FRONT OF DISPLAY

KIT FEATURES AND BENEFITS

Extend or renew the life of any full-size trailer by purchasing an ADDCO ALS Display RETRO KIT. The basic kit comes with a completely populated aluminum display case. Each kit has 3 lines of 8, 18" LED characters, a new wire harness, and new photocell.

Optional components include NTCIP sign controller, EXPro Hand Held Terminal, modem, radar, solar charge controller, A/C charger, MyAddco web based remote management sign control software.

The sign face is made up of extruded aluminum that slide together providing a sleek design and more importantly, in the inevitable event when the sign gets hit or damaged you can replace sections, instead of a large one-piece case. On the front of the sign, each line has a polycarbonate sheet that slides into place allowing for easy access for repairs

2-year warranty on electronic components manufactured by ADDCO.
