes and glands of the body which the Scriptures call "The Temple of God."

Biochemistry

Biochemistry means that chemistry of life, or the union of inorganic and organic substances whereby new compounds are formed. This study uses the inorganic salts, known as cell-salts, or tissue builders.

With respect to so-called "disease," Zodiacs of man's body are perfect principles: oxygen, hydrogen, carbon, lime, iron, potash, soda, silica, magnesia, etc. These elements, gases, etc., are perfect per se, but may be endlessly diversified in combination as are the plants (or bricks or stones with which a building is to be erected).

Disease cannot be removed by poison, but there is a deficiency to be supplied. Symptoms, called disease, disappear or cease to manifest when the food called for is furnished.

The human body is like a storage battery, and will always run well while the chemicals are present in proper quantity and combination, as surely as an automobile will run when charged and supplied with the necessary ingredients to vibrate or cause motion.

The cell salts are found in all our foods, and are thus carried into the blood, where they carry on the life processes, and by law of chemical affinity, keep the human form, bodily functions, materialized. When a deficiency occurs in any of these workers through a non-assimilation of food, poor action of liver or digestive process, dematerialization of the body commences. So disease is a deficiency in some of the chemical constituents that carry on the chemistry of life and not some "invader thing" or "entity."

Having learned that disease is not a thing, but a condition due to lack of some inorganic constituent of the blood, it follows naturally that the proper method of cure is to supply the blood with that which is lacking. In the treatment of disease the use of anything not a constituent of the blood is unnecessary.

Says analytical chemist, Dr. Charles W. Littlefield, "The twelve mineral salts are, in a very real sense, the material basis of the organs and tissues of the body and are absolutely essential to their integrity of structure and functional activity. Experiments prove that the various tissue cells will rapidly disintegrate in the absence of the proper proportion of these salts in the circulating fluid. Whereas the maintenance of this proportion insures

healthy growth and perpetual renewal. These mineral salts, are therefore, the physical basis of all healing. Regardless of the school employed, if these are absent from the blood and tissues, no permanent cure is possible.”

Esoteric Chemistry

Food does not form blood, but simply furnishes the mineral base by setting free the inorganic minerals or cell-salts contained in all food-stuff. The organic part, oil, fibrin, albumen, etc, contained in food is burned or digested in the stomach and intestinal tract to furnish motive power to operate the human machine and draw air into lungs, and into arteries.

In “the new age,” we will need to perfect bodies to correspond with the higher vibration, or motion of the new blood, for “old bottles” (bodies) cannot contain the new wine.

Emotional imbalances such as being grouchy, cross, irritable, despondent or easily discouraged is prima facie evidence that the fluids of the stomach, liver and brain are not vibrating at normal rate, the rate that results in equilibrium or health.

A sufficient amount of the cell-salts of the body, properly combined and taken as food – not simply to sure some ache, pain or exudation – form blood that materialized in healthy fluids, flesh and bone tissue.

Therefore, we should take the tissue call-salts as one uses health foods, not simply to change not-health to health, but to keep the rate of blood vibration in the tone of health all the time.

The Ultimate Biochemistry

Natural man, or natural things, must be raised from the level of nature to super-natural, in order to realize new concepts that lie waiting for recognition above the solar plexus; that is above the animal or natural human.

The positive pole, or being, must be “lifted up” from the kingdom of earth, animal desire below the solar plexus, to the pineal gland which connects the cerebellum, the temple of the spiritual Ego, with the optic thalamus, the third eye.

By this regenerative process, millions of dormant cells of the brain are resurrect, and set in operation, and then man no longer “sees through a glass darkly,” but with the eye of

spiritual understanding.

To those who object to linking chemistry with astrology, the author has this to say: "The Cosmic Law is not in the least disturbed by negative statements of the ignorant individual. Those investigators of natural phenomena, who delve deeply to find truth, pay little heed to the dabbler who says, "I can't understand how the zodiacal signs can have any relation to the cells-salts of the human body. The sole reason that he "cannot understand" is because he never tried to understand!"

A little earnest, patient study will open the understanding of anyone possessed of ordinary intelligence, and make plain the great trust that the UNiverse is what the word implies: one verse.

The human body is the epitome of the cosmos.

Each sign of the zodiac is represented by the twelve functions of the body and the position of the Sun at birth.

Therefore the cell-salt corresponding to the sign of the zodiac and function of the body is consumed more rapidly than other salts; and an extra amount is needed to supply the deficiency caused by the Sun's influence at that particular time.

Mineral salts can be, and are, prepared in biochemic or homeopathic potency as fine as the trituration of Nature's laboratory in the physiology of plant growth. Then they are thoroughly mixed with sugar of milk and pressed into tablets ready to be taken internally to supply deficiencies in the human organism. A lack of the proper amount of these basic mineral salts (12) is the cause of all so-called disease.

ARIES (The Lamb of God) March 21 – April 21

Fire sign – red energy

Governing planet: Mars

Color Spectrum - **Red – Wavelength: 620-750nm; Frequency: 400-484THz**

Key Theme: I Am

Aries gems: amethyst and diamond.

Astral colors: white and rose pink.

Characteristic: “armed and prepared” & “keep your head”

Parts of the body: Cerebrum, spinal cord, nerves

Cell Salt: Kali phos or potassium phosphate (must be properly triturated as per biochemic process)

Deficiency Symptoms of Kali Phosphate: extreme nervousness, insanity, paralysis, hysteria, fainting, mental and physical exhaustion, strange fancies and forebodings, softening of the brain and spinal cord, nervous headache, hungry feeling after eating food.

Note any of these symptoms you may have:

For many years astrologers have waited for the coming discovery of a planet to rule the head or brain of man, symbolized in the “Grand Man” of the heavens by the celestial sign of the zodiac from March 21 – April 21.

Angles of planets cause effects or influences. The priesthood of the middle ages, wishing to control the ignorant masses, personified the influence of planetary aspects, positions or angles, and transposed the letters so they spelled angel. Upon this one manipulation of truth the stupendous frauds of ecclesiasticism were built.

No great movement of the people ever occurs with a scientific cause.

The optic thalamus, meaning "light of the chamber," is the inner or third eye, situated in the center of the head. It connects the pineal gland and the pituitary. The optic nerves are extensions of the cerebral substance and arise in the cortical center in the occipital lobe. "If thine eye be single, thy whole body will be full of light." The optic thalamus is the Aries influence, and when fully developed through physical regeneration, it lifts the initiate from the kingdom of earth, animal desire below the solar plexus, to the pineal gland that connects the cerebellum, the temple of the spiritual Ego, with the optic thalamus, the third eye. (see *God-Man; The Word Made Flesh*)

By this regenerative process, millions of dormant cells of the brain are resurrected and set in operation, and then man no longer "sees through a glass darkly," but with the eye of spiritual understanding.

The new order commeth.

In ancient lore, Aries was known as the "Lamb of God," and associated with the cerebrum. The brain controls and directs the body and mind of man. The brain itself, however, is a receiver operated upon by celestial influences or angles (angels) and must operate according to the directing force or intelligence of its sources of power.

Man has been deficient in understanding because his brain receiver did not vibrate to certain subtle influence. The dynamic cells in the gray matter of the nerves were not finely attuned and did not response – hence – sin, or falling short of understanding.

The basis of the brain or nerve fluid is a certain mineral salt known as *potassium phosphate* or *Kali phos*. These people (and those Aries influences in an individual's astrological chart) are brain workers, earnest, executive and determined. Thus they rapidly use up the brain vitalizers. Kali phos and potassium phosphate is the chief substance in the gray nerve cells.

TAURUS (The Winged Bull) April 21 – May 21

Earth sign

Governing planet: Venus

Color Spectrum - **Red-Orange**

Key Theme: I Have

Gems: Emerald, Moss-agate

Astral colors: Red and Lemon Yellow

Characteristic: "firmness or led by love

Parts of the Body: ears, face around lower jaw, cerebellum, neck, throat, liver, gallbladder

Cell Salt: Natrium sulphate or Nat. sulph (must be properly triturated as per biochemic process)

Deficiency Symptoms of Natrium Sulphate: pains in the back of the head, sometimes extending down the spine, and then affecting the liver. The chief duty of Nat. sulph is to eliminate an excess of water from the body.

Blood does not become overcharged with water from the water we drink, but from an atmosphere overcharged with aqueous vapor drawn from water in rivers, lakes or other sources, by heat of the sun above seventy degrees in shade. The more surplus water there is to be thrown out of the blood, the more sodium sulphate required.

All so-called bilious or malarial troubles are simply a chemical effect or action caused by deficient sulphate or soda. Chills and fever are Nature's method of getting rid of surplus water by squeezing it out of the blood through violent muscular, nervous and vascular spasms.

Note any of these symptoms you may have:

Man is an eternal verity – the truth. Truth never had a beginning.

Those born during the sign of Taurus can descend very deep into materiality or soar “High as that Heaven where Taurus wheels” as written by Edwin Markham, a Taurean.

“It is a vision waiting and aware,
And you must bring it down, oh men of worth,
Bring down the New Republic hung in air,
And make for it foundations on the Earth.”

Air is the raw material for blood, and when it is drawn in, or breathed in, by the “infinite alchemist,” to the blood vessels, it unites with the philosophers stone, mineral salts, and the human laboratory creates blood.

So blood is the elixir of life. The sulphate of sodium, known as Natrium sulphate, chemically corresponds to the physical and mental characteristic of those born in the month of Taurus.

Gemini (Messenger of the Gods) May 21 – June 21

Neutral sign

Governing Planet: Mercury

Color Spectrum - **Orange Wavelength: 590-620nm; Frequency: 484-508THz**

Key Theme: I Think

Gemstones: Beryl, Aquamarine, Dark Blue stones

Astral colors: Red, white, blue (interesting that those who made our first flag and chose the colors, personally knew nothing of astrology, yet the Cosmic Law worked its will to give America "red, white and blue.")

Characteristic: Expression, The Disciple of Service

(Gemini rules the United States of America)

Cell-Salt: Kali Muriaticum (Kali mur. Or potassium chloride) – must be properly triturated as per biochemic process

Deficiency Symptoms of Kail Mur (and Ferrum phos): white thick mucus, headaches from sluggish liver, granulated eyelids, earache with swelling of glands and gray or white furred tongue; catarrhal condition of middle ear, cracking noises, dullness of hearing from throat affections or swelling of the middle ear; stuffy colds in the head; thick, white discharge from the throat; catarrh; faceache from swelling of gums or cheek; canker of the mouth; ulcerated sore throat, mumps, poor appetite from sluggish liver; gastritis, constipation; typhoid; smallpox; cancer; peritonitis; cystitis; gonorrhoea; syphilis; leucorrhoea; pneumonia; pleurisy; coughs; embolism; poor circulation; rheumatism; all swellings; chief remedy of epilepsy; acne; boils; chronic swelling of the feet and legs; creaking of the muscles; eczema, inflammatory conditions such as catarrh and croup, glandular swellings, typhoid and typhus fever; pains increased and aggravated by motion.

Note any of these symptoms you may have:

This cell salt is the mineral worker of blood that forms fibrin and diffuses it throughout the tissues of the body. Kali Mur. Is the maker of fibrin. It must NOT be confused with chlorate of potash which is a poison.

In venous blood fibrin amount to 3 in 1,000 parts. When the molecules of Kali Mur fall below the standard, the blood fibrin thickens, causing what is known as pleurisy, pneumonia, catarrh, diphtheria, etc. When the circulation fails to throw out the thickened fibrin via the glands or mucous membrane, it may stop the action of the heart. "Heart failure" generally means that the heart's action was stopped by little lumps of fibrin clogging the auricles and ventricles of the heart (embolus comes from the Latin word for little lump).

Cancer (The Chemistry of “The Crab”) June 21 – July 22

Water sign

Governing planets: Moon (also Mercury and Mars)

Color Spectrum - **Orange-Yellow**

Key Theme: I Feel

Gemstones: Emerald, Black Onyx

Astral colors: green and russet brown

Characteristic: Cancer is the mother sign of the Zodiac and habitation

Cell Salt: Calcarea Fluorica (fluoride & lime) – must be properly triturated as per biochemic process

Deficiency Symptoms of Calcium Fluoride: skin is rough, chapping and cracking; fissures tend to form in certain parts, as between the toes, around the fingers, anus, back of the ears or corners of the mouth. The skin has become deficient in this rubbery-tissue material – the elastic substance. Hard growths, tumors of a fibroid character on the jaw or cheekbones; loose teeth; receding gums; thin and brittle enamel; tongue has a cracked appearance; elongation of the uvula; hemorrhoids; apparently increased quantity of urine (due to a relaxed condition of muscular fibers); hardening of the testicles; dragging pains in the groin; prolapsed uterus; varicose veins; digestive disturbances; spleen trouble; valvular heart trouble; cataracts forgetfulness and fear of poverty are some of the outstanding indications of the need of this salt. A “crusty” disposition is another.

Note any of these symptoms you may have:

This is a fiber-builder.

Deficiencies in the blood lead to physical and mental disease (or not at ease). All relaxed conditions of tissue (varicose veins and kindred ailments) are due to a lack of sufficient amount of elastic fiber to "rubber" the tissue and hold it in place.

When elastic fiber is deficient in tissue of membrane between the upper and lower brain poles – cerebrum and cerebellum – results a "sagging apart" of the positive and negative poles of the dynamo that runs the machinery of man.

An unfailing sign or symptom of this deficiency is a groundless fear of financial ruin.

Not through quarantine, nor disinfectants, nor "Boards of Health" will humans reach the long sought plane of health; not through affirmations of health, nor denials of disease will bodily regeneration be wrought; not by dieting will the elixir of life and the philosopher's stone be found.

When a man's body is made chemically perfect, the operations of mind will perfectly express.

Leo (The Heart of the Zodiac) July 22 – Aug 23

Fire sign

Governing celestial body: the Sun

Color Spectrum – **Yellow: Wavelength 570-590nm; Frequency: 508-526THz**

Key Theme: I Will

Gemstones: Ruby and Diamond, the precious stone of chrysolite, the golden stone

Astral colors: Yellow, Red and Green

Characteristic: Judged, children of the sun

Cell Salt: Phosphate of Magnesia – must be properly triturated as per biochemic process

Deficiency Symptoms of Magnesium Phosphate: illusions of the senses and strange mental disorders – closely allied with Kali or potassium. Nervous headache with illusions of sight; "seeing double," seeing colors; headache with chilly sensations up and down the spine; sharp, shooting, darting and intermittent pain; all pain which heat relieves and cold aggravates; pain in the nape of the neck, of sharp character; sensitiveness to light; spasmodic twitching of the eyelids; squinting; pain in eyes; spasmodic earache relieved by heat; loss of sense of smell; twitching of mouth or lips; spasmodic stammering; spasmodic closing of the windpipe; constricted feeling in the throat; stomach spasms; cramping of the solar plexus; pain accompanying belching of gas; spasmodic retention of urine; stricture of male sexual organs; menstrual colic; neuralgia of ovaries; constrictive cough of asthma; shooting sensation in limbs, resembling electric shocks; trembling and involuntary motion of hands; paralysis agitans; epileptic spasms; writer's cramp; yawning with spasmodic straining of lower jaw. *Three other salts are required in connection with Magnesium: Natrium Mur, Natrium Sulph and Calcium Sulph.*

Note any of these symptoms you may have:

Leo people receive the heart vibrations, or pulses of the Grand Man or "Circle of Beasts." All the blood in the body passes through the heart. Leo native is the recipient of every quality and possibility contained in the great "alchemical vase" the "Son of Heaven."

Phosphate of magnesia is the remedy for all spasmodic impulsive symptoms. This salt gives the "Lion's spring" or impulse to the blood that throbs through the heart.

The Sun's rays or vibrations must contain a high potency of earth salt, magnesia, in order to be available for use in bodily function. Through the chemical action of the inorganic (mineral and water) in the organic (Sun's rays and ether) does the volatile become fixed, the Word becomes flesh.

Leo people, or strong Leo influences in one's astrological influences consume their birth salts more rapidly than they consume any of the other salts in the blood; hence they are often deficient in magnesium.

Deficiency of Magnesium phosphate causes some very curious and striking symptoms. When particles of this salt become very deficient, there is a disturbance in the fibers of nerves and muscular tissue, and their action is no longer rhythmic. Spasmodic action results. Symptoms are as follows: cramps in the limbs, fingers, neck, in any part of the body; lock jaw, spasmodic coughing, sneezing, choking, crying, laughing, hiccough.

This is the only true spasmodic remedy, and when taken in very hot water, very soon brings relief. It is also the specific remedy for pain.

Angina pectoris is a very painful symptom which calls for large doses of this salt. Neuritis and neuralgia also indicate a need for it, but others salts are required in addition.

All heart and motor system troubles call for Magnesium phosphate. It is suggested by the author that where Calcium in any one combination (or all three) is deficient, Magnesium should also be included because there is a special affinity between it and Calcium. Whenever a person's chemical plan calls for Magnesium, Ferrum should also be taken because they need each other. There is never a condition where there is no call for Ferrum since it is the attractor of oxygen in the body, the means of purification and the great healer.

Virgo (The Virgin Mary) Aug 23 – Sept 23

Earth sign

Governing Planet: Mercury

Color Spectrum - **Yellow-Green**

Key Theme: I Analyze

Gemstones: Pink Jasper

Astral colors: Gold and black

Characteristic: To increase power or "son of the right hand." Virgin Mary means pure sea or water

Cell Salt: Kali sulph, a wonderful salt, and its operation in the divine laboratory of man's body, where it manufactures oil, is the miracle of the chemistry of life (must be properly triturated as per biochemic process)

Deficiency Symptoms of Kali Sulph

Lack of potassium or Kalium is ALL THREE COMBINATIONS causes virulent and poisonous diseases, and those are easily poisoned by tainted food and need to be extremely careful relative to their diet.

If Kali sulph acts as a fuel, deficiency in it will cause a person to feel suffocated and feels greatly under certain atmospheric conditions. Deficiencies also produce a rise of temperature in the afternoon and early evening, and a desire for cold air. It also causes severe hot flashes.

Other symptoms include: scaly and sticky dandruff; hair falling out; yellow and yellowish-green discharge from eyes; inflammation of the conjunctiva; earache with sharp, cutting pain; deafness from swelling of the internal ear; catarrhal conditions of the head and throat, acute or chronic, with discharge of yellow or greenish matter (this salt should be given freely for colds and to promote perspiration); stuffy colds; neuralgia of the face with shifting, intermittent pain, evening aggravation; cancer on nose, face, or on any part of the body (give Kali sulph and Ferrum) frequently for intestinal, also vaginal and uterine cancer. Other symptoms are dread of hot drinks; thirstlessness; gastric fever; all abdominal troubles; typhoid and typhus fever; cystitis; sexual disorders; bronchitis;

cough which is worse in the evening; pneumonia; whooping-cough; skin hot, dry and harsh; rheumatic pains in joints of a shifting, wandering nature; rattling and gurgling of mucus in the chest; fungoid inflammation of the joints; all sores which exude a thin, yellow, watery matter; skin scaling freely on a sticky base; eczema; blood poisoning; typhoid and small-pox. And all children's diseases to aid in formation of new skin.

The human body must possess sufficient Kali sulph to enable the solar plexus to create its perfect health.

Note any of these symptoms you may have:

The first element that is disturbed of those born in the celestial sign Virgo is oil: this break in the function of oil shows a deficiency in potassium sulphate, known in pharmacy as Kali sulphate.

Virgo is represented in the human body by the solar plexus and bowels. The solar plexus is the great receiving station of energy from the back brain, while the bowels complete the chemicalization of the food products ready to be assimilated by the blood.

Virgo people are discriminating, analytical and critical.

When the body is in health little jets of steam are constantly escaping from the seven million pores of the skin. A deficiency in Kali sulph molecules causes the oil in the tissue to thicken and clog these safety valves of the human engine, thus turning heat and secretions back upon the inner organs, lungs, pleura, membrane of nasal passages, etc. Doesn't it seem strange that medical science, that boasts of such great progress, can invent no better term than "bad cold" for these chemical results?

Libra (The Balance) Sept 23 – Oct 23

Air sign

Governing Planet: Venus

Color Spectrum – **Green: Wavelength: 495-570nm; Frequency: 526-606THz**

Key Theme: I Balance

Gemstones: Diamond and Opal

Astral colors: black, crimson, light blue

Characteristics: body, temple, house, vision of the sun ,

Cell Salt: Natrium phosphate (alkaline); Nat phos - properly triturated as per biochemic process

Deficiency Symptoms of Natrium Phosphate: itching, quarrelsome, disagreeable, headache on crown of head and also forehead. Feeling as if the skull were too full; intense pressure and heat, causing one to fear insanity; headache with pain in stomach, giddiness; inflammation of the eyes, and secretion of golden-yellow, creamy matter. Ears may become sore and scabby with creamy discharge; itching of the nose, denoting worms; face red and blotches, blotches coming and going; acid rising; sour taste in mouth; canker sores; tonsils and throat inflamed; dyspepsia; gastric abrasions; ulcers that can turn to cancer. Also seminal weakness or emissions; increased sexual desire; acid secretions from vagina; irregular periods, when accompanied by frontal headache; morning nausea in pregnancy; palpitation and irregularity of heart action (result of imperfect digestion); trembling around the heart, especially after eating; rheumatism of the joints; cracking and creaking with pain and soreness; eczema; "rose-rash" hives; flashes of heat from indigestion; itching of the anus; restless sleep. Negative attitudes include sharp, cutting, disagreeable and unattractive are the negatives of agreeable, pleasant, attractive, charm, beauty and loveliness, the attributes of the purified Venus will be readily seen.

Note any of these symptoms you may have:

A certain amount of acid is always present in the blood, nerve, stomach and liver fluids. The apparent excess of acid is always due to a deficiency in the alkaline Libra salt.

Acid, in alchemical lore, is represented as Satan (or Saturn) while sodium phosphate symbolize Christ (Neptune). And absence of sodium phosphate (Christ) gives license to the destructive energies (Saturn) to run riot in the Holy Temple (the body). References to the temple in figurative language in the Bible and New Testament always symbolize the human organism. "Know ye not that your bodies are the Temple of the Living God?" Solomon's temple is an allegory of the physical body of man and woman.

Hate, envy, criticism, jealousy, competition, selfishness, war, suicide and murder are largely caused by acid condition of the blood, producing changes by chemical poisons and irritations of the brain cells, the keys upon which the soul plays "Divine harmonies" or plays "fantastic tricks before high heaven" according to the arrangement of chemical molecules in the wondrous laboratory of the soul.

Without a proper balance of the Venus salt, the agent of peace and love, man is fit for "treason and spoils."

The people of the world never needed the alkaline of Libra salt more than they do at the present time while wars strut upon the stage of life.

Scorpio (From Scorpion to White Eagle) Oct 23 – Nov 22

Water sign

Governing Planet: Mars & Pluto

Color Spectrum - **Green-Blue**

Key Theme: I Desire

Gemstones: Malachite & Topaz

Astral colors: Golden brown & Black

Characteristics: A Doer of Things – also fiery at times; vibrations of blood; need to watch “boiling over;” create or ascend

Cell Salt: Calcarea sulphate (must be properly triturated according to the biochemic method)

Deficiency Symptoms of Calcium Sulph: a burning sensation – feet, stomach, anywhere in the body; ulcerated stomach; long-continued suppuration (formation or discharge of pus – yellow, purulent matter), one of the three causes of anemia; yellowish or pasty-colored complexion; abscess of the cornea; deep-seated ulcers of the eye; discharge of pus from the ear; third stage of cold when discharge is thick and yellow; chronic catarrh; mattery pimples on the face, esp. at puberty, purulent secretions in the mouth; ulceration of the roots of the teeth; swollen gums and cheeks; third stage of sore throat and pus discharges; discharge of matter or blood and matter from the bowels; abscess of the liver; ulceration of the bowels; running off of the bowels; chronic inflammation of the bladder; suppurating abscess of the prostate in the male or ovaries in the female; syphilis or gonorrhoea, in the pus discharge stage; yellow leucorrhoea; inflammation of the breast; all stages of tuberculosis; cough with mattery sputa; burning of soles of the feet; festering easily, esp. around the nails; neglected wound which do not seem able to heal.

Note any of these symptoms you may have:

From Scorpion to White Eagle may seem a very long journey to one who has not learned the science of patience or realized that time is an illusion of physical sense.

Scorpio is represented in human material organism by the sexual functions.

In Sanskrit, six means sex. Three means male, father, the spirit of the male, the son; this trinity forms one pole of being, energy or life – the positive polarity. The negative polarity is the female trinity: female spirit of mother and daughter. Thus two threes or trinities produce six or sex, the operation of which is the cause of all manifestation.

The possibilities of Scorpio people are boundless after they have passed through trials and tribulations ie: some type of crucifixion or "crossification" that works to transform the mind from the lower levels to the higher levels of consciousness.

Scorpio people are natural magnetic healers, especially after having passed through the waters of adversity, since heat is caused by the union of water and lime.

A break in the molecular chain of the Scorpio salt, caused by a deficiency of that material in the blood, is the primal cause of all so-called disease of these people. Disturbances not only cause symptoms called disease in physical functions, but it disturbs the astral fluids and gray matter of brains cells, and thereby changes the operation of mind into inharmony. Since means to lack or fall short; thus chemical deficiencies in life's chemistry cause "sin."

When man learns to supply his dynamo with the proper dynamics, he will "wash away his sins with the blood of Christ" – blood made with the "White Stone."

Sagittarius ("The Centaur or Archer) November 22 – December 22

Fire sign

Governing Planet: Jupiter

Color Spectrum – **Blue: Wavelength 450 – 495nm; Frequency: 606-668THz**

Key Theme: I Perceive

Gemstones: Diamond, Turquoise, Carbuncle

Astral colors: Gold, Red, Green

Characteristics: Joined or associated; swift and strong; prophetic; look deeply into the future and hit the mark like the archer

Cell Salt: Silicea, silica or common quartz (must be properly triturated as per biochemic process)

Deficiency Symptoms of Silicea: red eyelids; redness of the edges of the nostrils, acne, angry-red pimples; small red pimples on the scalp; mental abstraction; despondency and disgust with life; lumps or nodules on the scalp; falling of hair or splitting of hair ends; sties on eyelids; lachrymal fistula; boils and cystic tumors around the ears; cataract; dullness of hearing with swelling and catarrh of the Eustachian tubes; caries of the bones; mastoid process; catarrh with discharge of thick, yellow matter; fetid, offensive discharge; carries and necrosis of the bones of face or jaw; gum-boils; pyorrhea; hardening of the tongue; ulcers on the liver; suppuration (pus) of the kidneys; urine loaded with pus and mucous; chronic syphilis; prostatitis; chronic gonorrhea; leucorrhea; hard lumps in breasts; fistulous ulcers; tuberculosis; pneumonia; bronchitis; neglected injuries, festering and threatening to pus; hip-joint disease; carbuncles; fetid perspiration of feet; obstinate neuralgia occurring at night when neither head nor cold gives relief; copious night sweats; insufficient perspiration; jerking of limbs during sleep, etc.

Note any of these symptoms you may have:

This salt is the surgeon of the human organism. Silica is found in the hair, skin, nails, periosteum, membrane covering and protecting the bone, the nerve sheath, and a trace in bone tissue. When it becomes necessary that decaying organic matter be discharged from any part of the body by the process of suppuration, these sharp pointed particles are pushed forward by the marvelous intelligence that operates without ceasing, day and night in the wondrous human body, and like a lancet cut a passage to the surface for the discharge of pus. Nowhere in all the records of physiology or biological research can anything be found more wonderful than the chemical and mechanical operation of this Divine artisan.

The Sagittarius native is very successful in thought transference. He (or she) can concentrate on a brain, miles distant, and so vibrate the aerial wires that fill space that the molecular intelligence of those finely attuned to Nature's harmonies may read the message.

Capricorn (Great Work of The Goat) Dec 22 – Jan 21

Earth sign

Ruling Planet: Saturn

Color Spectrum - **Blue-Violet-Purple**

Key Theme: I Use

Gemstones: White Onyx, Moonstone

Astral colors: Garnet, Brown, Silver-Gray, Black

Characteristics: foundational, framework builders of society – the commonwealth of human interests

Cell Salt: Calcarea phosphate (or phosphate of lime) – must be properly triturated as per biochemic process)

Deficiency Symptoms of Calcium Phosphate: poor memory, incapacity for concentrated thought; weak minds in those practicing or who have practiced self-abuse; fear; panic; desire for solitude; cold feeling in the head; also tight sensation in the head; skull thin and soft; crawling sensation over head; dropsy of brain; loss of hair; inability to hold head up; eyes sensitive to artificial light; aching of eyeballs; swelling of glands; nasal polypi; cold in the head and albuminous discharge; anemic, dirty-looking face; pimples on face; feeling of coldness and numbness; bad, disgusting taste in the mouth, esp, in morning; very fetid breath; decay of teeth; enlargement of throat; goiter (other salts required); chronic enlargement of the tonsils; pain in throat on swallowing; constant hoarseness; rough, hoarse voice in children; pain after eating – food seeming to lie in a lump; food causing distress; abnormal appetite; sinking or faint feeling in stomach; palpitation of the heart and weakness; pain in the bones; all bone troubles; spinal irritation; injuries to base of spine or coccyx; convulsions in teething children; bones easily broken; stunted growth; cellular disturbances; restless sleep.

Note any of these symptoms you may have:

Associated with large business interests – where many laborers are employed.

Bone tissue is composed principally of phosphate of lime known as Calcareous phosphate or Calcium phosphate.

When the molecules of lime phosphate fall below the standard, a disturbance often occurs in the bone tissue and the decay of bone, known as caries of bone, commences. Phosphate of lime is the worker of albumin. It carries it to bone and uses it as cement in the making of bone.

So-called "Bright's disease" is simply an overflow of albumin via kidneys, due to a deficiency of phosphate of lime.

When the Goat salt is deficient the gastric juice and bile ferments arise from undigested foods; acids from this find their way to synovial fluids in the joints of legs or arms or hands, and often cause severe pains (rheumatism);

Non-functional albumin, caused by a lack of lime phosphate, is the cause of eruptions, abscesses, consumption, catarrh and many so-called diseases.

Aquarius (The Water Bearer) Jan 21 – Feb 20

Air sign

Ruling Planet: Saturn & Uranus

Color Spectrum - **Violet – Wavelength: 380-450nm; Frequency: 668 – 789THz**

Key Theme: I Know

Gemstones: Sapphire, Opal, Turquoise

Astral colors: Blue, Pink, Nile Green

Characteristics: Humanitarian, altruistic friendship-first and foremost is the Friend Within

Cell Salt: **Natrium muriaticum** or Sodium chloride

Deficiency Symptoms of Natrium Mur: feeling weary and tired on arising in morning; irritability; no pep or vitality until later into day; too little or too much saliva; mouth and tongue dry and parched, esp. in morning; sun-stroke; dull, heavy and hammering headaches; neuralgic pains in the eyes, and flow of tears; flow of tears when associated with cold in the head; dandruff; eruptions on the scalp with watery contents; blisters anywhere on the body; itching skin; smarting secretions from the eyes; fresh colds with transparent mucus and sneezing; hay fever, asthma, influenza (hayfever and “colds” are due to certain mineral deficiencies which naturally cause the vascular linings to be insufficiently protected; thus the particles may cause irritation. We tend to blame plants for it, but it is really our imbalances within); swelling of glands under tongue; blisters on tip of tongue; constant spitting of frothy mucus, inflammation of mucus lining of throat; sore throat with excessive dryness; stinging piles; catarrh of the bladder; diabetes; chronic gonorrhoea; chronic syphilis; pleurisy, pulse rapid and intermittent heart beats felt all over the body; blood thin and watery; anemia; “fidgets”; joints cracking and creaking; hysterical spasms and debility; restlessness and twitching of the muscles; stings of insects; dropsy; delirium torments and wandering; stupor and sleepiness; despondent moods.

Note any of these symptoms you may have:

As per the author's writing of this book, published in 1932, she states that the solar system has entered the "Sign of the Son of Man," Aquarius, where it will remain for over 2,000 years. Hence when the sun passes through Aquarius once every year we have the double influence of Aquarius vibrations.

Air contains 78% nitrogen gas believed by scientists to be mineral in ultimate potency. Minerals are formed by the precipitation of nitrogen gas. Differentiation is attained by the proportion of oxygen and aqueous vapor (hydrogen) that unites with nitrogen.

A combination of sodium and chlorine forms the mineral known as common salt. This mineral absorbs water. The circulation or distribution of water in the human organism is due to the chemical action of the molecules of sodium chloride.

Note: common table salt particles are too coarse to be taken up by the blood corpuscles (cells) and act as an irritant in the stomach and intestinal tract.

Pisces (The Fish that Swim In the Pure Sea) Feb 20 – Mar 21

Water sign

Ruling Planet: Neptune

Color Spectrum - **Purple-Red/Magenta**

Key Theme: I Believe

Gemstones: Aquamarine, Moonstone

Astral colors: White, Pink, Emerald-Green, Black

Characteristics: Spiritual inspiration of God within

Cell Salt: **Ferrum phosphate** or phosphate of iron

A “few” of the many Deficiency Symptoms of Ferrum Phos: congestion of the brain from any cause; injury to the brain; wakefulness due to the walls of the blood vessels in the head being unable to disgorge the blood so that sleep may result (they lose their tonicity and do not support normal circulation); cerebritis; dizziness; rush of blood to the head causing delirium; emotional unbalance or insanity; headache with rush of blood to the head; headache of a dull, throbbing, bruising, beating character; head very sore to touch, pain on pulling the hair; congestion (that nose bleeds relieves); all fevers, inflamed gums; hemorrhage; very red tongue indicating inflammation; sore throat; vomiting of bright red blood; first stages of all inflammations; incontinence of urine when from weakness of the sphincter muscle; cystitis; burning, sore pain over kidneys; lumbago; sore ligaments; menstrual discharge bright red; palpitation of the heart; anemia; hyperanemia; stiff back.

Fractures and injuries of all kinds call for the free use of this salt to induce more of the healing oxygen and to enable the waste and poison to be carried off.

Depression, discouragement, and a feeling as if one were absolutely crushed. Potassium deficiency always accompanies lack of iron.

Note any of these symptoms you may have:

No matter what other deficiencies are indicated, the reason for this is obvious, since iron is the means of the healing spirit entering the blood.

This position of the Sun at birth gives the native a kind, loving nature, industrious, methodical, logical, mathematical; sympathetic and kind to people in distress.

Phosphate of iron has an affinity for oxygen which is carried into the circulation and diffused through the organism by the chemical force of this inorganic salt.

The feet are the foundation of the body. Iron is the foundation of blood. Most diseases of Pisces people commence with symptoms indicating a deficiency of iron molecules in the blood. Hence Pisces people use more iron than those born in other signs.

Iron is known as the magnetic mineral due to the fact that it attracts oxygen. Pisces people possess great magnetic force in their hands, and make the best magnetic healers.

Health depends upon a proper amount of iron phosphate molecules in the blood. When these oxygen carriers are deficient of the circulation is increased in order to conduct a sufficient amount of oxygen to the extremities – all parts of the body – with the diminished quantity of iron on hand. This increased motion of blood causes friction, the result of which is heat.

Part TWO

An Esoteric Analysis and Synthesis of the Zodiacal Signs and Their Physico-Chemical Allocations

By Inez Eudora Perry

(3rd Edition)

Copyright 1932

By Inez Eudora Perry, Hollywood, California, USA

***Note:** Because I found this book so fascinating, I took notes on things that especially interested me, and I hope they are to you too. This was published in 1932 when people still referred to all of humans – men and women - as “mankind” (as if the other half of society didn’t exist or matter). So when you read “man” or “mankind” or “he”...please...in your mind...replace these with “human” or “humankind” and include the feminine with the masculine. Thank Goodness, we’ve come a long way baby! Barbara D Kennedy, Dec. 2017*

Into these pages goes knowledge of the chemical condition of the average human brain, gained from thirty years’ experience along the lines of health. So it is self-evident that a few earnest students will realize the value of this information.

The author, however, has already received her own personal reward for the years of investigation and research work. All her life she has aspired for truth above all things. She has aspired to know facts, to solve the problem of the old injunction “Man, know thyself.” This in itself became such a joyous, fascinating occupation that it was like going out into the green sanctuary of Nature and being alone with Nature’s God, the Spirit within one’s self.

The world is more ready to accept that which has previously seemed absurd and

impossible because of the quickening of comprehension which is now going on. We are merging into the atmosphere of the Aquarian Age. This means both astrologically and astronomically, that our entire solar system is beginning to pass into the division of the universe which is occupied by the sign of Aquarius. Approximately 2,160 years are required for this transit.

As Aquarius is "the sign of the Son of Man" it deals not only with humanity as a whole, but with the real man within man. The Son of Man, the Higher Self, is that real man, or mankind made new. This trend is a veritable cosmic urge that is truly very definite and powerful. It is the cause of the appearance of all "new" and unusual ideas, happenings, fashions, inventions, etc. It is also the cause of all the terrible and abnormal crimes with which the papers are constantly filled: the perversion of truth which is everywhere being manifested. Nature and nature's God now demand an expansion of consciousness in man. This is the beginning of a realization of the laws of God, their acceptance, the practice of them, and the effort to climb upward.

"Ye must make new bottles for the new wine or the old bottles will burst." We must reconstruct our bodies and brain cells with the desired and required material, in order that they may be able to do the work now demanded of them. Otherwise we will find the fuse blowing out exactly as it does when the lap and the current do not correspond.

As this is the Aquarian Age, its spirit is back of all, and will assist and protect those who speak the truth.

The following is a summarized version of this book published in 1932

Chapter 1

The Analysis & Synthesis of ARIES and Kali Phos

Words are living powers. I shall urge on you how well it will repay you to study the words which you are in the habit of using or of meeting, be they such as relate to highest spiritual things or our common words of the shop and market, and of all the familiar intercourse of life. It will indeed repay you far better than you can easily believe. March 21st is the first day of Spring. There is an awakening, a spring-ing up for a resurrection of all Nature. Very, very few realize anything at all of the sacred out-pouring, a flood-tide of heavenly power, of spiritual electricity which charges not only the earth, but all human beings who are able to receive it. Each human being is a battery, an aggregation of cells, and the law governing its charging is exactly the same as that with which electricians are familiar. It must have the necessary material to attract electricity, the proper kind and the right quantity. A knowledge of the cell-salts, such as contained in Schuessler's Biochemistry, solves the problem.

The brain substance is being acted on by Cosmic Electricity outpoured from the cerebrum of the Grand Man. This is the time, then, to begin one's labors, for the charged battery must begin to work – to be utilized. Would that humanity could realize this might fact! But human batteries are functioning poorly, the currents are weak, the cells actually corroded. The great reservoir of unlimited electrical power is ever present in the universe – Spirit is never deficient. The trouble lies only in the human batter. It cannot contact what it has no power to attract. This is the mysterious chemical secret that has been hidden from man by his own ignorance, and *it is this secret which this chapter will reveal, for it is Kali phos which is the casket that holds this priceless gem.*

Astrology deals with the body (anatomy) of the Grand man (the universe) and by analogy, the body of man.

Aries, the first of head sign of the zodiac. House of God or the Spirit in man. It houses the brain, the organ of thought. If it is able to function clearly it will throw light on every subject – it will illuminate and thus reveal all things to man. The only material which is so chemically constituted that it has the power to produce light or fire is Kali phos or potassium phosphate. It produces the highest rate of vibration of any of the twelve basic mineral elements of the body.

The presence of oxygen, hydrogen, nitrogen and carbon in the body depends entirely on the presence of the twelve minerals. For example, the presence in the body of oxygen depends entirely on the Ferrum or iron content of the blood. It is the chemical attractor of oxygen and is its only means of entering the body! *So that the quantity of oxygen in the body depends wholly on the amount of iron in the blood stream, and therefore oxygen will take care of itself when the blood is supplied with iron phosphate.*

Aries relates to the cerebrum and cord which constitute the Father, the Most High, the Creator or Progenitor of the body, otherwise God and the River of God.

As the rate of vibration of the cells of his body increases in proportion to the result of purification and obedience to God's laws of right living, he no longer desires, but inspiration takes its place.

Macroprosophus is the ancient name for the cerebrum, the spiritual brain, the actual Father or Creator. *Indelibly etch upon your mind: The brain or cerebrum is the first and most important gland in the body. The essence it creates flows through all the glands, but each gland consecutively differentiates its fluid. The worst thief is the one who robs himself of his most precious treasure – the golden essence of life.*

The optic thalamus occupies the central portion of Aries, or third ventricles. The Sun is exalted in Aries, meaning that, at last, the inner sun, or thalamus is receiving what has been so long kept from it. The Lord is now truly receiving the bread and wine for the supper in the upper chamber.

The cerebrum (Aries) is the first gland in the body. It is also associated with the optic thalamus, the All-Seeing Eye, the seat of knowledge where we interpret all that we see, hear, smell, taste and touch.

Potassium is a most subtle substance of very high vibration, capable of holding within itself the fire of life, electricity, prana or Spirit.

Kali phos - potassium phosphate is the chief substance in the gray nerve cells.

In the Gospel of Buddha: "But to satisfy the necessities of life is not evil. To keep the body in good health is a duty, for otherwise we shall not be able to trim the lap of wisdom and keep our minds strong and clear." *Truly does Kali phos, or phosphate of potassium feed this lamp. It is the vehicle of consciousness and the expression of consciousness.*

Chapter 2

The Analysis and Synthesis of TAURUS and Natrium Sulph

This sign has been the inspiration in all ages of more myths and stories than all the other twelve signs put together. Taurus was worshiped as a healing god because he represented the growing strength of the Sun, and healing, from Helios' the Sun. Helios is also Apollo, and every nation and every people has had its own particular term for this divine giver of life, light and heat.

Taurus is the first of the earth signs (triplicity: Taurus, Virgo, Capricorn). The parts of the body with which this sign allocates are the ears, face around lower jaw, cerebellum, neck, throat, liver and gallbladder.

Re: the cerebellum, bellum is a Latin word meaning war or antagonism, contention. Thus contention or antagonism because of the animal brain, the bull-headed god of the Age of the Golden Calf, it represents that stage in the evolution of humanity when it is born by animal passions.

The subconscious mind functions through the lower brain or cerebellum.

The cerebrum is the spiritual brain, the organ of consciousness. It is Rama, the Most High. In Greek, it is Athens, and the goddess Athena that means wisdom. When this part of the brain is chemically perfect and hence all knowledge is obtained, consciousness or Spirit manifests as the Christ Consciousness.

The sub-conscious brain in which the sub-conscious mind functions is situated *under* the brain pertaining to consciousness or the cerebrum.

The cerebrum is the God-brain (associated with Aries), and *the cerebellum is the contending brain (associated with Taurus) in humans*. The state of mind, then, which each one of us manifests in our imperfect state becomes the divine Bull by being yoked to our higher consciousness. Thus, Taurus must be yoked – controlled – guided by wisdom. Many contend that the solar plexus is the sub-conscious brain; but an understanding of anatomy and physiology proves that this great center which is a collection of twelve great nerve ganglia, and hence a zodiac in itself, is a receiver of energy, and hence one of feeling and sensation, not of thought.

The true meaning of "sin" is being deficient or falling short to act in our higher consciousness.

As is Aries, the last third (or decan) of Taurus is also concerned with the senses, especially with eyesight. As the nerves from the head contact or cross at the base of the brain, a chart will often indicate trouble with sight. The reason for this is that there is interference with circulation, and the special nerves having to do with this function are unable to carry nutritive blood to the center in sufficient quantity, or to bring away the waste products. The result is often cataracts.

The cerebellum is the motor brain, the mechanical brain. It does things. It receives the electricity which Aries, the cerebrum, generates. For cosmic electricity – Spirit – starts the motor, and the medulla oblongata relays it so that it may start on its long journey down into the torso. The energy sent is received by the solar plexus, consisting of twelve large nerve ganglia, which, in turn broadcasts it to the organs. If the solar plexus is weak because it is chemically deficient, it is not only unable to receive sufficient of this great influx, but is also unable to supply the organs. It cannot give what it does not possess.

Think about the chaotic condition in which we find humanity today. We find everything perverted – religion, science, law, medicine, sex, finance, amusements. Nothing has escaped, with the exception of mathematics.

The fir or evergreen tree which from time immemorial has been used as the symbol of the Tree of Life.

The pine cone has been employed as the symbol of the renewal and hence continuity of life. This wonderful and so-called mysterious gland in the head is the creator and renewer of life. The cerebrum is truly a mine in which is cloistered that most precious of all substances which has always been likened to gold.

The Spiritual man is represented by gold (the fire of life), the feminine counterpart by silver (the water of life). The adi (ida) nerve is associated with the pituitary body or gland in the head while the pengala (pingali) connects with the pineal gland. The Sun rules the pineal and the Moon the pituitary. These constitute the male and female within which God joined. The nerve-fluid from these two glands meet and crosses at the point or place in the head where Taurus begins – Golgotha – Place of the Skull. This is the cross on which animal nature brings suffering.

Not only do these nerves cross at the base of the brain, but at the second lumbar vertebra also, for the fire and water of life go downward into Scorpio and are literally thrown away. This causes the real man, the Spirit, to be crucified, defrauded by the animal nature of material with which to express divinity.

The right and left sympathetic systems are thieves, for until the emotions become controlled through the proper supply of the necessary chemical elements, the real function of this part of the body is unable to manifest. The real function is motion and not e-motion. The e-motional life robs the body of nerve energy and of the highly specialized nerve or soul fluid.

Natrium sulph, the cell-salt for Taurus, has the power to attract twice its bulk of water containing waste products and to throw it out of the blood. As waste products consist in the average human body of unhealthy or acid residue, they can truthfully be compared to sulphuric acid. Strange and sinister chemical products are found in a very foul and unhealthy human body.

Those born when the Sun is transiting ***Taurus are lymphatic types***, for they are deficient in sodium sulphate. When this salt is supplied and taken faithfully, it will gradually eliminate all these ills.

When the nature and use of Natrium sulph is understood, people will then know why they take on weight and increase in size in spite of strict dieting. It is because the lymphatic system slowly becomes engorged with excess fluid derived from the atmosphere through the breath. Air goes directly into the arterial blood. Air is humid or moist, and when it carries in suspension a great quantity of water the blood becomes quickly overcharged. It is difficult for the Taurian-born to live in comfort in the tropics or where there is great humidity.

Deficient material for Nature to work with and a general toxic condition constitute the reason for physical and mental dis-ease and disharmony.

We should ever seek to know this cosmic mother of ours, to work understanding with her. We could accomplish marvelous things if we could only work with her.

Chapter 3

The Analysis and Synthesis of GEMINI & Kali Mur (Chloride of Potassium)

The word June is derived from the Latin very Jungo, meaning a joining or joint, therefore a fiber or shoot. It is a thread, a filament branching off from the main stalk whose source is the bud or swelling brought forth by the Sun in Taurus.

Juno, as consort of Jupiter, refers to this sign, Gemini and Sagittarius constituting the two ends of one pole – that of growth and travel.

It must be understood that The Divine Man or Spirit in us actually becomes suspended on a cross of matter. Its body constitutes that cross (tree of nerves.) The two nervous systems constitute the living physiological trees upon which each and every human being is "crucified," for through them all of the functions of the body are carried on. They register in themselves, the kind of life each person lives, for every thought reacts instantly on them. The brain and nerves have a chemical formula, as do all parts of the body, and not until they are chemically perfect will absolute self control be possible. (This is why the story of Freemasonry is not relative to character building, but to body building; character will take care of itself when the brain cells are chemically perfect.)

On page 167 of Part 1 of the *Secret Doctrine*, Madam Blavatsky quotes the following: *"Lead the life necessary for the acquisition of such knowledge and powers, and Wisdom will come to you naturally."*

As the Sun is exalted in Aries and the Moon in Taurus, neither one can accomplish anything in the great work without Mercury, who truly is the messenger of the gods, the mind-fluid, the bearer or carrier of light or electricity.

The cerebro-spinal system is the generator and carrier of physic-chemical electricity which is energy or life. This explains why Mercury is associated with Gemini as its ruler, meaning that all the activities with which this sign and house have to do are of a Mercurial nature.

The different rates of vibration by means of which all Nature's work is accomplished have received the names of planets, in order that humanity may study them and the effects they produce, not only in nature, but in the human body.

Metaphysically, Mercury is mind; physiologically, the cerebro-spinal system – the nerves; chemically it is quicksilver, an oily or fatty substance.

In ancient times, Mercury, the Messenger of the Gods, was identified as the Greek Hermes, son of Jupiter and Maia. He was the messenger of the gods, the inventor of the lyre, god of oratory, conductor of the souls of the dead to the lower world, and patron father of the merchants.

As messenger, Mercury (mind and sensory nerves) utilizes the electrical energy of thought and the subtle nerve fluids created by Father Jupiter, the giver of all good things. Mercury stands for merchandise, wares or goods utilized in commerce or exchange by the mind in the body. As god of oratory, he refers to the mental power necessary to become a good speaker, one who voices the truth.

The reference to the lyre is to a very mysterious organ in the brain having that name and which is the real source of the singing voice. It is the positive pole while the negative counterpart pole is the place where sound is emitted or the vocal cords in the throat.

Mind, the father of thought, can actually rob the body by becoming the prodigal son as the Bible states, wasting its substance or merchandise on unhealthy living.

The grain and thought power or electricity constitute the true merchandise of every human body and the great work is to perfect it so that it will be able to attract the highest form of ether (Akasha) into the body. We become our own thieves when we make no effort to do this, stealing not only from ourselves, but from others as well (more explained on thieving the Spirit and body in Scorpio section). To rob another or one's self of this most precious merchandise is truly the sin against the Holy Ghost.

Death is the separation of Spirit from the body – there is insufficient material for it to work with or function through, its piece of real estate is of poor quality, its mineral or chemical formula is imperfect, so much so that it cannot support life. Hence it leaves.

However, when the chemical formula created by the Divine Chemist for the perfect man is complied with, then indeed will the great work have been accomplished.

The cerebro-spinal substance is thought material, creative manna, elixir of life, ambrosia of the gods, the Gold of Ophir and the treasure of the Kingdom of Heaven in the living body.

The mind (Mercury) can be capable of recognizing facts or their absence while is the chemical Mercury endowed with the same power. As an amalgam, it can separate gold and silver from other ores – truly releasing them from their bondage with impurities. So it is a solvent of metals analogous with that of the human body.

Gemini is a neutral sign, and the three others, Virgo, Sagittarius and Pisces, constitute the neutral harmonious or as the author names it, the purification cross. It is understood by astrology students that beginning with Aries as positive and masculine, every alternate sign is feminine. The author poses that every third sign is neuter (p. 88). The information which actually proves this to be true can be obtained by studying the nature and use of the four mineral salts which Dr. Carey allocated with them, namely: Kali mur, Silcea, Kali sulph and Ferrum phos. After carefully studying every point in each of the twelve chapters the reader may see the purification cross, the amazing story it tells is none other than that of purity, harmony and perfection – which is neuter.

The “twins” signify the higher and lower selves, or the Individuality and Personality on the mental plane. These are the two centers of consciousness in the soul for the higher and lower activities.

When the brain is chemically perfect, then Spirit, the individuality, manifests as such unhampered. When it is chemically imperfect it is cramped and chaotic. It harms the body and injures others intentionally or non-intentionally. A concrete example of this is the difference between the vibrations produced by a perfect musical instrument and one dilapidated and utterly incapable of producing anything but discordant sounds.

The vast majority of human beings come under the negative interpretation of Gemini. They are living in the lower mind. Gradually we will learn, through the suffering which inevitably results from misuse of the cerebro-spinal substance and electrical energy the great lesson which must be driven home to each one. The human potential is the transformation from the lower or “animal” man into a God-man with only the animal body it takes good care of.

In the Vedas, the Twins of the sign of Gemini are called "the Physicians of Heaven" which probably refers to the influence of Mercury whose caduceus is used as the official insignia of our army medical corps and among physicians generally. The negative inner meaning of caduceus is concerned with the fall of man and its destruction. The positive analysis is the plan for the rise or ascent of man, the return to the Father – which consummation is the at-one-ment – the mind forever manifesting harmoniously, benevolently, the Christ Mind. The body has been perfected, therefore there is no longer any antagonism, no mental chaos caused by mind – Spirit – searching for material with which to manifest. The Father now has sufficient Mother (mater-material) with which to produce harmony.

The bronchial tubes and lungs, the shoulders, arms and hands are under the assignment of Gemini. Some astrologers include the nerves as *all nerves are filaments. The author adds the skin and glands, remembering that all flesh is constituted of fibers or filaments.* These constitute the human garments.

The bronchi are branches which convey air to the lung cells which we may term twigs and leaves (on p. 92 author explains turning water of life into wine with oxygen, spirit of prana combining with the blood).

Every corpuscle (cell) is a water-air creature, truly a salt water habitant, a human fish. Truth is very simple and easily understood when the brain is in good condition for there is a clear and logical explanation for every problem. But the cerebral cells and other cells must be supplied with the proper mineral food, and kept free from acid accumulations and poison.

The fate or destiny of each individual depends on the extent and degree to which the Spirit in man is able to control, direct and manifest the threads of life through the cerebro-spinal nervous system. The electricity of life truly flows through them. The branching off of the nerves from the base of the brain, the formation of air passages and the growth of blood vessels and arteries to form the torso and extremities must be studied under Gemini.

Fibrin is a whitish substance from the blood and the serous fluids of the body. With the exception of the bones, *fibrin is necessary in the formation of the nerves, ligaments, veins, skin, tissue, all flesh. Potassium chloride is the spinning salt for it spins the threads from which the seamless garment of flesh is woven.*

Is the mind capable of towering like an impregnable fortress of strength against the blows of adversity and sorrow which sooner or later come to test each one of us? Do we find reason tottering and mental confusion resulting when difficult situations arise? Are we fearful and panicky, lonely, homesick and discouraged? Are we stiff, lame and rheumatic as the years go by? Do we find some symptom more or less constantly manifesting, until, finally, there is no mental or physical rest, and life becomes merely a painful existence, death at last coming as a blessed relief?

We were prodigal sons in our past incarnations; and in the depths to which we descended this silver became polluted. Mercury's wings were broken, dragged down by Saturn (heavy lead). It is strange that lead coagulates mercury and is the only metal having the power to do so.

Mercury is a true creature of the air – the height is its home. Gemini is an air sign.

Mercury is a symbol of Mind, free at last of all that would prevent its soaring into those realms where only pure Spirit is at home. When the brain is at last completely purified and perfected, which means that it is formed of the ultimate chemical atoms, this will be possible. Why do we delay the Divine Messenger on his journey back to Olympus (the high mind of cerebrum)? Perhaps we have not known before.

Mind expresses itself in the physical body through the cerebro-spinal systems.

All around us today we see energy wasted, substance lost. Humanity as a whole is floundering in chaos – a sea of emotion. Why was the symbol of the Lion allocated with Leo, way back in the morning of time? Why is it the only beast of prey symbol in the entire circle of the zodiac? Because it has to do with the process of Self Control...the taming of the beast in man, the Emotions which tear us to pieces and consume us.

As the positive mind, Mercury expands under the rapid vibrations (heat) of Spirit; as the negative, he is cold, congealed, stagnant.

“Physician, Heal Thyself – They That Be Whole Need Not A Physician”

Ferrum phos (Pisces salt) should be given with Kali mur, for the iron particles carry oxygen which becomes deficient when the proper balance is disturbed by the outflow of fibrin. Kali mur is a specific for children's disease as in scarlet fever, measles, chicken-pox, swollen glands, throat irritations such as diphtheria, tonsillitis, mumps, etc. Inflammatory rheumatism has to do with fibers or threads of flesh deficient in Gemini salt and the

need for more oxygen due to iron deficiency. The brain becomes congested because the blood is thick and circulation slow, causing it to feel due and heavy. One is unable to think clearly. The thread of thought is broken. *The basis of all fibrin is Kali mur.*

When the cell salts are put together - combined with the protoplasm formed by the cerebrum, they become organic which means put together.

Barring accidents, no one dies except from dis-ease, and even the former will be done away with as the cerebral centers having to do with intuition are perfected, for one will then be forewarned.

When the information embodied in the sign of Gemini is acquired, humanity will strive more and more to live positively, creatively and no longer destructively, thus dividing its "merchandise, the bread which comes down from heaven daily to feed it. *Mercury, the Great Physician, will at last fulfill his divine mission, which is to heal all diseases.*

Remember that the mind can heal and the fact that on the material plane, the cerebro-spinal system that is Mercury must also be sustained with the food corresponding to their own individual needs.

Chapter 4

The Analysis and Synthesis of CANCER & Calcium Fluoride

Physiologically this astrological period of time pertains to the breast, stomach and spleen. It governs expansion and contraction, elasticity and tenacity. It is ruled by the Moon (Isis – Egyptian name) whose expansive and contractile nature is expressed by the terms waxing and waning, and is the most fertile or *productive* of the twelve zodiacal signs. This silver orb is mistress of the night and the formation and fertilization of seed work is carried on undercover of darkness and with the utmost secrecy.

This is the house of the great mother herself since all things are nourished by her.

The breast, stomach and **spleen** are the main influences of Cancer sign.

Read: ***Your Radiation Blue Print and Your Minerals, The Real Function of the Spleen. The real story that astrology tells, that story concerns the understanding, purification, mastery and perfection of the human body and nothing else.***

Aries and Cancer must work on this square together. Conception (to take together, to hold together) has taken place. *When Calcium fluoride and Kali phos become very deficient there is an actual separation which takes place and it becomes extremely difficult to express one's self. When this happens people are at a loss for words. When conversing, they hesitate, repeat, and some minutes pass before they are able to state what they have in mind.* The electricity of thought is unable to flow freely along its natural grooves.

The great secret hidden in the sign Cancer is that of Nature's power to reproduce itself daily with the ceaseless formation of corpuscles (cells) within the spleen. It is by means of these corpuscles that the human body is kept alive, and daily recreated. The corpuscle is perfected in the spleen.

Aries, Cancer, Libra and Capricorn, the signs constituting the cardinal or creative cross, as "the gates of heaven," for they include the solstices and equinoxes.

Deficiency in Calcium Fluoride causes one to be forgetful. The treads or filaments of thought are not elastic.

When Cancerians are not well it is because they have never had sufficient corpuscles created by the spleen. They are under-nourished. In addition, they do not digest or

assimilate food well because of the fact ***that their greatest chemical deficiencies are calcium fluoride (Cancer cell salt) and Calcium phosphate, the Capricorn cell salt (Capricorn is their adversary sign).***

Chapter 5

The Analysis and Synthesis of LEO & Magnesium Phosphate

From July 22 – August 23 the Sun is transiting its own sign, Leo, therein he is lord of all. This sign is the only one in the circle of the zodiac having a beast of prey for symbol. There is a definite reason why the ancients assigned certain symbols to the twelve divisions of the Grand Man; for they allocated perfectly when their physiological correspondences are understood. *Knowledge of the body is absolutely essential to the study of astrology.*

In a Latin dictionary the etymology of Leo is "to blot out, to destroy, to annihilate. This is entirely in keeping with the nature of this animal. The basic interpretation of Leo is motion, energy manifesting in action, and the parts of the anatomy having to do with it are the heart and motor nerves.

The sign of Leo is largely in the month of August, the hottest period of the year, and the word literally means to bring to fruition, to make brown, to sun-burn.

August is derived from the Latin verb *augeo* which means to make, to increase, to fertilize. Farmers and horticulturists know that this is the period of the year when everything is ripened by the intense heat of the sun. Seed is perfected. *August also means imperial – very great power. The lion is termed the King of the beasts because of its very great strength and majestic bearing with high moral courage and self-control.*

Leo is the second fire sign (Aries, Leo, Sagittarius). Leo must work with Aries to create a harmonious relation because the energy which originates in and is sent forth from Aries comes to fruition in Leo. In other words, the former is the place of sowing while the latter – Leo – is the place of reaping.

Aries relates to the cerebrum and precipitates the spiritual electricity – the fire of life. This vital energy flows into the motor nerves, attracted by their magnetism and is utilized in Motion.

As the heart is a great mass of nervous muscular tissue concerned in dividing, lifting and

circulating the blood, it receives from the inner sun in Aries the divine fire, and utilizes it in producing visible activities as well as those unseen within the body. To work in harmony with Aries, Leo must use constructively all the energy generated in Aries.

Until humanity starts on the path of return, such is not the case, and here is where the negative interpretation of the lion applies perfectly, for a very great portion of mental power and the energy generated in the inner nucleus is wasted in e-motion – energy flowing out.

It is to be greatly regretted that at the present time (1932 she writes this!) there seems to be a movement on foot to discourage the teaching of Greek and Latin in our colleges, not realizing that these languages, especially Latin, reveal the meanings concealed in words. The study of Latin for a year or two enables one to catch automatically, as it were, the secrets hidden in them.

Leo does not deal with children as such, but with sexual passion, that emotion which is necessary for the procreative act. Animal heat, typified by the Sun in Leo is the means of procreation. So with sexual passion we find love affairs, amusements and speculation attributed to and analyzed under Leo.

It is interesting that Leo (the sign with the beast of prey symbol) is very difficult to present because the great mass of humanity is still concerned with living in the E-motion or destructive phase of this sign. For that reason they will continue to deny for some time yet that these Leo subjects are destructive. They should not be blamed or condemned because as one gathers experience, knowledge ultimately accumulates. We all members of one great family, children of the Great Creator, Architect and Chemist of the Universe. We are all on our way down and up the ladder of life.

Leo deals with the heart and motor system of the universe, and by analogy with those same parts in man. It is one of the four "agents" of the vital forces, the others being Taurus, Scorpio and Aquarius. The heart is a great pump and blood divider. The motor nerves are those white fibers which are magnetically capable of contacting the electricity generated in Aries, thereby producing motion.

Motion, then, is the mechanical, positive and scientific interpretation of Leo – not

E-Motion.

The color of the sign of Leo is yellow. The Sun creates the most powerful vibrations. The organs of the torso DO derive their life and power from that part of the body which is ruled by the Sun in Aries. This is the optic thalamus, the eye within the chamber, the "hidden Sun or electrical generator. By reflection, the visible physiological Sun is the Solar (Sun) Plexus. This great nerve ganglia broadcasts the energy received from the hidden sun (Aries) to the organs.

As King of Beasts on earth, it is used as a symbol to illustrate the fact that energy or power may be used to create (to give life) – guided by wisdom - and also to destroy life (not using the powers wisely) which can create a fierce and malignant enemy and hence for the arch-fiend himself. It must be understood that the term lion, as used in Sacred Scripture, stood for two diametrically opposed characters and conditions. One represented energy creating life and conserving or protecting it; the other, destroying it.

It is a fact that the gamut of emotions which human beings manifest from the cradle to grave results in despoiling and pillaging the entire glandular system and also in utterly demoralizing both nervous systems.

The optic thalamus is a most important nerve center, and many of the nerves of special sense have been traced to it. The optic nerve corresponds rather to a tract of fibers within the brain than to the other cranial nerves. The optic nerve is peculiar in that its fibers and ganglion cells are probably third in the series of neurons from the receptors to the brain.

"The eyes are the windows of the spirit." With most of us these windows are still covered with dust of our animal delusions (desires). We cannot see clearly for the cerebral substance has not yet been clarified and chemically perfected. When this at last has been accomplished, we will not "see as through a glass, Darkly," but the windows of our heaven shall be open, illumination will have been attained. The cerebrum will be as a ball of living fire.

Biblically we find that this eye may actually be consumed by grief, termed a Saturnine emotion. The lachrymal glands are over-stimulated by emotion and hence over active.

Intense grief, continuous over a period of time could drain away a large part of the cerebral substance or exhaust it so that it would cease to function. This may be one of the reasons why some people die of grief.

Sorrow has a contracting and crystallizing effect on the nerves and materially limits the supply of energy sent ordinarily to the solar plexus. The functions of all the organs are thus retarded. Particularly we find trouble arising relative to digestion, liver, kidney and bowel action.

If we study to live and perfect ourselves by doing the right thing, we will have no enemies and ill will for our desires and emotions will be balanced.

We find references to desires so consuming that the body is literally set on fire. The flames become as teeth to mutilate and consume the flesh. The blood becomes feverish and the heart labors furiously to circulate it as fast as the throbbing nerves demand; Is it any wonder that the sexual act causes a severe strain on the heart? It is common for death to result in its termination. No one can be in perfect health and die from heart failure as we so often read in the papers. It is a statement of such ignorance as actually to be silly. Any organ will suddenly give out when constant and undue strain is put upon it.

If the passions and emotions are controlled, creative energy and substance is free to return to the Father's house, the place of its inception. When they are not controlled, the contrary is true.

Aquarius and Leo are diametrically opposed signs, placed opposite each other in the zodiacal circle for the very good reason that they, as constellations, are found to occupy the same positions in relation to each other in the heavens. They represent the two ends of one pole of existence. Aquarius has to do with the Real Man, the regenerated being, while *Leo points out the struggle with the lion (the beast) which must result in victory or the crucifixion of the Son of man in us. Countless are the crucifixions constantly taking place!*

When Leo and Aries work in harmony (or in "trine") as their positions in relation to each other in the zodiac indicate, the electrical energy generated in Aries is utilized in a

harmonious and positive manner. *No energy is wasted when* one is mentally balanced. The physical and mental work accomplished is always constructive.

If we were living, like the Greek of old, close to the heart of nature, such personification of natural powers would be easier for us to appreciate.

The Curious Lore of Precious Stones, Frederick Kunz. Chrysolite (said to be Peridot) means golden stone, appropriate to adorn the car of the sun. He says golden yellow is the symbol of the Sun and Sunday. Of the seven ages of man, yellow typifies adolescence, a time when sexual passion is rampant and there is hope of offspring and happiness.

Mysticism: The Green Lion is the First Matter of the Great Work by E. Underhill. The hunting and taming of the wild, intractable lion, instinct with vitality, full of ardor and courage, exhibiting heroic qualities on the sensual plane allows Great Work to be achieved. The Green Lion in his strength and wholeness is the only creature potentially able to attain Perfection. Says one alchemist, *"The Green Lion is the priest by whom Sol and Luna are wed."* Sol (or energy) and Moon (material or substance) are finally united in the permanent or Heavenly Marriage "which no man can put asunder" (the true marriage within the Self). *The foregoing statement never meant earthly marriage. That it has been thus interpreted is only one more instance of the perversion of truth.*

By Green Lion is meant Undying Energy, ever-present and undiminishing life force; creative force undepleted.

Magnesium Ferro Silicate (or Magnesium Silicate) is the chemical term for chrysolite or peridot.

Leo is a symbol of the fifth period of the cycle of life on the astral plane wherein strong desire works in the lower nature through passion, instinct, appetite and animal affection. There are two diametrically opposed energies in Leo: magnanimity that represents the Lord; ferocity representing the devil that "like roaring lion walketh about seeking whom he may devour." Rev 5:5

A golden vestment is assigned to the Queen of Heaven, her sign of pre-eminence (Psalms 14:9 "Upon thy right hand did stand the queen in gold of Ophir – Virgin Mary).

Mr. Kunz states "the belief in the virtue of chrysolite to dissolve enchantments and to put evil spirits to flight was probably due to the association of this stone with the sun, before whose life-giving rays darkness and all the powers of darkness were driven away.

The self is born in the soul for its supreme illumination – enlightenment of the incarnate Self. This is the supreme moment in spiritual involution when potential perfection is consummated (last birth, and now and henceforth proceeds the fulfillment of the Divine nature, which through the Self is brought to realize itself.

The all-wise Architect and Chemist of the universe created and uses magnesium to produce motion. It is said that that which is incapable of being moved or of moving becomes useless. This is true of the body when Magnesium phosphate becomes very deficient. Spasms result.

Acid attacks Magnesium with ease and is the reason why excruciating nerve pain results, when acid is present in the system for a long time. This condition is hastened and intensified by lack of Silicea which is nature's insulating agent.

Epsom salt is a combination of sulphur and magnesium which has cleansing properties. The blood cannot utilize Epsom salt as its effect is to irritate vascular surfaces calling them to give up their fluidic content.

All nerves are threads or fibers, and hence their basic material is Kali mur or chloride of potassium, the spinning salt. Sensory impulses from nerves produce motion. Magnesium phosphate combines with certain fibers to make the white or motor nerves.

Magnesium and Ferrum (or iron) work together to produce motion as no motion can be produced without energy so Ferrum is necessary in order to bear energy.

Iron carries oxygen, and oxygen carries iron; without them both, life could not exist for one moment in any body, animate or inanimate. Pythagoras states in his *Turba* "Great is affinity between Magnesia and Iron."

Mother Nature, working in the human body, lets her wants be known by producing a feeling of discomfort. Health is ease of mind and body. Dis-ease is the absence of ease.

Deficiency of Magnesium phosphate causes some very curious and striking symptoms. When particles of this salt become very deficient, there is a disturbance in the fibers of nerves and muscular tissue, and their action is no longer rhythmic. Spasmodic action results. Symptoms are as follows: cramps in the limbs, fingers, neck, in any part of the body; lock jaw, spasmodic coughing, *sneezing*, choking, crying, laughing, hiccough.

This is the only true spasmodic remedy, and when taken in very hot water, very soon brings relief. It is also the specific remedy for pain.

Angina pectoris is a very painful symptom which calls for large doses of this salt. Neuritis and neuralgia also indicate a need for it, but others salts are required in addition.

All heart and motor system troubles call for Magnesium phosphate. It is suggested by the author that where Calcium in any one combination (or all three) is deficient, Magnesium should also be included because there is a special affinity between it and Calcium. Whenever a person's chemical plan calls for Magnesium, Ferrum should also be taken because they need each other. There is never a condition where there is no call for Ferrum since it is the attractor of oxygen in the body, the means of purification and the great healer.

Now, let's analyze E-motion. E-motion is to flow forth, to go out from. The mind and body are concerned with Motion. E-motion implies disturbance, waste or loss of that which produces motion. Any skilled mechanic will agree. Each and every part of a machine is constituted of substance, and it must present. Either no energy or power manifests, or it comes and goes, is spasmodic in its action.

Emotion is the spasmodic action of energy. The balance point (more in Libra chapter) is when the body and brain are balanced. Contracting emotions include fear, sorrow, worry, etc. The entire nervous system gets "tied up in a knot." The solar plexus, that great receiving and broadcasting station for the torso, instantly contracts, resulting in none of the organs receiving sufficient energy. The supply of electricity is at once limited.

In a balanced body, the heart neither beats with fear nor moves spasmodically or furiously from sudden joy or the passion of so-called love. *Love is EASE, balance,*

harmony, for it is UNDERSTANDING of the LAW, hence the living of the law.

As a result of the impulse of joyous emotion, the brain strives to generate and liberate throughout the body an extra amount of energy. It is known that joy has been known to kill, and this is proof of the sudden and intense strain brought to bear on nerves imperfectly supplied with material. They can snap. *So all emotions – put a strain on the nerves and heart. This is physiologically true.*

Chapter 6

The Analysis and Synthesis of VIRGO & Kali Sulph

Virgo has had many names among nations and peoples. She is Isis, wife of Osiris; June, wife of Jupiter; Venus of wife Mars; Ceres, wife of Zeus; Mother of Christ. Early Christians symbolized the Holy Ghost (Water of Life from the pituitary gland or Isis).

The color of Virgo is "greenish-yellow" – the first half of the sign being yellow and the last half green. Yellow-green of the spectrum zodiac falls exactly over Virgo.

Virgo is the oldest purely allegorical representation of innocence and virtue. In India, Virgo was mother of the great Krishna.

In astrology Virgo is interpreted as The House Of Health for no one possesses health until the body is in a pure, unadulterated state, and until all the synonyms used to interpret the word Virgin are manifested.

To be perfect is to be pure, unadulterated. Adulteration means "some of the original elements are missing." And until we become true virgins – until we are no longer adulterated – we are and will continue to be "unlucky."

We are very slow in learning what God's laws are relative to mankind, and extremely so in interpreting them correctly.

Many years ago the author made the declaration to herself that she wanted Truth, Facts, and did not care how much they hurt. If her idea or opinion of a thing was wrong, then she wanted the correct explanation. She was never satisfied until she had found it.

No one accepts truth until he or she has been forced to do so by means of experience gained through suffering. There is only one right and perfect method to gain health, happiness and peace (this sounds like me, BDK!).

Until humanity as a whole turns its attention from the science of attention to the science of attaining and preserving health, it will indeed be difficult for any great number to be interested in anything but opinions.

It is true that the law of God (good or ultimate perfection), is that of continence. But until the triune being, animal-human-spiritual man attains to perfection (purify – the original state) by ridding himself or herself of all that pertains to the animal, he or she is not keeping that law.

Purification deals with all stages and degrees of loss. It cannot be otherwise. The minimum loss, when correctly analyzed, really pertains to the fall of man into degeneration. Is it not true of the average person that he or she is well past middle life before even diet is considered?

Let's analyze sexual desire which causes so much of human degeneration. The animal has its seasons when, from instinct, it prepares to perpetuate its kind. It does not seek to cohabit because of love of sensation, as does humanity. *The detrimental effect resulting from man's fall into generation became intensified a thousand-fold by this perversion, caused by the hypnotic power of the sensation created by the act. Thus humanity became almost hopelessly enmeshed in the coils of this serpent of desire.*

The beguilement of sensation results in the loss of life energy. A study of the revelations of this remarkable sign, Virgo, will solve the problem of religion. It will at the same time answer the question relative to the real purpose of astrology.

As Virgo is the sixth sign in the natural zodiac, it has to do with sex or creation, but on a plane higher than any zodiac before this sign.

Virgo is an earth sign, female, but barren, but the author proposed that Gemini, Virgo, Sagittarius and Pisces are neutral signs, naming them the purification cross.

In ancient times, Virgo was allocated with the solar plexus and bowels. This plexus is the abdominal brain and therefore a matrix or womb. It is barren to carnality and represents barren earth. But *it is indeed fertile to spirituality from the source of its name, Virgin.*

The solar plexus lies directly back of the stomach and consists of a group of twelve different nerve ganglia that branch off from it in all directions. It is the largest of the three sympathetic plexuses. For more info on these ganglia, see *Gray's Anatomy*.

The solar plexus is the seat of feeling and sensation. That old expression, "I love you with all my heart" is really incorrect. When real or pure love, which is the only feeling worthy of being called love, permeates one's being, it is the out-pouring of the Spirit.

The solar plexus is always deficient in power until the cerebrum and cerebellum are perfected. It is both a receiving and a broadcasting station.

Related to the bowels, when there is "running off" of the bowels, there is a very serious deficiency in the Scorpio cell salt of Calcium sulph.

The human body possesses two lenses. The one in the cerebrum which focuses light vibrations impinging on the brain from above into the optic thalamus center, is the upper, and the celiac ganglia of the solar plexus is the lower.

The free woman is Virgo, and no human being is ever "free" until he or she has attained virginity. Therefore, slavery still exists and will, for many years.

NONE is healed until WHOLE or HOLY. No one can heal another. Each one must do it for himself, just as Scriptures state.

Virgo is the Phoenix, which when resurrected, again becomes man's hope of immortality. The Virgin: symbol of the purified emotion, or purified lower nature, no longer fructified by the desire-mind. Virgo stands for involution, the indrawing of forces.

A Divine element, a spiritual quickening, is required for the evolution of anything God-like in our mundane sphere; it is a Virgin Birth. It signifies the completion of the process of involution resulting in the one perfect matrix of Matter fully permeated and informed by Spirit, ready to bring forth the qualities and the Christ in many souls during the subsequent six periods of evolution. Christ, the Archetypal Virgo who brings forth, as Mother Matter, all things during evolution.

Dr. Carey allocates with the sign Virgo with Kali sulph or sulphate of potassium. It is the maker of oil itself, the quintessence, last or highest essence or power in a natural body; pure and concentrated essence.

The real Christos is not accomplished until the chemical formula of the body is that of the perfect or Christ-man. The Lamp of the cerebrum will not become spiritually illuminated until the spinal oil is sufficiently refined.

Oil is truly a fuel, a solvent, a lubricator and purifier for man's body, known well by the ancients. *In old age, the human body is very low in oil and hence looks dry and shriveled, skin, hair, intestinal tract and bones all require their full quote of oil. The fluid of the lymphatic glands (termed lymph), must have sufficient oil.* When present, it gives the fluid a beautiful opalescent color.

Potassium is the essential alkali of the animal body, and this is true of the human body. In combination with sulphur it forms oil or Kali sulph. It is said that the bodies of sheep contain a huge quantity of this salt, which may be the reason why mutton fat is supposed to possess healing qualities. Sheep excrete a very great quantity of potassium.

Virgo, the Virgin, which creates the Lamb of God "Which taketh away the sins of the world." Sin means deficiency, and also disease.

The human body must possess sufficient Kali sulph to enable the solar plexus to create its perfect health.

Chapter 7

The Analysis and Synthesis of LIBRA & Natrium Phosphate

The name Libra is Latin for pound. Pound is the unit of weight for the scales.

Physiologically, Libra has to do with the kidneys, adrenal glands and bladder which constitute the last of the vital organs and the first half or vital part of the body. There are no vital organs in the parts corresponding to the last five zodiacal signs.

Libra is ruled by Venus. Venus is charm, attractiveness and sensual love. The ancients applied the characteristics of Libra as bright, shining, glittering, splendid; also handsome, trim, elegant.

Venus tends to lead one into excesses. Venus energies tend to despoil – to rob – a thing which LOVE could never do. Cupid means desire, and cupidity is derived from the same root. It means longing or covetousness. The arrows of Cupid never fail to produce wounds.

The female seeks the male and will continue to do so until accumulated experience with all types eventually proves that mental and physical balance will never be attained by this means. The mind becomes literally UNbalanced with sexual indulgence. Light – the light of reason, intelligence and intuition will be restored to humanity when sexual indulgences cease.

To become balanced mentally and physically, the passions must be held in check, held in leash. Mental and emotional equilibrium, balance and harmony are the challenges of Librans.

There is a trinity of divine creative sexual organs in the head as well as in the PROcreative organs in the torso. "As above, so below."

Natrium phos or sodium phosphate is the cell salt for Libra. It is a balancing salt. ***It neutralizes acid which is an all pervading evil. Its great function is to change acid to alkali.*** Those having acid are almost constantly craving something.

Natrium phos releases water from the tissues, collects it in its little tubes or cups in the kidneys and then drains it into the ureter which carries it to the bladder. All the organs having to do with collecting urine have to do with Libra.

Sodium increases the flow of urine and renders it, at the same time, less acid. When sufficient Natrium phos is used the urine will become alkaline.

Since sharp, cutting, disagreeable and unattractive are the negatives of agreeable, pleasant, attractive, charm, beauty and loveliness, the attributes of the purified Venus will be readily seen.

To be in a balanced state, the proportion of water must be constant, neither too much or too little, and the corpuscles (cells) truly may be drowned in acid fluid. Therefore to scale the heights and gain the balance, Venus must bid her son Cupid throw away his darts. The sign following Libra, that of Scorpio, tells the story of the dart or the scorpion's sting.

"Balance, measure and patience, these are the eternal conditions of high success."
Matthew Arnold in Celtic Literature.

Chapter 8

The Analysis and Synthesis of SCORPIO & Calcium Sulph

The sign Scorpio has been allocated with the organs of procreation, and that their use is solely for procreation. They have a specific function the same as the stomach, liver, spleen, eyes and other parts of the body.

Scorpio has had many names, the giver of fire to man is one. The torment produced by the sting of the scorpion was likened to the burning of lightning. It was called the River of the Snake. The electrical fire manifesting in lightning is analogous to the fire of life which leaves the body at the termination of the sexual act.

The largest nerve in the body, the great sciatic, rises from the sacral center, and not only sends important branches to the sexual glands, but other nerves branch to the knees and extremities.

The sexual excess of self-abuse, not only actually impairs the activities of these nerve branches, but also can result in paralysis. Therefore, five-twelfths of the human body is directly and constantly deteriorated as a result of sex-life, in addition to the indirect effect on the other seven-twelfths. The extremities become less and less active, the limbs stiff and lame, the back bent, and one appears old even if not.

The sex act not only steals energy from the five divisions of the body represented by the extremities, but slowly and surely reacts on the brain in exactly the same way.

Most people know practically nothing relative to the body and its functions (and yet it truly is the most valuable possession they own! Strange are human beings, says BDK!). Both the body and brain deteriorate slowly or quickly according to the extent of the sex life. Degeneration, generation, regeneration – these are the three stages in the lives of the triune being – animal, human, Spiritual human being.

Degeneration means that one cohabits solely for the sake of pleasurable sensation. Generation means to generate, to become parents, therefore to engage in the sexual act, solely that a child may result. Regeneration means that there is no longer any

thought of sex, therefore the act is not indulged in. The body and brain are not robbed of any of their corpuscles. Therefore they attain the highest stage of efficiency.

The Scorpion and its sting has been known from ancient times as the Angel of Death; is said to be the slayer of the giant-man, but the White Eagle is its esoteric symbol, and is emblematical of the Divine promise of life everlasting to "him who overcometh."

In Revelation it refers to "the old serpent which is the devil." Ignorance (hence sin or wrong doing) is the negative interpretation, while wisdom is the positive. "Be ye wise as a serpent and harmless as a dove." Matthew 10:16.

Each individual has life after life in which to make good, incarnation after incarnation. Our many lives in which the Spirit returns, again and again, into a new baby body to learn to build constructively, are analogous to school days. The pity is that we have all been so slow in learning.

Mars rules Scorpio and Mars was born to labor from the heights. Mortals have dragged him down into the mire and filth. Mars is actually subject to Minerva, the goddess of wisdom, for only she is capable of forcing him to keep his place on the heights.

Mankind must become self-redeemed. This will be accomplished through knowledge of Self. The disciplined qualities of the soul, which possess the power of the Christ – the love of goodness and truth – within them, are able to overcome the lower desires and emotions and the power of the lower principle.

"Knowledge of truth" is the result of experience induced by suffering. It is the effect on the body, as well as the mind, that eventually causes a person to cease doing a thing that causes suffering. Thus, chemical, physiological, anatomical and astrological information are absolutely essential.

"For we must all appear before the judgment seat of Christ; that everyone may receive the things done in his body, according to that he hath done, whether it is good or bad."
1 Cor 5:10

Chapter 9

The Analysis and Synthesis of SAGITTARIUS & Silicea

Sagittarius relates to the higher mind and anatomically to the hips and thighs. It is concerned with the formation of the first blood vessels. Jupiter is its ruler. It expresses incessant equilibrium, will power and supremacy. It is the third and last of the fire triplicity (Aries, Leo & Sagittarius). Its symbol is the Centaur that holds a drawn bow, and points an arrow upward. This sign also deals with religion and law.

In Greek mythology, Jupiter or Zeus, was born on Mt. Olympus, and when an infant, was concealed in the island of Crete in order to save him from following the fate of his other brothers and sisters. There he was nurtured by the nymphs and fed on milk of the goat. At maturity, Jupiter was chosen Sovereign of the World at the council of the Gods. The name signifies the radiant light of heaven. In Classic Myths, we find that "he was the supreme ruler of the universe, the wisest of the divinities and most glorious.

Bodily strength and valor were dear to him and to him were sacred everywhere the loftiest trees and the grandest mountain peaks. He required of his worshippers cleanliness of surroundings and person and heart. Justice was his; prophecy was his; and his special messenger was the eagle.

Juno was the wife of Jupiter, and the most worthy of the goddesses, queenly, golden sandaled and golden throned. Glorious beyond compare was her presence.

Jupiter's power to draw all the gods to him clearly indicates the higher mind as the inevitable conqueror of all lesser powers, and their enthronement on high. He is truly Osiris of the Egyptians, and with Juno, or Isis, dwells in the Garden of Eden. Jupiter is the River God, for he stands at the head of the spinal river Euphrates or Jordan. The ancient Greeks considered him the divine personification of heaven itself, and the hurler of the lightning rays of thought. Jupiter was analogous to the Almighty Father.

It is evident that all nations and peoples have their sacred Scriptures which deal with the most intimate secrets. When these are studied and analyzed, they are all found to be identical.

Jupiter is interpreted positively as largess, abundance and generosity, "the giver of all good things," nobility of character, true worth, simplicity, modesty and creative ability. If one truly lives in his own sanctuary, abiding in the secret place of the 'most High," he has no real need to enter any church constructed by humans. Negatively associated with prodigality, wastefulness, overbearing, sharp and fault-finding in speech.

Jupiter can hurl thunderbolts from Mt. Olympus, the home of the gods. Thunderbolts are truly arrows of thought.

In this age and time, both religion and law have become so perverted that the truth behind both has been almost entirely obscured. The correct interpretation of sacred and secret writings is now beginning to be demanded. Humanity is commencing to realize that it is responsible for its own salvation, and must therefore look around, and endeavor to obtain the plan of the process.

Cuneiform inscriptions designate Sagittarius as the Strong One, The Giant King of War and the Illuminator of the Great City. As the body of the "great city," it is evident that the Higher Mind, typified by the Centaur, is its illuminator. The Centaur is analogous to creative energy.

It is a physiological fact that the eyes which are "the windows of the Spirit," are directly connected to the cerebrum, the optic nerves actually being considered extensions of the cerebral substance itself. When this substance is clear as crystal (quartz or Silicea) then will thought correspond, for no foreign particles will obstruct the view, and the mirror of mind will be without dust to confuse its reflections – Spiritual Light.

He who lives in the Higher Mind is insulated from all danger. The crystal-clear heavenly essence reflects without obstruction, Intuition is keen and clear-cut. He judges instantly and accurately. The arrow of thought flies straight to the mark. The arrow of intuition cuts one entirely off from all that is base, unclean and unworthy. The Higher Mind is the bridge over which each one must cross to enter into "paradise.' The Higher Mind is Pegasus, the horse, clothes with the wings of the eagle. In the words of Shakespeare, "Mount, eagle, to my palace crystalline!"

Biochemistry teaches us that sharp, clear-cut mental processes are impossible when Silicea

is very deficient. A full supply of iron must be present in the blood in order to attract the Spirit-containing oxygen into the circulation, and to oxygenate the brain cells, the importance of these two salts in all mental activities must be emphasized.

Chapter 10

The Analysis and Synthesis of CAPRICORN & Calcium Phosphate

The Sun has now reached the southern "gate to heaven," from whence it must make ready to ascend. It is the goat, Capricorn, waiting at the foot of the mountain to begin its long climb.

January is derived from the Roman word Janus, who was an ancient Italian deity. "He was the god of all beginnings and took precedence of all other gods. He presided over the beginning of human life, or the day, of the agricultural year, over gateways and openings."

As Saturn is the ruler of Capricorn, its negative interpretation is Satan, who stands in the doorway of the Temple. He is the tempter who endeavors to stop those who would enter therein. Those who aspire to enter the sacred places causing the aspiration. They will succeed in effecting an entrance if Satan is unable to make them "look back."

Janus is pictured as having two faces looking in opposite directions. One face is that of an old man; the other, that of a youth. Therefore the necessity for the double doors of the Temple, for one opens into the future, while through the other one may still gaze into the past. One must decide which he will do. If the past lessons have been sufficiently severe, the power of the tempter will have on one is able to look in utter astonishment at the figure standing there. It has absolutely changed – it has taken on the form and features of the Christ. Transmutation has been achieved, and one has at last entered into the "straight gate which is straight. Enter ye in at the strait gate, for wide is the gate that leadeth to destruction, and many there be which go in thereat; "because strait is the gate, and narrow is the way, which leadeth unto life, and few there be that find it." Matt. 7:13 and 14.

Capricorn is at the lower end, the entrance, while at the summit, or mountain top, is Aries. The body of fluid at the bottom is that of procreation; the body of fluid at the top is that of creation and recreation. It is obvious that one who seeks to recreate himself, aspires to fall into the lands of the Lord and not into the hands of man.

Each must work out his or her own salvation. It IS work!

Humanity is not “bound” or in the clutches of any unseen being called Satan, but is hypnotized and enthralled by its passion for sensation.

Saturn is said to withhold from a person the result looked for, or desired, when that person has not earned it. It is also said that Saturn will pour into one’s lap the fruits of legitimate work. But it must be forever realized that Saturn demands the very last farthing of what is due. When it is supplied, one is free of all bonds and restriction, for there is no longer any danger involved.

Without the vibration termed Saturn, in Nature, nothing could HOLD together. Cohesion would not exist. Saturn binds, and therefore, limits within a certain radius, in order to create stability. This implies support, a foundation. Saturn himself, stands for labor and the FRUITS of that labor. Saturn is within each one, and each must find what is materially lacking.

Calcium phosphate is Saturn’s own particular material. One of its three special uses is to form the bones constituting the framework of the body. Saturn, then is the MASTER MASON.

The true interpretation of Freemasonry is, that it is a physic-chemical process which will ultimately result in the metaphysical life. This, and this alone, is the TRUE SCIENCE OF CHRISTIANITY. Matter is teeming with life, and life cannot manifest without matter. The knees are intimately associated with Saturn. One of the branches of the sciatic nerve ramifies to each knee, and reflex action is absent when the sacral center has become partially paralyzed because of sexual excesses. The work knee is “janu” in Sanskrit, and analogous to Janus and January. This is the reason for the knees being associated with Capricorn.

Saturn stands for truth, stability, honest values, honor and integrity. Where TRUST does not exist, there can be no stability.

The backbone is the support of the body, but its strength and condition is, we may say, a barometer or gauge by which the mental and moral status may be judged. The quality of the oil in the spinal canal corresponds to the general health and purity of the body,

and the anointing oil is the Christ consciousness.

Capricorn is the house of spiritual conception, and so Spiritual birth will be in Libra, meaning that balance is attained.

Education along all lines, desire for SELF-improvement and an honest effort toward right-living are absolutely essential factors for normal conditions. One must possess knowledge of the chemistry of life.

Dr. Carey allocated Calcium or lime phosphate to Capricorn. The body requires more of it than any other mineral for the reason that a very great quantity is required for the bones along. Saturn rules the bones. They are the OLDEST parts of the body for they remain intact for long years after the flesh has disappeared. Not only is this salt essential to the growth and well-being of the framework, but it forms the skeletal part of every cell. Limestone and mortar (mucus – albumin vitamin) constitute the foundation stone of the body, the same as of any structure.

Any deficiency in lime results in excess mucus vitamin or albumin for the latter has become non-functional. Excess mucus is the cause of colds, the so-called "germ" for which science has so long been searching. A cold is Nature's method of housecleaning – she eradicates the mucous. Those who over-eat, and consume large quantities of mucus-making foods, frequently have colds.

From lack of Calcium phosphate, mucus collects in the tonsils, thus causing them to enlarge. The tonsils should not be removed, for the true use of this salt with Silicea (the surgeon) will eventually bring about a normal condition.

The cause of goiter is not lack of iodine but Calcium phosphate. Iodine is not a constituent of the body, nor is hydrochloric acid. Both are irritants. Chiropractic manipulations and massage are very helpful because they stimulate the circulation.

All the 12 chemical elements of the blood are alkaline. In addition, Libra salt, Natrium phos, or sodium phosphate is especially furnished in order that humanity may have some means of neutralizing the acid made by wrong eating, indigestion from worry, etc.

When the digestive fluids are starved in this salt, it is utterly impossible to digest any food even though it contains Calcium salt. It first has to be released by digestion. Therefore, if the food is not digested, it is not released, and the only means of obtaining it is to take the Calcium Phos tablets. This is a great mistake made by many interested in the study of food chemistry esp. those who claim that the right kind of food and proper diet will cure anything. *The nature of Calcium is an absolute necessity to proper digestive fluids.*

Only by means of astrology are we able to become cognizant of the relationship existing between the Macrocosm, or body of the universe, and the body of man. Thus we are at any time able to discover in what part of man Nature's forces are acting or operating, and just what effect is being produced. This also explains the presence and nature of epidemics.

In Dr. Carey's *Biochemic System of Medicine* he states: "Phosphate of lime (calcium) is destined to play a prominent part in the treatment of the sick, when its range is understood by medical practitioners. This salt works with albumin, carries it to bone tissue or to any part of the body where it may be needed. It uses albumin vitamin as a cement to build up bone structure.

Bone is 57% phosphate of lime (Calc phos), the remainder gelatin, an albuminoid, gluey substance, natrium phosphate, magnesium phosphate and sodium chloride.

Re: semen – there is more Calcium in the procreative fluid than in the blood itself because it is the chief building material and was NEVER CREATED TO BE THROWN AWAY – TO MAKE NOTHING OF (Taoists are wise)

A Janus who "looks back," wastes his Calcium, but also the Janus who looks forward – who aspires – builds his Temple of God on Living Limestone. The great Pyramid of Gizeh is an age-long memorial of this fact.

Sir Thomas Vaughn: "Prithee, what madness binds you, when WITHIN NOT WITHOUT YOU is all that you seek outside instead of within you."

Chapter 11

The Analysis and Synthesis of AQUARIUS & Natrium Mur

Following Janus (January – Capricorn) is a cleansing or purification of Aquarius or February. When the sun is transiting Aquarius, the moisture in the air is released and precipitated in the form of rain. The releasing Sodium sulphate vibrations in the Sun's rays offset those of the retaining Sodium Chloride vibrations in the air. No more water can be retained, the saturation point has been reached.

The Sun's course through each sign is definite and unalterable, following an established geometrical plan. Madam Blavatsky states that "the whole expanse of Heaven was called the 'Waters of Space' or the 'Celestial Ocean' which very likely comes from the Vedic Varuna personified as the water god. The Titans were analogous to the rays of the Sun, hence creative power. Greek mythology gives an account of the struggle or war between the Titans and the children of Kronos (Saturn), which is analogous to the everlasting contention going on today between the lower mind and the Higher Self. It is indeed one of Titanic proportion.

John 3:5, "Jesus answered, Verily, verily, I say unto thee, Except a man be born of water and of the spirit, he can not enter into the kingdom of God."

In the human body, Aquarius, physiologically and anatomically relates to the saline solution of the blood, and also to the ankles. It likewise pertains to the last two vertebrae of the sacrum and the first coccygeal vertebrae. There is a relationship with the calves and ankles. The saline solution of the blood and to the vertebrae is the result of much research.

Aquarius is the symbol of the heavenly man, the Son of Man, holding an urn from which the water of Life is pouring upon earth. The nature of the man is essentially heavenly – the LIGHT is being disseminated – etheric waves shortened, thus producing more powerful currents. The urn in the hand of Aquarius is Saturn. In astrological lore, Uranus and Saturn are co-rulers of this sign.

Sodium chloride is responsible for the circulation or distribution of water in the human organism due to the chemical action of the molecules of sodium chloride.

Sodium chloride does absorb water, but it is not its first or basic nature. *Its true nature has the power to attract water, therefore, actually to draw it to itself – to become one with it. This is true of the Spirit, the Light within the darkness of human ignorance.*

The vibrations of Aquarius possess powerful virtue, influence and efficacy; they alter the air and the seasons in a very strange and secret manner. Leo, the beast, is at the opposite end of this pole. In truth are the Divine Man and the animal man antitheses of each other – one positive, the other negative.

The color of this sign is a kingly one – “blue blood” or “royal blood.”

Natrium mur has the power to increase vitality and re-vitalize those who are weakly deficient. Nat. mur is by nature a catalyst.

As Aquarius is concerned with the Heavenly Fluid, not only watery but fiery.

Temperance and self control are the watch words in life. *Abstinence from liquor is important because the poisons change the temper, the nature of man at once (fire water).*

The clarion call of Nature and Nature's God to mankind has now gone forth. The Son of Man in man demands his own, and will no longer be denied. *His cry is, "Cease torturing me, cease drying up the River of Life with products of fermentation. Cease wasting!"*

The body is being poisoned with toxic products of fermentation, the result of overeating and wrong diet. It is no wonder that the alcohol within the human body cries out for company. Few realize how they handicap themselves in this way. They actually create the temper within their own bodies. Alcohol is a poison because it is not a Natural constituent of the human body. Let us improve our brain cells instead of doing that which injures them daily. Liquor must go. It is the definite working out of a law. This cannot be done in a generation. It cannot be done until a sufficient number have suffered enough from the effects of the use of liquor, and until excessive eating ceases. This is why gluttony is given as the first obstacle to entrance into the kingdom of Heaven (harmony-health).

Anything that is in any way detrimental to the creation of the New Man will slowly but

surely be removed. The consciousness of man must expand. His head must be lifted up, he must see the Sun, the stars, the light, at last.

To be capable of looking up, to be able to endure the brilliancy of highly vibrating colors, we must stand on our own feet, physically as well as mentally. Thus a clear brain, a clean and active liver, and a strong heart are absolutely necessary.

Gluttony, drinking, drugs and sexuality are degenerating and devitalizing. We are dealing with physiological facts, not ideas or opinions.

Aquarius deals with friends, and the best friend is the Spirit of God within. Our hope is in Heaven, the Holy of Holies within the cerebrum, the place of potential light and peace, the home of the Spirit.

For the Man Regenerate is always the transmutation of the 'water' of his own Soul into the Wine of the Divine Spirit" (The Perfect Way).

As 97% of the physical body is watery or fluidic, a large quantity of this salt (Nat. mur) is always required in order that the physiological functions may proceed as they were originally intended. The body must be flushed with water in order to carry off the waste products. *When sodium chloride contents of the blood becomes very low, the brain becomes disorganized. In whatever part of the body circulation is very slow (determined where Saturn's position), either insufficient or excess fluid will be noted.* When too little fluid is present, the brain tissues become dry, and one suffers from insomnia.

Many of those deficient in Nat mus (very frequently those born when Sun is in Leo) either do not care for water, or are unable to retain it long after drinking it. This is easily explained by the fact that the cells of the body do not contain sufficient sodium chloride particles to attract water. When it enters the stomach, they are not present to seize upon and carry it around and distribute to the parts requiring it.

When a sufficient number of Natrium mur particles are present, their call for water manifests in thirst, and constitutes a decided chemical pull.

The human body slowly becomes parched and dry when this much-needed salt diminishes

in quantity. The brain fluids decrease and this organ and gland becomes unreceptive to any downpour of heavenly "dew" (Spiritual prana).

Mineral is MOTHER, and Spirit (energy) in Nature, and in man, is unable to manifest without it.

Chapter 12

The Analysis and Synthesis of PISCES & Ferrum Phos

Those born when the Sun is transiting the sign of Pisces have the solar plexus for their weakest organ.

In astrological lore, Pisces is said to pertain to the feet, physiologically, and is concerned with the following matters: enemies, prisons, hospitals, limitations, the sea, water and all places of confinement. There are many old manuscripts in existence dealing with astrology, no modern work on astrology has given the esoteric meaning of this sign or explained WHY it has to do with prisons, hospitals or place of confinement, etc.

The author makes clear that analyzing the world march, it is derived from the Latin work "margo" meaning boundary, confine, border, edge, limit, attainment, mark or extremity. Each of these interpretations supplies a vast amount of information relate to this sign.

Pisces is the LAST sign of the zodiac and marks the point or boundary where the circle of life is cemented together. It is Life Itself. "And God breathed into man the Breath of Life and he become a Living Soul."

Dr. Carey allocated Ferrum phos (or iron) to Pisces b

Cause it is the inorganic salt required to attract oxygen into the lungs.

Metaphysically, Pisces relates to "understanding. When the understanding is active, one can travel far mentally. In Pisces, we find the gauge by which all life is measured, the mental, moral and physical standing or development. It is the "mark (peg) which indicates the stage or place which one has reached on his journey.

Says madam Blavatsky, *"Only one in 999,999 is really engaged in the GREAT WORK, that of endeavoring to become PERFECT."*

The three decans (or equal thirds) of Pisces represent respectively "Degeneration," "Generation," and "Regeneration." Therefore, when a life of degeneration is indicated, it is obvious that no ideal, no mark, no goal of attainment is considered. There is no foundation, no moral or physical stability by which, and on which, a strong, enduring, permanent structure may be erected. Instead of a mart or goal, it is The End Of Life.

Astrological lore informs us that Pisces stands for the End Of Things.

Pisces is interpreted as confinement. This is because it is analogous to the deep, the bottom, the pit. When the depths has been reached, one is obliged (if life remains in his form) to place the feet on the first rung of the ladder, to raise the consciousness to look up.

The word "march" means to set out. This refers to a great mystery, for there are two journeys which may be considered. One is inevitably chosen. The first is the setting out of the Spirit into physical manifestation, from the realm of the invisible. Orders are received to enter again into the material body, and begin the "March Of Life" once more – to begin again the work of building a better vehicle.

The combined vibrations produced by the planets in certain positions, are the means whereby the Spirit is once more drawn to earth. *The previous form or instrument used in its last incarnation, is the means of deciding what the next must be. For the work must be taken up where it was left off. Nothing else is logical. Another school day has begun, and there are lessons to learn.*

Thus from the realms of the unseen the Spirit prepares to manifest again, entering the arterial system of the mother through the breath. Unless the reincarnating Spirit is present, conception cannot take place, for what is true of spiritual conception and birth is also true of physical conception and birth; the only difference being that one is on a higher plan or level. In Matthew 1:18, is the expressed fact that the Spirit must be present.

Oxygen enters the arterial blood via the lungs and is the miracle at the marriage feast when Jesus turned water into wine. Pisces, then, stands for the end of a cycle of Spiritual existence "beyond the veil," and the entrance of the spirit into a new body. (It also refers to the fact that the Spirit leaves the body at death. Breath ceases – no more oxygen enters the blood through the lungs. The Spirit which held the mineral particles together (the matrix or nucleus of each cell) departs, for it has not been supplied with sufficient material to enable it to remain).

"For the life of the flesh is in the blood; for it is the blood that maketh atonement for the soul." Lev. 17:11. When all the mineral elements which constitute chemically perfect blood are present in the veins and arteries, the blood is in a state of at-one-ment and therefore is able to make atonement for the soul, which is the sum total of the etheric fluids, those of nerves and glands.

Disease (lack of at-one-ment) or deficiency (sin) is the cause of death. The goal of each incarnation is to recognize the importance of perfecting the human experience into the Divine. Reincarnation will take place again and again until the task is completed.

How little the majority think.

In fact The Creator made laws relative to right living; and when they are disobeyed, the physical and mental processes deteriorate, the intake of vital electricity decreases and death inevitably results.

Man breathes easily, *freely, fully, unconsciously*, when there is no deficiency in iron (Ferrum). God (Spirit) in him does the breathing. One never thinks of breath until hampered by insufficient iron. When this remarkable salt is very deficient, it naturally follows that the air pressure ON the body far exceeds that within. This causes a feeling of oppression or depression. The psychologist is unable to explain the cause or to offer assistance in eliminating this symptom. To call it a "complex" buries it literally out of sight. Without biochemistry it IS too "complex" ever to be solve.

Neptune is the positive ruler of Pisces. It represents the rate of vibration which alone is capable of performing true Piscean work. Neptune is the highest and finest force in the universe.

Neptune is the special ruler of the arterial blood. As earth-shaker, he causes convulsions of nature.

The spiritual inspiration of God in man, gives spiritual power and physical life. The word inspiration means *to breathe in*. Iron attracts oxygen, in which is the breath of life, that which elevates, lifts up, inspires.

The true cause of cancer is that the fluid of the body becomes depleted in iron, the corpuscles (cells) slowly suffocate, and eventually putrefy. Without iron, combustion cannot go on. Kali sulph and Ferrum are the legitimate cure for this putrid and virulent disease.

One is weak, low-spirited, discouraged and disheartened when the iron content of the blood is low; and strong, high-spirited, energetic and *alive* when the blood is well supplied. When the natural quota of iron is in the blood, and hence in the cells of the brain, one is not upset by anything. One does not become angry with another. The feelings and emotions are not aroused to fever heat.

Without a proper balance of iron in the blood, health cannot be sustained. When deficiency in this cell-salt occurs, the circulation is increased, for the blood tries to carry enough oxygen to all the tissues of the body with the limited amount of iron at hand, and in order to do so much move more rapidly; exactly as seven men must move faster in order to accomplish as much work as could ten, moving at a slower pace.

The molecular disturbance of deficiencies in iron molecules soon breaks up the continuity of other cell-salts. A deficiency in potassium chloride (Kali mur) nearly always follows a deficiency in iron.

As far as colds, Kali mur, Calc fluoride, Kali sulph, Calc phos, Silicea and Ferrum phos are all deficient.

A lack of Ferrum phos is always required, no matter what other deficiencies are indicated because iron is the means of the healing spirit entering the blood.

The youth of the world are utterly dissatisfied with the interpretations of religion and law (Sagittarius), with educational methods (Gemini) and so-called medical science, health and hygiene, labor and employment conditions, subtle caste differences between rich and poor (Virgo), and with morals (Pisces) and the wholly inadequate and entirely perverted explanations relative to them which have been given in the past. They have scrapped them all, and are making a new start. They are learning for themselves by means of experience, as they go along.

Nature's God communes intimately with those who live close to her, those endeavor to find out what her laws are, and to obey them.

Proverbs 13:14 "The law of the wise is a fountain of life."

Fascinating Additional Info From This Book

The Caduceus – borne aloft by the hand of Mercury is used today as the symbol of healing by the American and British medical corps, but who can say how many of its members have even the faintest conception of its real meaning.

The word caduceus is derived from the verb cado, meaning “to fall.” The whole story of the “Fall” and “Rise” of man is contained in it, for the winged pole represents the cerebro-spinal system; the pole, the spine, and the two wings are the two hemispheres of the brain or the Tree of Life, while the two serpents twined around it are the right and left sympathetic systems, the Tree of Knowledge of Good and Evil, and also the two thieves.

E-motion – means a waster of motion, a lack of conservation. All unnecessary motion constitutes waste, and when the nervous system is so depleted that there is no control over it, one is said to be uncontrolled or carried away by emotion. Where perfection exists no emotion will manifest, and by this is not meant spasmodic control, but harmony. One does not need to exclaim, to weep, to shout or to jump about to express what one thinks – but the eyes and face can express deep sympathy and understanding.

The word “Healing” – has not been understood, for it means to be made whole, perfect, entire. The human body is the only machine which has the power to rebuild itself daily, and will do so when the needed material is supplied. There are many more references in Sacred Writings to manna, dew, honey, nectar, ambrosia, food of the gods, elixir of life, sacred Soma juice, Amrita – all referring to the creative esse or brain substance.

Mind cannot function without a brain, and the mind is not formed unless the necessary material is present it will at last be understood that both Spirit and matter are absolutely necessary in order to accomplish healing.

Spirit brings with it the photographic plate of its existence in its former physical body as it impregnates with its Spirit the ova which is at the same time being impregnated by the animal spermatozoa.

The presence of oxygen, hydrogen, nitrogen and carbon in the body depends entirely on the presence of the twelve minerals. For example, the presence in the body of oxygen depends entirely on the Ferrum or iron content of the blood. It is the chemical

attractor of oxygen and is its only means of entering the body.

Re: X-rays or radium – to heal from – all three forms of potassium salts are needed; Kali phos, Kali mur, and Kali sulph along with Ferrum or iron phosphate so there will be plenty of oxygen for the fire of purification.

Potassium is truly the food by which the gods or gray matter are nourished. The sensory nerves are the wires connected with the great generator of electrical energy, the cerebrum, the house of God or Aries. These ramify throughout the entire body, supplying electricity whereby all of its work is done.

p. 69 opinions of many naturopaths, dieticians that the mineral tablets of cell-salts used to supply blood deficiencies cannot enter the blood or be utilized. This is untrue. Though the salts are inorganic they are changed chemically with fluidic materials.

Potassium feeds the gray matter of the brain as it nourished the spirit in that brain. Potassium in all its combinations, is a conveyor or medium of life or lire; for fire is life, and life is Spirit.

p. 70 **Nervous symptoms** – the nerve-fluid has been exhausted from any cause, the phosphate of potassium is the only true remedy, because nothing else can possibly supply the deficiency. The illness from too rapidly consuming the gray matter of the brain cannot be overestimated, and if all who are inclined to nervous disorders would carry Kali Phos with them, in cell-salt form, a large amount of sickness and suffering would be prevented. Let the overworked business person take it and go home good-tempered. Let the weary one take it and note how quickly the equilibrium is restored and calm and reason return. It is furnished in vegetables, fruits and grains, but so many of our foods have been grown in deficient soils. So the cell-salts can easily be supplied to remedy deficiencies...the only law of cure.

p. 71 **How Disease Is Eliminated** - Supplementing a moderate diet of natural food, simply prepared with the different kinds of salts which each individual requires day after day, month after month, year after year, is the actual method by which disease is eliminated and the blood kept well nourished. There need never be any deficiency.

Salts are taken to build up a good body so that symptoms cannot arise.

p.72 If our chemical needs are supplied we will ripen, physically and spiritually, but continued deficiencies in "the dust of the earth," result in the other unattractive and

undesirable condition.

In the **Gospel of Buddha**: "But to satisfy the necessities of life is not evil. To keep the body in good health is a duty, for otherwise we shall not be able to trim the lap of wisdom and keep our minds strong and clear." Truly does Kali phos, or phosphate of potassium feed this lamp. It is the vehicle of consciousness.

p. **78 Pine tree and Pine cone** – The fir or evergreen tree which from time immemorial has been used as the symbol of the Tree of Life.

The pine cone has been employed as the symbol of the renewal and hence continuity of life. This wonderful and so-called mysterious gland in the head is the creator and renewer of life. The cerebrum is truly a mine in which is cloistered that most precious of all substances which has always been likened to gold.

p. 81 **Deficient material for Nature to work with and a general toxic condition constitute the reason for physical and mental dis-ease and inharmony.**

p. 82 **We should ever seek to know this cosmic mother of ours**, to work understanding with her. We could accomplish marvelous things if we could only work with her.

p. 93 Demogorgon was said to be the **genius of the soil or earth**, fabled to be the life and substance of plants. He was depicted as a little old man with moss who lives underground.

p. 98 Explanations of Mercury with Gaia (Mother Earth), the caduceus **on the cover of this book**

p. 113 The irrefutable evidence of the original and fundamental purpose of astrology to reveal the secret of life, death and immortality in and of the flesh.

p.127 Through **astrology** we may become cognizant of the relationship existing between the Macracosm or body of the universe and the body of man. In this way we discover how and where or in what part of man Nature's forces are constantly reacting. We begin to realize, then, that when powerful planetary forces impinge upon that part of the anatomy of the Grand Man known as Cancer, Calcium fluoride is tremendously active; and if in that part of the body of man its essential salt, calcium fluoride is not present in sufficient quantity to set up the same rate of vibration which is the perfect

health ration, then dis-ease manifests. One is not then working with nature, but against her.

Chemistry tells us that each element has a fixed and definite combining power, and that the arrangement of the atoms is of as much importance as their kind and number. The old philosopher doubtless was familiar with chemistry when he said, "**God geometrizes and forms man and the universe by number and geometry.**" **The earnest student of astro-biochemistry certainly realizes the truth of this statement.**

p. 135 **The Pineal & Pituitary Glands:** the pineal and pituitary glands in the head (Aries) are the male and female creative and re-creative glands whose office is to rebuild our bodies daily; while the procreative glands (Scorpio) are used destructively by the majority of humanity today, instead of for the purpose of which they were originally intended during one period of our evolution.

p. 142 **the men who made the allegories were proficient in physics, chemistry, astronomy, etc and clever in allegory, but for some unknown reason their descendants became stupid, knowledge as well as wit deserted the race.**

p. 143 **Apollo** brought the warm spring and summer and the blessings of harvest. He warded off dangers and diseases of summer and autumn; he healed the sick. He was a patron of music and poetry. He was founder of cities, a promoter of colonization, a giver of good laws, the ideal of fair and manly youth – pure and just god, requiring clean hands and pure hearts of those that worshipped him.

p. 148 **The middle course is safest and best.** We must attain equilibrium, we must become balanced, perfect. The chapter on Libra, the Scales, must be studied to clarify this thought.

p. 149 *The Curious Lore of Precious Stones*, Frederick Kunz.

p. 153 *Mysticism: The **Green Lion** is the First Matter of the Great Work* by E. Underhill. The hunting and taming of the wild, intractable lion, instinct with vitality, full of ardor and courage, exhibiting heroic qualities on the sensual plane allows Great Work to be achieved. The Green Lion in his strength and wholeness is the only creature potentially able to attain Perfection. Says one alchemist, "The Green Lion is the priest by whom Sol and Luna are wed."

p. 157 There is never a condition where there is no call for Ferrum since it is the attractor of oxygen in the body, the means of purification and the great healer.

p. 170 The **sole purpose of astrology** is to furnish mankind with the astro-chemical plan for its physical and mental regeneration. As the body and brain improve, intuition will quicken. Then one will know intuitively when to take a journey, follow safe paths and never be subject to injury. No advice will be asked of another. The study of chemistry, anatomy and physiology will eventually result in the fulfillment of the old injunction, "Man, know Thyself."

IF the translators of the Scriptures had not interpreted of the Scriptures things as persons or parts of the body as geographical locations, the age-long perversion of religion would not have occurred. The *Bible* is a mass of scientific facts relative to the Body of Man as well as the universe.

p. 171 *The Tarot of the Bohemians* by Papus – one of the best books on the tarot.

p. 173 The **Holies of Holies is the optic thalamus**

p. 190 There are endless shades of thought, and the mind is colored according to the chemical condition of the brain. **When purified and perfected, it is crystal clear.** It is exactly like a diamond, its myriad facets reflecting all the beautiful colors of the rainbow.

p. 197 **The first fifteen degrees of any sign pertain to the left side and to the middle line of the body while the last fifteen degrees extend from the middle of the body to the right side.**

p. 286 **Astrology:** Only by means of astrology are we able to become cognizant of the relationship existing between the Macrocosm, or body of the universe, and the body of man. Thus we are at any time able to discover in what part of man Nature's forces are acting or operating, and just what effect is being produced. This also explains the presence and nature of epidemics.

p. 292 The **letter M** is both feminine and masculine, or androgynous, and is made to symbolize WATER, the great deep, in its origin. Explanations about Divine wisdom,

Minerva, Sanskrit, Mandala, etc.

p. 299 **All nations and people possess, in their literature and Sacred Scriptures, the same allegories and myths found in the Bible so they refer to the same concepts.**

p. 310 **Stone meal** – balance soil (Menderth, Inc – Wheatsworth)
