

## **ATTACHMENT D:**

### **ENERGY REQUIREMENTS**

All MIH awarded new construction projects must build to the below list of minimum prescriptive energy requirements. Rehabilitation or conversion of existing structures must meet these requirements to the greatest extent possible, including replacement of any components.

1. Attic insulation – R49 except for vaulted ceilings
2. Wall insulation – R15
3. Footing insulation – R10 to footing depth
4. AC – 15 SEER
5. 95% of all lighting must be high efficiency
6. Gas furnace – 90% AFUE
7. Heat Pump - 8.5 HSPF
8. Windows - .33U factor or lower
9. Caulking/sealing of all penetrations to the exterior or unconditioned space required (wire and plumbing penetrations, ceiling registers, vent pipes, etc.).
10. All provided appliances, if available as such, must be Energy Star labeled.
