My Best Weight Program FAQ

Welcome! The My Best Weight program is offered by Registered Dietitians and Registered Nurses and is medically managed by Dr. Diane Zatelny, MD FCRP (C) at the Barrie Community Health Centre.

What does Best Weight mean?

We throw out concepts like target weight, ideal weight and goal weight in favour of a Best Weight. Your Best Weight is the weight that you can achieve while living the healthiest lifestyle you can enjoy while maintaining a loyalty to the value of food and drinks, friends and family, celebration and socialization.

What does the program involve?

Losing weight and keeping it off is not as simple as 'eat less and move more.' We now know that obesity is a brain-based chronic disease, just like diabetes or asthma and should be treated as such. Your Nurse or Dietitian will talk about food choices and exercise but will also focus on the thoughts and emotions that affect your decisions about what you eat. We will discuss the option of using medications to help treat obesity as a chronic disease, but use of medications is NOT mandatory to be a part of this program.

We will provide nutritional information, education and guidance, however our focus is not on providing meal plans.

How much does it cost?

There is no cost to participate. Please note, we are **not** able to provide an ongoing supply of medications.

How much weight can I expect to lose?

In this program, we will provide you with realistic options, based on sound evidence and clinical expertise, that may help you lose 5 – 10% of your starting weight. Studies show that a weight loss of 5% can significantly improve your health.

Here is what to expect:

1. Your first appointment will be with a Nurse or Dietitian for approximately 60 minutes
2. The next appointment will be 15 minutes with a Nurse or Dietitian followed by a 20-minute appointment with Dr. Zatelny for assessment
3. Regular follow ups (every 2 – 4 weeks) will be booked with your Nurse or Dietitian – these can be in-person, over the phone, via email or using video-conferencing and are usually 30-45 minutes long
4. You will see Dr. Zatelny as needed based on your treatment plan

* All appointments are one-on-one with your health care practitioner *
