

# Glass Enhancement and Protection and Glass and Stainless-Steel Maintenance Products

# Glass Enhancement

Hollen Industries is proud and excited to offer our Glass Enhancement product along with our Glass and Stainless-steel maintenance program.

Our Glass Enhancement Product known as Diamon-Fusion is designed to be used on any glass or silica-based substrate. However, we believe that it is best suited for three main areas of any building:

- Hard to Clean areas as it will reduce cleaning cycles
- Areas with high touch or exposure to either people or environment
- Areas that need antibacterial and mold resistance.

# What is Diamon-Fusion

Diamon-Fusion is a patented two-step hydrophobic protective coating for glass and other silica based surfaces which enhances the performance of the glass or silica based surface it is applied too.

Learn more at  
[www.dfisolutions.com](http://www.dfisolutions.com)

Diamon-Fusion was established in 1997.  
Currently Diamon-Fusion has been patented or has patents pending in 120 countries around the world

# Benefits of Diamon-Fusion

Diamon-Fusion gives a full breath of enhancements, savings and environmental stewardship.

## Environmental Stewardship

- LEED Certified points for new commercial construction
- Reduces use of harmful cleaning chemicals
- Reduce use of water (less cleaning cycles)

## Savings

- Reduced cleaning cycles
- Reduced labour cost as makes cleaning easier and faster
- Reduce the need for harsh and expensive cleaning products

## Enhancements

- Enhances brilliance of glass by 20%
- Increases deflection strength up to 10 times
- Extension of glass life by reducing chances of staining, discolouration and degrading
- Graffiti proofs your glass product
- Provides an antibacterial surface

# It's a Proven Product

Diamon-Fusion is the only product of its kind that has scientific testing completed that proves their claims. Hollen Industries is happy to provide these papers to you for your review should you be interested.

In addition to the science, we know it's important to hear what the people have to say:

I was impressed with DFI's ability to restore several high-profile windows at the West Marine HQ, which had been badly water-damaged from concrete leaching. After they treated the glass with Diamon-Fusion®, the windows looked good as new and are now very easy to clean." – **Erick Taylor**, West Marine Management Supervisor

"I am very impressed with DFI and looking to incorporate more Diamon-Fusion® coating projects across the campus... **I have cut my window cleaning by 50% and saved \$12,000-\$14,000 per year** since Diamon-Fusion® was applied to our windows." – **Brian Worley**, Director of Facilities & Campus Services at Claremont McKenna College

"The Academy's experience with DFI has been very positive. The end product is everything I was told it would be resulting in **lower labor and material costs**. In fact, the custodial staff commented 'I don't know what you did to the glass but we like it!'" – **Jock Young**, CAS Facilities Manager

# Glass and Stainless-Steel Maintenance Products

Hollen Industries Ltd Glass and Stainless-steel Maintenance program is made up of unique products which change the way you maintain your property.

## **Stainless-Steel Defender**

DFI Stainless Defender is our Stainless-Steel protectant. Once applied the product goes to work and assists in reducing cleaning time. Enhancing the stainless-steels appearance and eliminates the need for harsh cleaning agents or expensive polishes.

## **DFI Clear Fusion Pro -**

This product, like its big sister, offers many of the same benefits but in a one step process. The product is ideal for a wide range of silica-based products like Mirrors, Glass Tables, Porcelain Sinks, Toilets, Granite Countertops, Food Guards just to name some areas.

# Glass and Stainless-Steel Maintenance Products

## **Glass Rescue and Restoration Powder**

These two cleaning agents represent the ability to clean most silica-based product. The easiest way to describe them is that the Restoration Powder is the light duty cleaner and the Glass Rescue is the Heavy duty cleaner. These products allow you to restore rather than replace water stained, degraded silica surfaces and once brought back to “like new, can be protected” huge saving cost savings over replacement

## **DFI Revitalizer**

Hollen Industries also provides you with the DFI Revitalizer. This product works to support all Diamond fusion products. This product allows you to monitor the performance of their other products and if any should be not performing to there highest capacity then this product is designed to help restore the full capacity of the product it is used with.
