Changing children's worlds; inspiring, exploring, learning

Linear Assessment Grids

Linear Assessment at Brackenfield

- Brackenfield School provides education for children with cognition and learning difficulties
- After the statutory reporting of P Scales ceased to exist Brackenfield recognised the need for an assessment system that could be easily understood by both staff within the school, parents and external parties
- Brackenfield also recognised that there was a need for a common language so that conversations across settings could happen easily
- Due to slower rate of linear progress that children with LD often make it was also necessary to be able to track small steps of progress and to easily identify gaps in knowledge and understanding

Brackenfield Levels

- Brackenfield Levels are based on age equivalences. The assessment system has been based on the EYFS age bandings and the end of year and end of key stage expectations from the National Curriculum.
- In order to set the content of the levels we used the EYFS framework for B1 to B15. Post level B15 used the National Curriculum end of year expectations.
- The 4 Lifeskill Areas are based on the Preparation for Adulthood guidelines.
 The lifeskill subjects specifically focus on teaching the functional skills that our pupils will require in later life. For some, this means equipping them with the skills to make simple but nutritious meals or to maintain good hygiene; for others it might mean creating a CV or catching a bus independently.
- Each level is the approximate equivalent of 4 months development in a neuro-typical child. Brackenfield Levels currently ranges from B1 to B33; so 4 months old to 11 years age equivalency.

Linear Assessment at Brackenfield

In order to systematically and objectively assess linear progress we use Brackenfield Levels in the following areas:

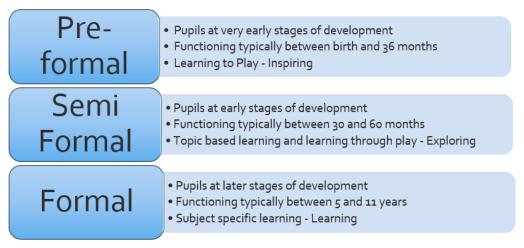

- Literacy Reading
- Literacy Writing
- Numeracy
- Communication and Language
- Expressive Art and Design
- Physical Development and PE
- Good Health (Lifeskill)
- Independent Living (Lifeskill)
- Community Participation (Lifeskill)
- Employment (Lifeskill)

Curriculum

Our curriculum is designed with the understanding that each pupil will have unique starting and destination points. Our curriculum structure has 3 broad levels:

The three levels of curriculum complement our Pathways. The model is based on the work of Dr Penny Lacey and Peter Imray at Swiss Cottage School (Challenge Partners, 2017).

Curriculum Construction

All pupils access a broad and balanced curriculum; subject offer is designed around a pupil's stage of access.

onths)	Curriculum Content (subject areas)

Bespoke Systems

- The grid in this example is bespoke to Brackenfield
- We operate 4 Monitoring Evaluation and Review (MER) Windows in a school year so our system is divided into 4
- If you're school runs a different assessment cycle we can adapt the grids to suit the needs of your school
- We can also change the content to be suitable for your school

For more information please contact cpd@brackenfield.derbyshire.sch.uk

Assessment at Brackenfield

- Linear Assessment is not the only measure of progress
- Brackenfield School measure progress in many ways in order to provide a contextualized and well rounded picture of a child's progress and areas of strength and need.
- We recognise that some of our students, due to their complex needs, may never developmentally acquire certain skills; i.e. they may not progress in a linear manner; therefore we also assess progress laterally. Lateral Progress is concerned with the refinement and strengthening of skills over time (Sissons, 2018).
- If you would like more information about our whole assessment system (linear and lateral) fit together please contact us at cpd@brackenfield.derbyshire.sch.uk

"teaching learning and teaching how to overcome the barriers to learning"
