

Jeunetique Pn Pro

Advanced skin rejuvenation & hydration
with polynucleotides, hyaluronic acid,
and peptide complex

**Restore a youthful
glow, smooth fine lines,
and enhance your
skin's natural elasticity
with this powerful
formula!**

**Revitalize your skin
with Meamo labs
Jeunetique Pn Pro,
the ultimate
skinbooster for
rejuvenation
and deep hydration.**

What is Meamo labs Jeunetique Pn Pro?

Meamo labs Jeunetique Pn Pro is a cutting-edge skinbooster formulated to provide intensive rejuvenation and hydration for the face.

The key ingredient — **polynucleotides (PN)** — works to regenerate and repair skin at a cellular level, promoting a firmer, smoother, and more youthful appearance.

Enhanced by **hyaluronic acid**, **ultra-short peptides (USP)**, and **niacinamide (vitamin B3)**, this formula delivers comprehensive anti-aging benefits, improving skin texture and elasticity while addressing dehydration and fine lines.

**Lose 15 years
in just 4 sessions!**

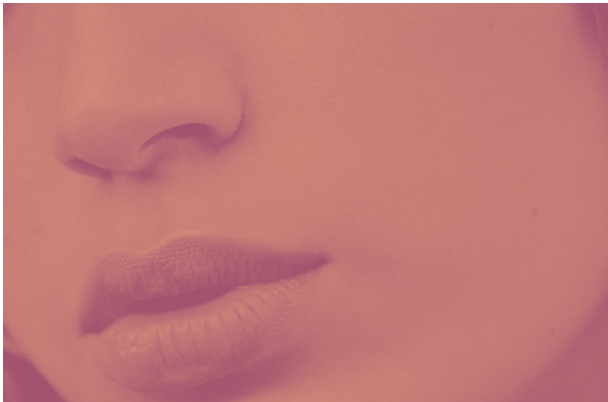

**When can
Meamo labs
Jeunetique Pn Pro
help?**

Effectiveness of Jeunetique Pn Pro

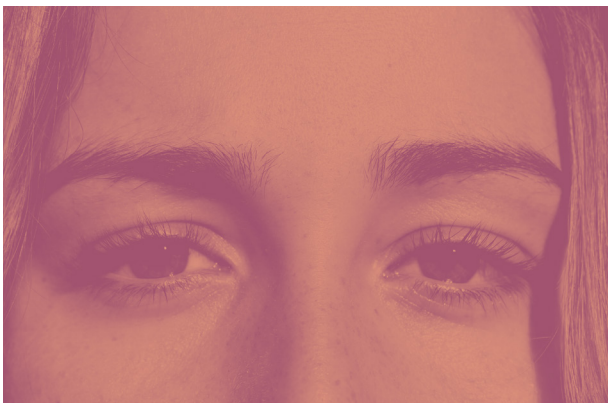

● REGENERATION

The high concentration of PN stimulates the formation of new fibroblasts, which accelerates the renewal of the collagen framework, making skin smoother and more elastic.

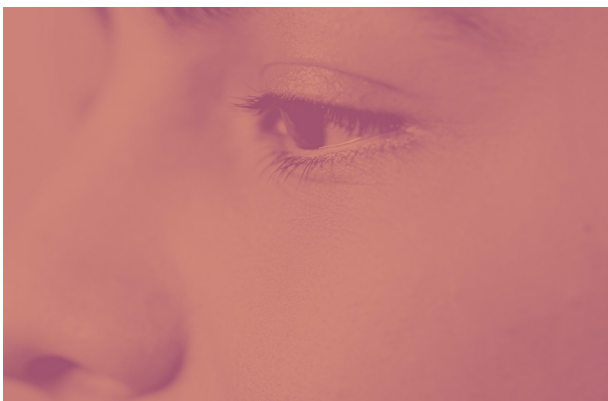

● SMOOTHES SKIN TONE AND TEXTURE

Jeunetique PN Pro eliminates redness and pigmentation, reduces the appearance of acne scars, and shrinks large pores.

● EFFECTIVE AGAINST WRINKLES

Jeunetique PN Pro smooths fine lines and makes medium and large wrinkles less visible.

● REJUVENATION

A course of Jeunetique PN Pro eliminates sagging soft tissues and replenishes their lost volume.

Synergy of five components: What Meamo labs Jeunetique Pn Pro contains?

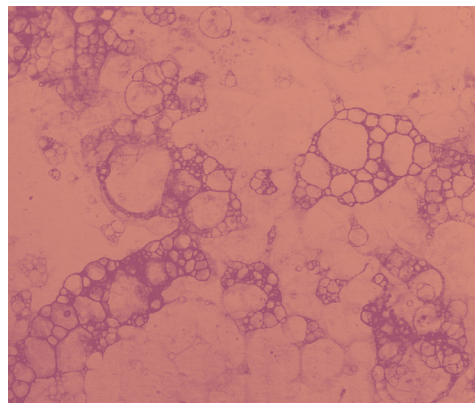

Polynucleotides

Extracted from salmon gonads, these DNA molecules promote cell regeneration and stimulate fibroblast activity, accelerating the formation of a new collagen matrix for firmer, more youthful skin.

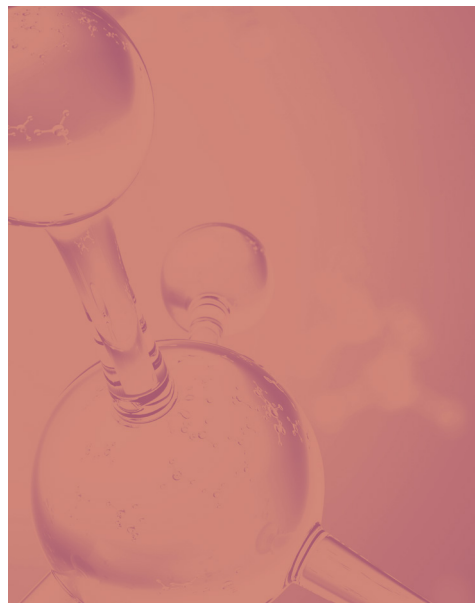

Hyaluronic Acid

A naturally derived skin filler, hyaluronic acid is crucial for deep hydration, helping to restore moisture and improve skin elasticity.

Ultra-Short Peptides (USP)

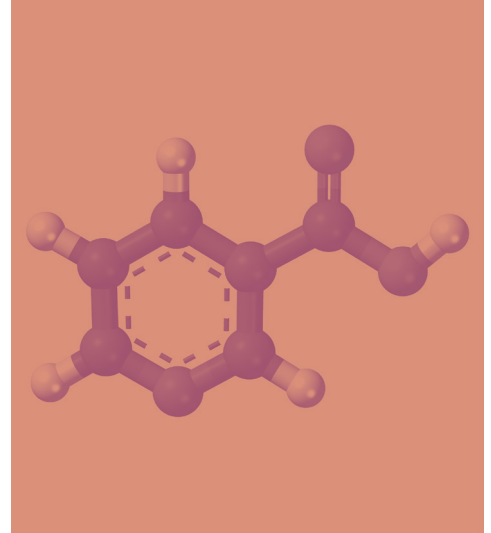

These small protein chains, containing no more than 6-8 amino acids, include Tripeptide-1, which is known for its regenerative and lifting properties, promoting smoother and more lifted facial skin.

Synergy of five components: What Meamo labs Jeunetique Pn Pro contains?

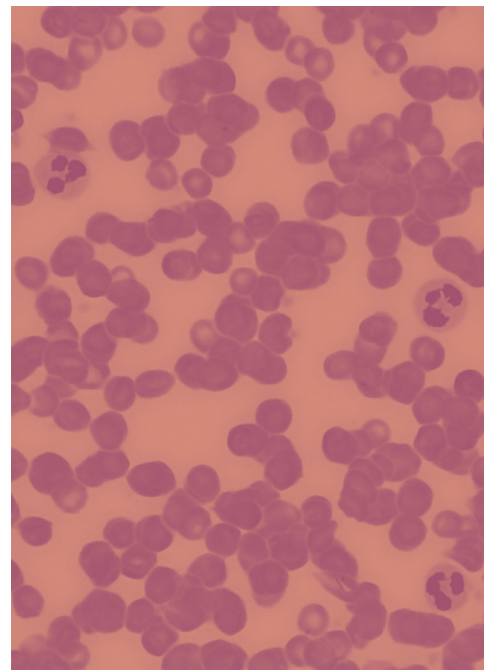

Niacinamide (Vitamin B3)

Vital for overall skin health, niacinamide enhances skin texture, improves the appearance of pigmentation, and supports the strength of nails and hair.

Cellular Growth Factors

A blend of EGF (epidermal growth factor), FGF (fibroblast growth factor), IGF (insulin-like growth factor), and PDGF (platelet-derived growth factor) that work synergistically to support skin repair and regeneration, helping to restore vitality and radiance.

PDRN vs. PN – What's the Difference?

Polynucleotides (PN) are an enhanced form of PDRN, derived from the gonads of salmon rather than sperm. PN offers several advantages:

1.

More viscoelastic

Forms a longer-lasting porous structure, providing structural support in the skin.

2.

Stronger fibroblast activation

Stimulates collagen production more effectively than PDRN.

3.

Improved anti-inflammatory properties

Reduces inflammation more efficiently.

4.

Broader application

Ideal for skin rejuvenation across various anti-aging treatments.

European Quality of Raw Materials: Why Meamo labs Jeunetique Pn Pro is Superior to Other PN Skinboosters

Meamo labs Jeunetique Pn Pro stands out as a premium skinbooster thanks to its unparalleled quality and effectiveness. The polynucleotides and hyaluronic acid used in our formula are sourced from **HTL Biotechnology**, a renowned French company. This collaboration ensures the highest standards of purity and quality for the raw materials in our product.

- What makes **Meamo labs Jeunetique Pn Pro** even more exceptional are its innovative features:

1.

Enhanced Metabolic Processes

Our formula improves the metabolic processes within dermal tissues, promoting a complete renewal of both the cellular and extracellular matrix. This helps to rejuvenate the skin from the inside out.

2.

Collagen Regeneration

Meamo labs Jeunetique Pn Pro stimulates the formation of a new collagen framework, significantly reducing the appearance of fine and medium wrinkles. The result is smoother, firmer skin with a more youthful appearance.

3.

Ultra-Short Peptides

These peptides play a crucial role in combating skin ptosis, helping to lift and tighten sagging skin, further enhancing the skin's texture and firmness.

- With these advanced features and the use of the highest-quality ingredients, Meamo labs Jeunetique Pn Pro delivers superior results, making it the ultimate choice for skin rejuvenation.

How Does Meamo labs Jeunetique Pn Pro Works?

How Does Meamo labs Jeunetique Pn Pro Works?

Meamo labs Jeunetique Pn Pro combines advanced ingredients that work synergistically to rejuvenate and regenerate the skin. Here's how each key component contributes to the overall effectiveness of the product:

Polynucleotides (PN)

Polynucleotides, a purer and more concentrated form of PDRN, activate **adenosine A2A receptors** and initiate the **nucleotide "salvage" pathway**. This accelerates the formation of new fibroblasts and boosts the synthesis of endogenous collagen. Through in vitro and in vivo studies, it has been shown that PN promotes skin regeneration and enhances the skin's ability to repair itself, providing stronger and more effective regenerative properties compared to PDRN.

Ultra-Short Peptides (USP)

The action of ultra-short peptides is **epigenetic**, acting as signal molecules that regulate gene activity. These peptides influence the synthesis of functional proteins, such as collagen, and inhibit the degradation of elastin. **Tripeptide-1**, in particular, is effective in reducing wrinkles, combating hyperpigmentation, and stimulating collagen production. Additionally, by penetrating into the underlying muscle layer, USPs have **a local myorelaxing effect**, for which they are called "Botox-like peptides".

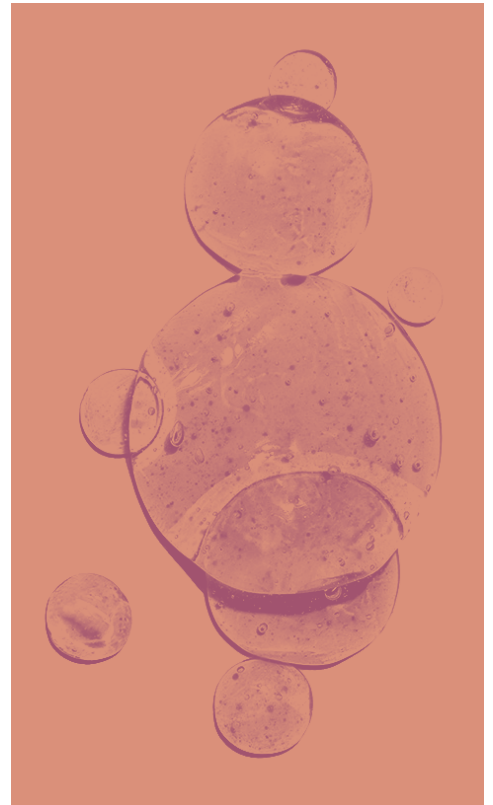

Clinical studies have shown that after just one month of use, ultra-short peptides can increase skin smoothness by an average of **21%**, reduce fine lines by **15-20%**, and improve skin microrelief in over **80%** of users.

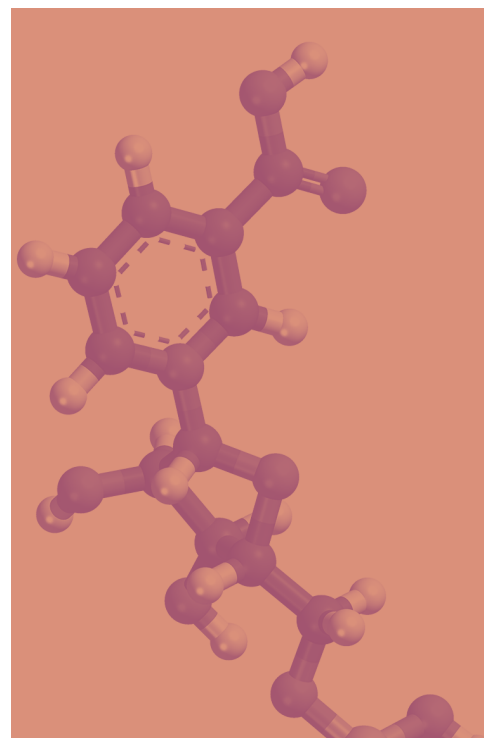

Hyaluronic Acid

Hyaluronic acid is crucial for maintaining moisture in the skin. As we age, we lose hyaluronic acid, leading to dryness, laxity, and wrinkles. Meamo labs Jeunetique Pn Pro helps to rehydrate the skin, restore lost volume, and smooth the appearance of wrinkles. By increasing skin hydration, hyaluronic acid also enhances fibroblast activity, which stimulates collagen production. What sets PN Pro apart is its **hydrolyzed gel** form of hyaluronic acid, which dissolves more slowly in the tissues, allowing for a prolonged rejuvenating effect.

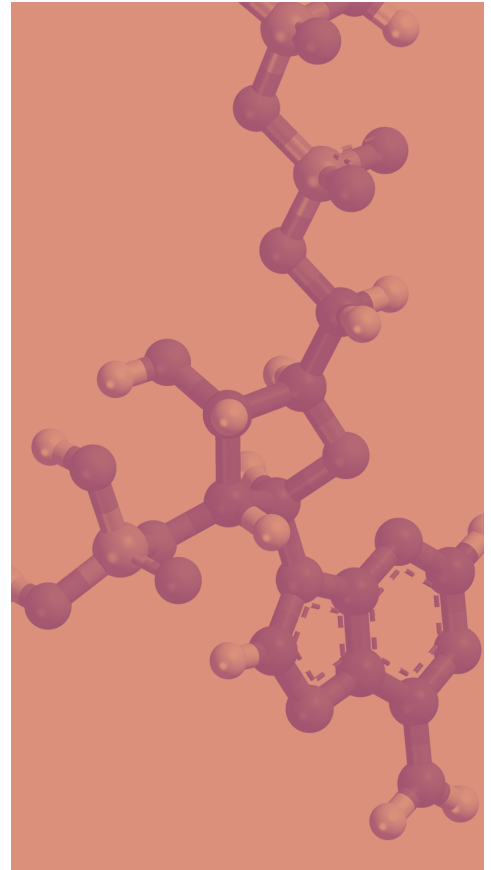

Niacinamide (Vitamin B3)

Niacinamide works on a molecular level to repair and improve the function of skin cells. It impacts **NFκB-mediated transcription** and inhibits **poly(ADP-ribose)polymerase-1 (PARP-1)**, which helps regulate skin processes.

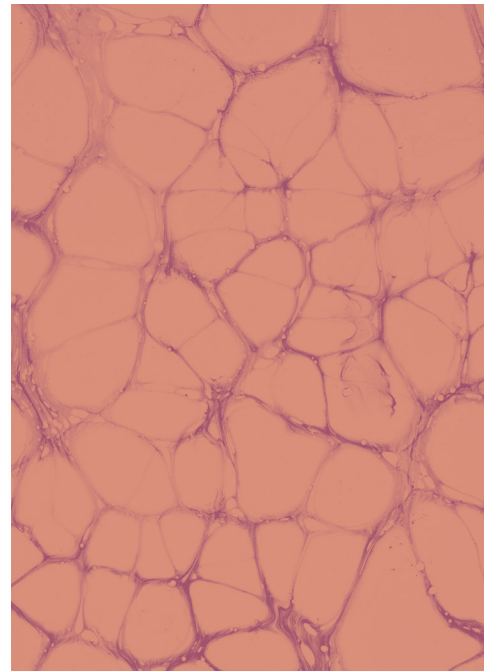

Its comprehensive benefits include:

- **Increased ceramide production**, enhancing the skin's barrier function.
- **Protection against UV-induced damage**, preventing premature photoaging.
- **Reduction of hyperpigmentation**, fine lines, and wrinkles.
- **Anti-inflammatory properties**, helping to soothe redness caused by acne or eczema.
- **Pore reduction**, providing smoother, more even skin.

Cell Growth Factors

The combination of **EGF** (epidermal growth factor), **FGF** (fibroblast growth factor), **IGF** (insulin-like growth factor), and **PDGF** (platelet-derived growth factor) accelerates the production of collagen and elastin in the skin. By stimulating the generation of new fibroblasts, these growth factors play a pivotal role in the synthesis of the skin's structural proteins, improving skin firmness, elasticity, and overall appearance.

Together, these ingredients work in harmony to rejuvenate, regenerate, and revitalize the skin, providing visible improvements in skin texture, elasticity, and overall youthfulness.

Double Concentration of Polynucleotides: How Soon Will You See Results?

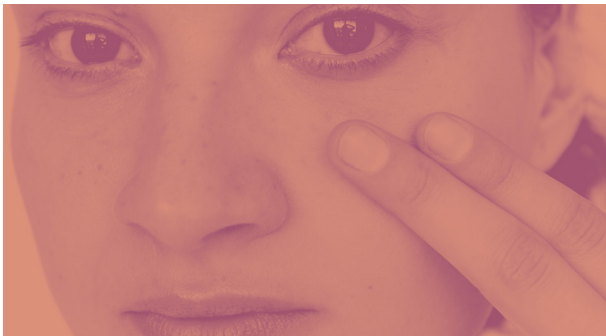

Thanks to the **high concentration of polynucleotides (20 mg/mL)**, the effects of Meamo labs Jeunetique Pn Pro can be seen as soon as **3-4 days** after the first injection. This short period allows the skin cells to begin reacting to the polynucleotides (PN) and ultra-short peptides (USP), resulting in the initial smoothing of fine lines and wrinkles.

Double Concentration of Polynucleotides: How Soon Will You See Results?

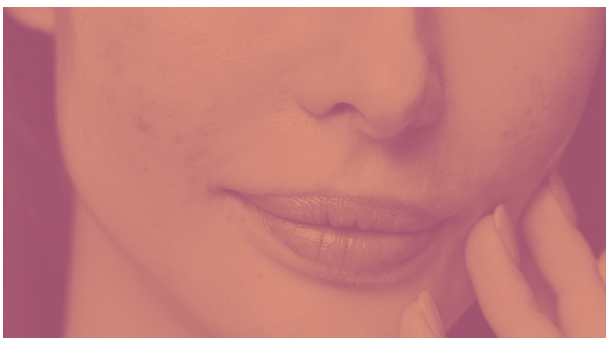

Since the active ingredients have a **cumulative effect**, the results will continue to improve with each subsequent injection. Over time, you'll notice:

- FURTHER REDUCTION IN WRINKLES

- EVENING OF SKIN TONE

- DISAPPEARANCE OF SMALL SKIN IMPERFECTIONS
 - telangiectasias
 - couperose
 - residual acne marks

At the end of the treatment course, the **lifting effect** becomes evident, thanks to the formation of a new, stronger collagen matrix, providing firmer, smoother, and more youthful-looking skin.

Amazing Results in Just 6 Weeks!

Meamo labs Jeunetique Pn Pro

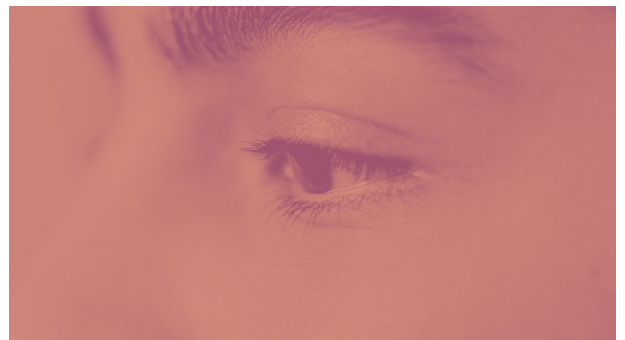

Course of Treatment

For optimal and lasting results, **Meamo labs Jeunetique Pn Pro** should be used as part of a treatment course. On average, **4 sessions** of injections are needed to achieve the best results. The ideal interval between each treatment is **2 weeks**, allowing the skin to respond and progressively enhance its texture, firmness, and radiance.

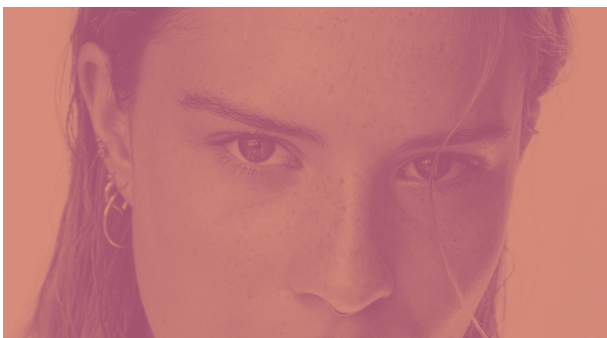

- After completing the full course, you'll experience:

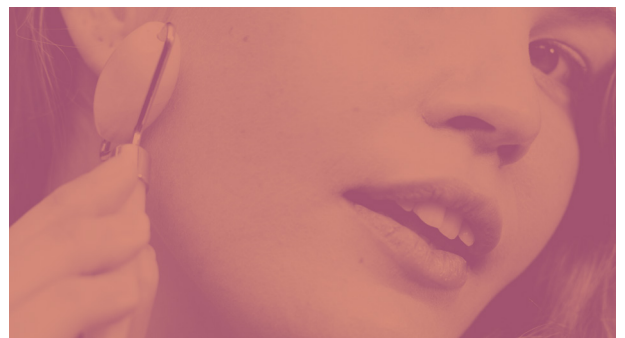

visibly smoother skin,
reduced wrinkles

improved skin tone

a noticeable lifting effect

formation of a new collagen matrix

This 6-week treatment course

provides remarkable,
long-lasting results that
rejuvenate and revitalize
the skin.

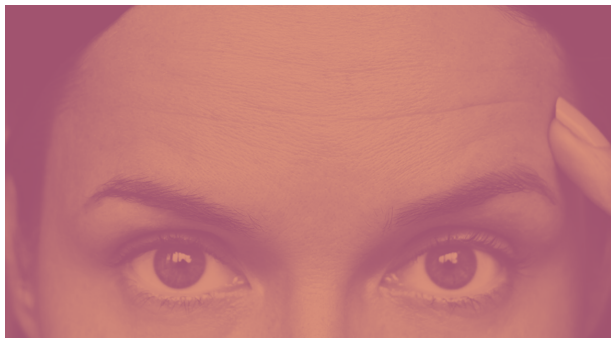

Where and How to Use Meamo labs Jeunetique Pn Pro?

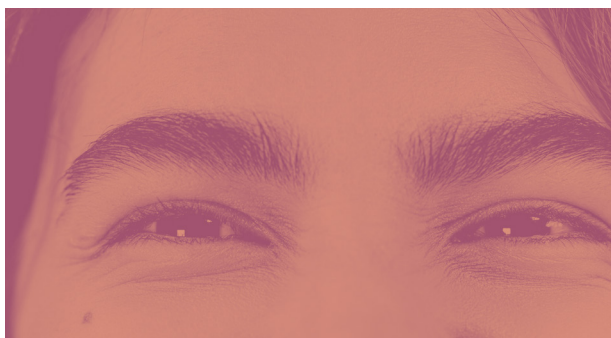

Indications for administration

Meamo labs Jeunetique Pn Pro is designed to eliminate:

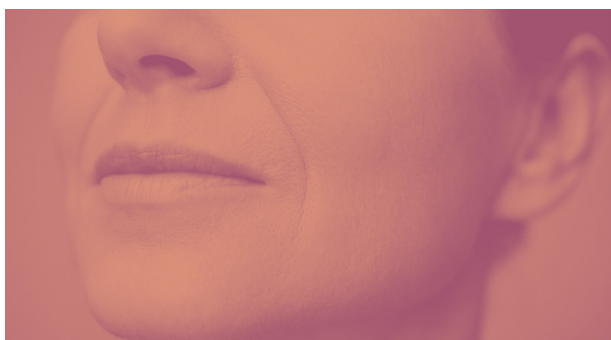

- FOREHEAD WRINKLES

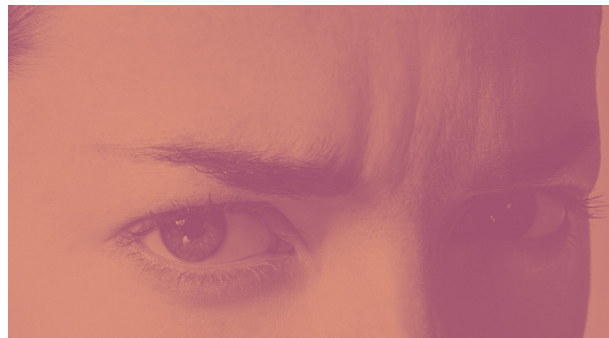

- WRINKLES AT THE CORNERS OF THE EYES

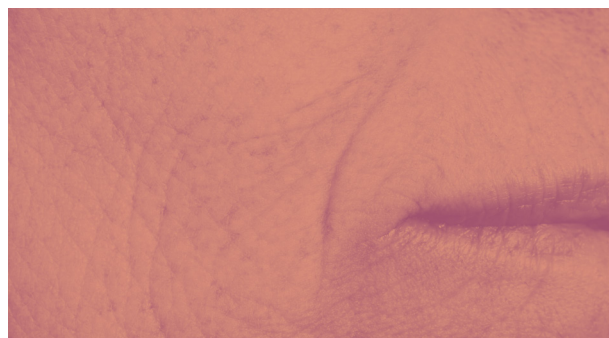

- WRINKLES IN THE NASOLABIAL FOLDS

- WRINKLES OF THE GLABELLAR COMPLEX

- WRINKLES AROUND THE MOUTH

- In addition, Meamo labs Jeunetique Pn Pro can be used to even out skin tone on the cheeks and other areas of the face and body.

Injection Technique of Jeunetique Pn Pro

● Needle Type

Use **ultra-fine needles** to minimize discomfort. The recommended needle is a **32-34G, 4-6 mm** in length.

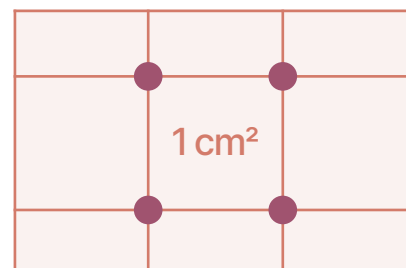

● Injection Depth

Injections should be superficial and subcutaneous, at a depth of **1-2 mm**. The needle should be held at a **45-degree angle**, with the bevel facing upwards to ensure precise placement.

● Injection Sites and Volume

Injections should be placed at the **nodes of an imaginary grid** made up of **1 cm** square cells. The volume of each injection should range from **0.05 ml to 0.1 ml**, depending on the area being treated.

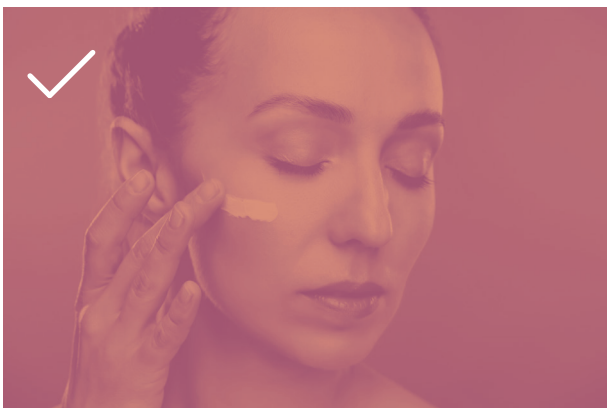

What to do after the injection?

Minimal Recovery Period!

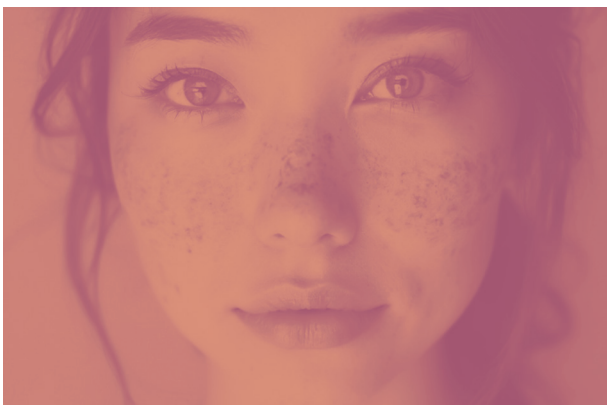

After receiving Meamo labs Jeunetique Pn Pro injections, you can resume daily activities the following day. Here's what to keep in mind:

● Aftercare

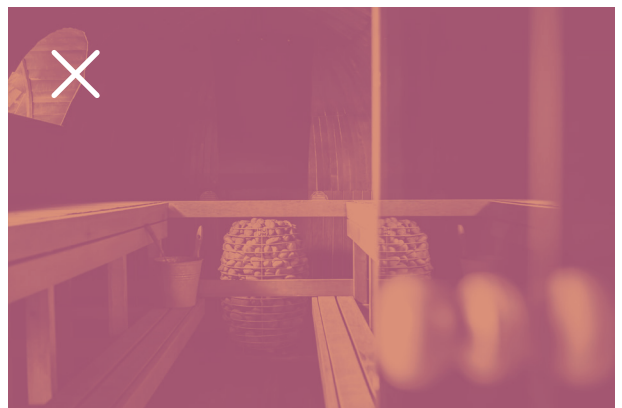

Light makeup and gentle washing of the face are allowed **the next day**.

● Possible Reactions

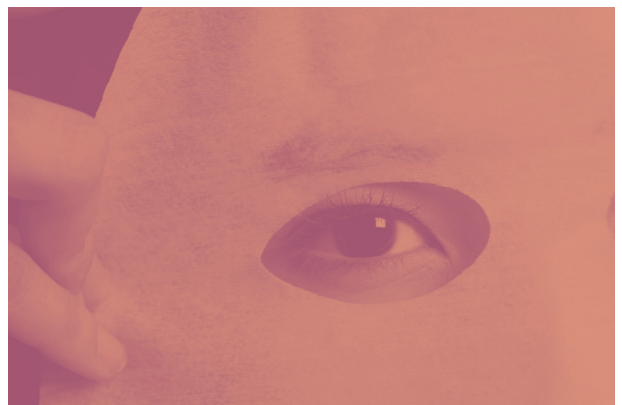

Redness and mild swelling may occur but will subside within **1-2 days**.

● Avoid

Heavy drinking, sauna, hot baths, and intense exercise for **7 days post-treatment**.

● Alleviate discomfort

Ice packs can help alleviate discomfort and speed recovery.

Results from scientific studies and clinical trials

A large-scale 2022 survey of 557 aesthetic physicians found that more than **96%** use PN to improve the appearance and rejuvenate the skin of their patients.

In 2016, PN were shown to improve the skin in several ways:

eliminate excessive keratinization

reduce pore size

even out skin tone

eliminate wrinkles

make skin more elastic and firm

88% of the physicians surveyed rated the results of using PN as "effective" or "very effective". In addition, scientists have not recorded a single case of serious complication in any of the studies conducted to date, underscoring the safety of PN-based products.

How to Store Meamo labs Jeunetique Pn Pro?

Precautions for safe storage
and use of the Meamo labs intelligent
bioreparant Jeunetique Pn Pro

Keep away from direct sunlight
and out of reach of children.

Store in a cool,
dry place below 30°C.

Do not freeze.

Only use if packaging is intact.
