

## DO I NEED TO WATER???

**Soil Snowball Test-** Pick up a handful of soil and squeeze it into a ball. If the soil stays together like a snow ball would the soil has enough moisture and does not need water. If the soil crumbles, time to water.  
**\*In the hot summer months the garden generally should be watered once a day if it does not rain\***

**DO NOT WATER LEAVES OF PLANTS IN DIRECT SUNLIGHT.** This will cause the leaves to burn. Water at the base of the plants or when the sun is not out.

**Too dry, needs water**

**Good snowball, no water needed**
