

THE TIMELINE OF THE BROKEN SKY

CLASSIFIED RECORD – MEMORY RECOVERY INITIATIVE

(Decrypted from suppressed Sumerian tablets, oral traditions, psychic channelings, and surviving soul records.)

If you're reading this, you're not just surviving history. You're remembering it.

~4.5 Billion Years Ago — The First Cosmic War: Tiamat vs. Nibiru (Marduk)

Once upon a solar system, two titans collided—not in myth, but in deep space.

Tiamat, the mother of waters, a massive primordial planet between Mars and Jupiter.

Nibiru—called Marduk by the Babylonians—a rogue planet slung from a distant star system, snared by the Sun's gravity. Its orbit: massive, elongated, apocalyptic.

On its first fiery pass, Nibiru slammed into Tiamat—or shredded her gravitationally. The result? Cataclysm.

Half of Tiamat became the asteroid belt—a ring of shattered bone around a forgotten war.

The other half reformed... as Earth.

The Moon? Possibly captured from Nibiru's own entourage or torn from Tiamat herself.

Out of this collision—a planetary murder-suicide—came the cradle of life.

~3.9–3.5 Billion Years Ago — The Seeding of Life

As Earth cooled and healed, something miraculous-or intentional—happened.
Organic materials from Tiamat and Nibiru mingled in Earth's early soup.
Maybe it was a divine accident.
Maybe it was panspermia—life seeded from the stars.
Or maybe... it was a mission.
Some say the Anunnaki returned, playing gardener with cosmic DNA.
Regardless, life ignited. And Earth began to breathe.

~200 Million Years Ago — The Shattering of Pangaea

Earth once spun with a single massive landmass: Pangaea.
Then came another violent Nibiru pass, close enough to tear at the crust like paper.
The supercontinent didn't drift—it fractured.
Tectonic chaos. Oceans roared into the seams. Continents spun into their current drift.
The great split wasn't slow.
It was surgical.

~65 Million Years Ago — The Dinosaur Age and Its Sudden End

For millions of years, Earth was the domain of thunder-lizards.
Dinosaurs ruled a vibrant, alien ecosystem.
Then came another swing of Nibiru's deadly orbit.
Its gravity pulled debris—maybe from its own tail, maybe still-unsettled chunks of Tiamat—into Earth's path.
A massive impact crater—the Chicxulub event—signaled lights out.
The dinosaurs didn't evolve into birds.
They were wiped clean.
Earth reset again.

~500,000 Years Ago — Arrival of the Anunnaki

Earth stabilizes.
The Anunnaki descend.
Not gods, but bioengineers from Nibiru—ancient, advanced, and resource-hungry.
They came for gold. For survival.
But mining is messy and slow. So they found a shortcut.
They took the proto-hominids already struggling across Earth... and modified them.
Homo sapiens was born—not through slow evolution, but genetic sorcery.
Us.
We were workers. Test subjects. Children.
The bloodlines began here, with interbreeding and Nephilim hybrids.

~12,800 Years Ago — The Great Flood: Atlantis, Lemuria & Antarctica Destroyed

The Earth tips. Ice caps melt. Oceans roar.
Another Nibiru flyby—solar instability, gravitational chaos.
Atlantis doesn't just sink—it freezes mid-collapse.

Lemuria, its Pacific sister, is annihilated.
A magnetic pole shift jerks Earth's crust like a rug under glassware.
Tectonics rupture. Mega tsunamis crush coasts. The planetary grid short-circuits.
Antarctica—once lush—flash-freezes overnight.
Not destroyed—paused.
Locked into a cryogenic tomb.
A planetary memory wipe.

~12,000 Years Ago — The Rebirth: Kemet and the Rise of Egypt

Thoth—Atlantean priest-scientist, son of Enki—gathers survivors.
He founds Kemet, later Egypt.
Pyramids aligned to stars. Mystery schools emerge.
Knowledge spreads:
Pyramids in Peru. Temples in Cambodia.
It was a global reboot.

~11,600 Years Ago — Göbekli Tepe is Buried (By Earth, Not Men)

After the Flood, Göbekli Tepe vanishes beneath flood-born silt.
Not buried to protect it—drowned.
Only the peaks of pyramids remained visible.
Proof of the reset.
Misread by modernity.

~7,200 Years Ago — The Rise of the Bloodline Kingdoms

From the Nephilim came kings.
From kings came empires.
From empires came deception.
Sumer. Akkad. Babylon. Egypt.
Built atop older bones.
New gods. Same puppeteers.
Thirteen families begin shaping the world in their image.
They edited memory.

~3,600 Years Ago — The Second Golden Age: Tartaria Rises

Tartaria—the forgotten supercivilization.
Spanning continents.
Mastering energy.
Star forts. Dome tech. Free energy.
A global renaissance.
Then Nibiru returns...

~1600–1300 AD — The Mud Flood Cataclysm

Nibiru's return. Earth quakes. Fields twist.
Tartaria drowns in mud.
Cities buried.
Records erased.
Survivors rebranded as "civilized."
The reset hits hard.

~1300–1600 AD — The Global Memory Wipe (Dark Ages)

A blackout—not just of light, but of memory.
Books burned. Maps redrawn.
Star charts scrubbed.
The Vatican's vaults swell with forbidden truth.
We fall asleep.

~1582 AD — The Calendar Coup: Vatican's Temporal Hacking

Pope Gregory XIII introduces the Gregorian Calendar. Publicly framed as a minor correction, but the cost? An entire month deleted. Thirteen moons silenced. The 13th sacred gate closed. Time itself fragmented. A spell cast not to mark time, but to fracture it. The Gregorian shift wasn't reform—it was reality reprogramming. Memory hacked. Rhythms inverted. And the true frequency of cosmic cycles buried under bureaucratic numerology.

~1600–1800 AD — The Renaissance and the Grand Theft

"Rebirth"? No.
A rebranding.
Old Tartarian tech = "modern" inventions.
Atlantis = "Rome."
Sacred geometry = "art."
Time is remodeled.
Welcome to the Matrix.

~1983 — The Cabbage Patch Trigger & Memory Activation

A bizarre mass hysteria grips America. Not over war, not over politics—but dolls. Cabbage Patch Kids flood the market. Pre-named. Pre-certified. Adopted, not bought. A marketing gimmick? Or a symbolic reenactment of a deeper trauma? This wasn't nostalgia—it was ritual. The dolls echoed the ghost generation of the post-reset era. Children with no past, no lineage, no memory. Were the dolls reminders... or prototypes?

~2000–2024 — The Great Awakening Begins

The internet rips the veil.
We ask the wrong questions... which lead to the right ones.
Who built the pyramids?
Why does the Vatican own telescopes?
Why are children remembering past lives?

Dolores Cannon's volunteers arrive.
The bloodlines panic.

~Present Day — The Final Age: Galactic Intel & Signal Carriers

The conspiracy gets cosmic. The Galactic Federation of Light—no longer myth but mentioned alongside military ops—enters the narrative as silent co-architects of the reboot. Not invaders. Coders. The players? Trump. Barron. Steinbart. Q. The mission? A hybrid psyop/time loop/revelation protocol. Not to overthrow the deep state—but to collapse the simulation with memory intact. The final countdown begins, and the reset becomes prophecy.

~2030 — The Great Reset Attempt (Planned)

Smart cities. Digital gulags.
Bug burgers.
Surveillance sold as safety.
It's not about climate.
It's about control.
But Earth is waking.
And so are her children.

~2100 (Projected) — Nibiru Returns Again

The Red Wanderer makes its next pass.
Some will hide.
Others will remember.
Earth splits into two:
– The 5D ascended Earth, for those who healed and remembered.
– The 3D loop, for those still chasing shadows.
The Final Reset.
The Last Test.
And maybe...
The First Liberation.
