• The Board of Directors
meets the 1st
Wednesday of each
month. (Check for
changes)

The ARC meets every 3rd
Tuesday of the month.

Flag Day June 14, 2019
Honor the United States Flag

On June 14, 1777, the Continental Congress replaced the British symbols of the Grand Union flag with a new design featuring 13 white stars in a circle on a field of blue and 13 red and white stripes – one for each state. The number of stars increased as the new states entered the Union. In June 1886 Bernard Cigrand made his first public proposal for the Annual observance of the birth of the flag when he wrote an

article titled "The Fourteenth of June". The President is requested to call on government officials in the USA to display the flag on all government buildings on Flag Day, and to urge US residents to observe Flag Day as the anniversary of the adoption on June 14, 1777, by the Continental Congress of the Stars and Stripes as the official Flag of the United States of America.

Hurricane Season Is Here -- Are You Prepared?

Here's what you can do to prepare for such an emergency.

- WATCH: Hurricane conditions are *possible* in the specified area of the WATCH, usually within 36 hours.
- WARNING: Hurricane conditions are *expected* in the specified area of the WARNING, usually within 24 hours.

Prepare a Personal Evacuation Plan

- Identify ahead of time where you could go if you are told to evacuate. Choose several places—a friend's home in another town, a motel, or a shelter.
- Keep handy the telephone numbers of these places as well as a road map of your locality. You may need to take alternative or unfamiliar routes if major roads are closed or clogged.
- Listen to Weather Radio or local radio or TV stations for evacuation instructions. If advised to evacuate, do so immediately.
- Take these items with you when evacuating:
 - Prescription medications and medical supplies;
 - Bedding and clothing, including sleeping bags and pillows
 - Bottled water, battery-operated radio and extra batteries, first aid kit, flashlight
 - Car keys & cell phones
 - Documents including; driver's license, Social Security card, proof of residence, insurance policies, wills, deeds, birth and marriage certificates, tax records, etc.

Assemble a Disaster Supplies Kit Including the Following Items:

- First aid kit and essential medications.
- Canned food and can opener.
- At least three gallons of water per person.
- Protective clothing, rainwear, and bedding or sleeping bags.
- Battery-powered radio, flashlight, and extra batteries.
- Special items for infants, elderly, or disabled family members.
- Written instructions on how to turn off electricity, gas and water if authorities advise you to do so. (Remember, you'll need a professional to turn them back on.)

Prepare for High Winds

- Install hurricane shutters or purchase precut 1/2" outdoor plywood boards for each window of your home. Install anchors for the plywood and pre-drill holes in the plywood so that you can put it up quickly.
- Make trees more wind resistant by removing diseased and damaged limbs, then strategically removing branches so that wind can blow through.

Know What to Do When a Hurricane WATCH Is Issued

- Listen to Weather Radio or local radio or TV stations for up-to-date storm information.
- Prepare to bring inside any lawn furniture, outdoor decorations or ornaments, trash cans, hanging plants, and anything else that can be picked up by the wind.
- Prepare to cover all windows of your home. If shutters have not been installed, use precut plywood as described above. *Note:* Tape does not prevent windows from breaking, so taping windows is not recommended.
- Fill your car's gas tank

Swales

Brevard County Stormwater Utility

Swales are one of the most commonly used stormwater practices. They slow down the rapid flow of stormwater runoff from highways and residential streets by ponding the water between its sloping sides. By letting the water pond soak into the ground, it also treats the water before it goes to the lagoon. Swales have been created throughout the County.

The following are ways to maintain swales to maximize their effectiveness:

- Let water pond. Runoff should temporarily pond in the swale for 24 to 36 hours.
- Mow the swale, but not too short. Remove leaves and grass clippings from swales.
- Minimize use of fertilizers, pesticides, and herbicides.
- Do not pile garbage, trash, leaves, tree limbs or garden debris in swales, as this adds pollutants, which can wash into downstream waters
- Do not pave the swale as this will reduce the filtration and infiltration of runoff.
- Do not park vehicles in the swale, as this compacts the soil so less runoff soaks in.
