ON DEMAND DESIGN & PRINTING STUDIO

We can be your design team or seamlessly coordinate with existing in-house teams to bring your vision to life!

Our Services at wolakdesignstudio

GRAPHIC DESIGN

We provide clients with professional and creative solutions to their marketing vision. We supply only the highest quality of creative and innovative designs with a fast turnaround to meet our client's business needs. We focus our designs not only on the aesthetic and brand positioning elements but also on the marketing and technical needs of each project.

PRODUCT PACKAGING

Product Packaging is the first thing potential customers see when looking at your product and plays a critical role in shaping the first impressions customers have of your brand. Studies found that 94 percent of first impressions are design-related and one-third of consumer decision-making is based on packaging alone. With our 25+ years of experience creating innovative and quality designs let us help you bring your product to market!

3D RENDERINGS

3D Renderings bring your product to life! They are an essential component to market your product even before it is produced. We provide detailed, realistic renderings that are higher quality, faster to receive, and more economical than professional photography. Perfect for e-commerce sites.

PRE-PRESS SERVICES

Our Pre-Press service reviews final artwork and copy and sets up files to be print ready on the appropriate dielines/templates. We can then print the project with our top quality vendors or send your files to your selected printer. We will review and approve final proofs for optimal results.

PRINTING SERVICES

We specialize in a wide variety of printing processes and printed materials. We partner with top quality vendors, either domestically or internationally, to find the best prices and quality on custom labels, shrinks, cartons, displays, marketing materials, etc. We review and approve final proofs and make sure deliveries are made on time.

TURNAROUND**

Our Industry Advantage

Wolak Design Studio works closely with the product development company, DermaCare Research Labs, and the product formulation and testing facility, SBR Labs, to provide innovative and OTC monograph compliant designs and packaging. We also have relationships with multiple vendors across the U.S. and abroad to provide the highest quality packaging, printed materials, product components, and displays.

We are committed to our client's satisfaction. We understand that listening to your needs and marketing strategies makes all the difference. Positive word of mouth is our best advertising. Contact us today to see how we can help you bring your concept to reality!

DESIGN PROJECTS & SERVICES

Wolak Design Studio offers **free quotes** for all design projects, 3D, pre-press, and printing services offered.
