ITEM 3

**Minutes of Meeting of
Reclamation District 773
Held on June 1, 2021**

The regular meeting of the Board of Trustees of Reclamation District 773 was held at 9:00 a.m. on June 1, 2021, at the District's office located at 3121 West March Lane, Suite 100.

Item No. 1: The meeting was called to order at 9:14 a.m. Present were President Joseph Bacchetti and Trustee Joe Enos. Trustee Mark Bacchetti was absent. Also present were Andy Pinasco, filling in as District Secretary, and Chris Neudeck, District Engineer.

Item No. 2: Public Comment. There was no public comment.

Item No. 3: Minutes. The minutes of the April 6, 2021, meeting were approved unanimously by the Trustees present on a motion by President Joseph Bacchetti seconded by Trustee Joe Enos.

Item No. 4: Mr. Pinasco provided a written financial report and reviewed it with the Trustees. The financial report was accepted by unanimous vote of the Trustees present on a motion by President Joseph Bacchetti, seconded by Trustee Joe Enos.

Item No. 4.a: Mr. Pinasco proposed a 2021-2022 Budget and reviewed it with the Trustees. The 2021-2022 Budget was accepted by unanimous vote of the Trustees present on a motion by President Joseph Bacchetti, seconded by Trustee Joe Enos.

Item No. 4.b: Mr. Pinasco reviewed the draft audit with the Trustees. The draft audit for the 2019-2020 fiscal year was accepted unanimously by the Trustees present on a motion by President Joseph Bacchetti, seconded by Trustee Joe Enos.

Item No. 4.c: Mr. Pinasco presented the contract to conduct the District's annual financial audit and submit the Special Districts Financial Transactions report from Croce, Sanguinetti, & Vander Veen for the 2020-2021 fiscal year. The contract was unanimously approved by the Trustees present and the Trustee President was authorized to sign on a motion by President Joseph Bacchetti, seconded by Trustee Joe Enos.

Item No. 4.d: Adopt Resolution 2021-02 Certifying Assessments to be Collected and Establishing a Procedure for Collection for the 2021-2022 Fiscal Year. Mr. Pinasco reviewed the Resolution with the Trustees. Resolution 2021-02 was adopted by unanimous vote of the Trustees present on a motion by President Joseph Bacchetti, seconded by Trustee Joe Enos.

Item No. 5: Engineers' Report; request for direction. Mr. Neudeck presented a written and oral report. He reported on the recent field inspection and on-going activities within

the District. He next reported that the anticipated maintenance work on the levee had been completed.

Item No. 6: There was no report on the correspondence in the agenda packet.

Item No. 7: Mr. Pinasco reviewed the District calendar with the Trustees pointing out that the next meeting was in August.

Item No. 8: Mr. Pinasco reported on the outstanding bills that had been received and the status of the District's accounts. On a motion by President Joseph Bacchetti, seconded by Trustee Joe Enos, the Trustees present unanimously approved payment of the attached bills identified on the attached bills paid report.

Item No. 9: The meeting was adjourned at 9:35 a.m. by unanimous vote of the Trustees present on a motion by President Joseph Bacchetti, seconded by Trustee Joe Enos.

Respectfully submitted,

Daniel J. Schroeder, District Secretary

RECLAMATION DISTRICT NO. 773

RESOLUTION 2021-03

RESOLUTION ORDERING BOARD OF TRUSTEES ELECTION BY ALL-MAILED BALLOT

WHEREAS, Reclamation District No. 773 ("District") will hold an election on Tuesday, November 9, 2021, to fill one seat on the Board of Trustees ("Board") as required by law; and

WHEREAS, the Board desires to maximize the opportunity of landowners to cast their ballots; and

WHEREAS, the election shall be conducted pursuant to Water Code sections 50700 et seq. which provides election procedures for Reclamation Districts.

NOW, THEREFORE, BE IT RESOLVED by the Board of Trustees of Reclamation District 773 that:

1. The foregoing recitals are true and correct.
2. The District will hold an all-mailed ballot election on Tuesday, November 9, 2021, to fill one seat on the Board in accordance.
3. The ballot will include the following question for the voters to respond to:

"SHALL THE MAILED BALLOT BE USED TO CONDUCT ALL FUTURE GENERAL DISTRICT ELECTIONS?"

PASSED AND ADOPTED by the Board of Trustees of Reclamation District No. 773 at a special meeting thereof held on this 3rd day of August, 2021, by the following vote, TO WIT:

AYES: _____

NOES: _____

ABSTENTION: _____

ABSENT: _____

ATTEST:

ITEM 8

Looking south along the San Joaquin River and Paradise Cut Bypass

Paradise Cut Expansion and South Delta Restoration Project

PROJECT SUMMARY

The Paradise Cut Expansion Project and South Delta Restoration Project is a multi-benefit flood management project that will benefit Stockton and nearby communities along the San Joaquin River. The project will expand and enhance the existing Paradise Cut Flood Bypass, which currently diverts water from the river during flood events, to ensure adequate downstream channel capacity and levee protection and facilitate the passage of increased flood water through the south Delta. By significantly lowering flood stage along nearly 30 miles of the San Joaquin River between Vernalis and Stockton, the Project will greatly improve public safety and protect farmland from uncontrolled flooding. In addition, planned enhancements will provide new and improved habitat for native fish and wildlife. A diverse group of stakeholders is working together to advance this pragmatic, multi-benefit, regional solution for flood management - a shared vision for cities, farms, and wildlife.

Expanding and enhancing the Paradise Cut Flood Bypass will:

- Reduce the risk of catastrophic flooding for communities including Lathrop, Manteca, and Stockton
- Protect farms from uncontrolled flooding
- Restore wetland and riparian habitats for native wildlife
- Increase climate change resiliency by supporting more flexible water supply management

PROJECT STATUS

In 2016, the San Joaquin County Resource Conservation District (SJCRCRD) received a grant from the Delta Conservancy to advance project planning by completing Phase 1 of the project. As part of this work, project partners completed the following in coordination with local landowners, engineers, and agencies:

- Existing conditions report
- Extensive hydraulic modeling & design development
- Restoration opportunities report
- Conceptual design technical memo
- Construction cost estimate
- Permitting and compliance strategy

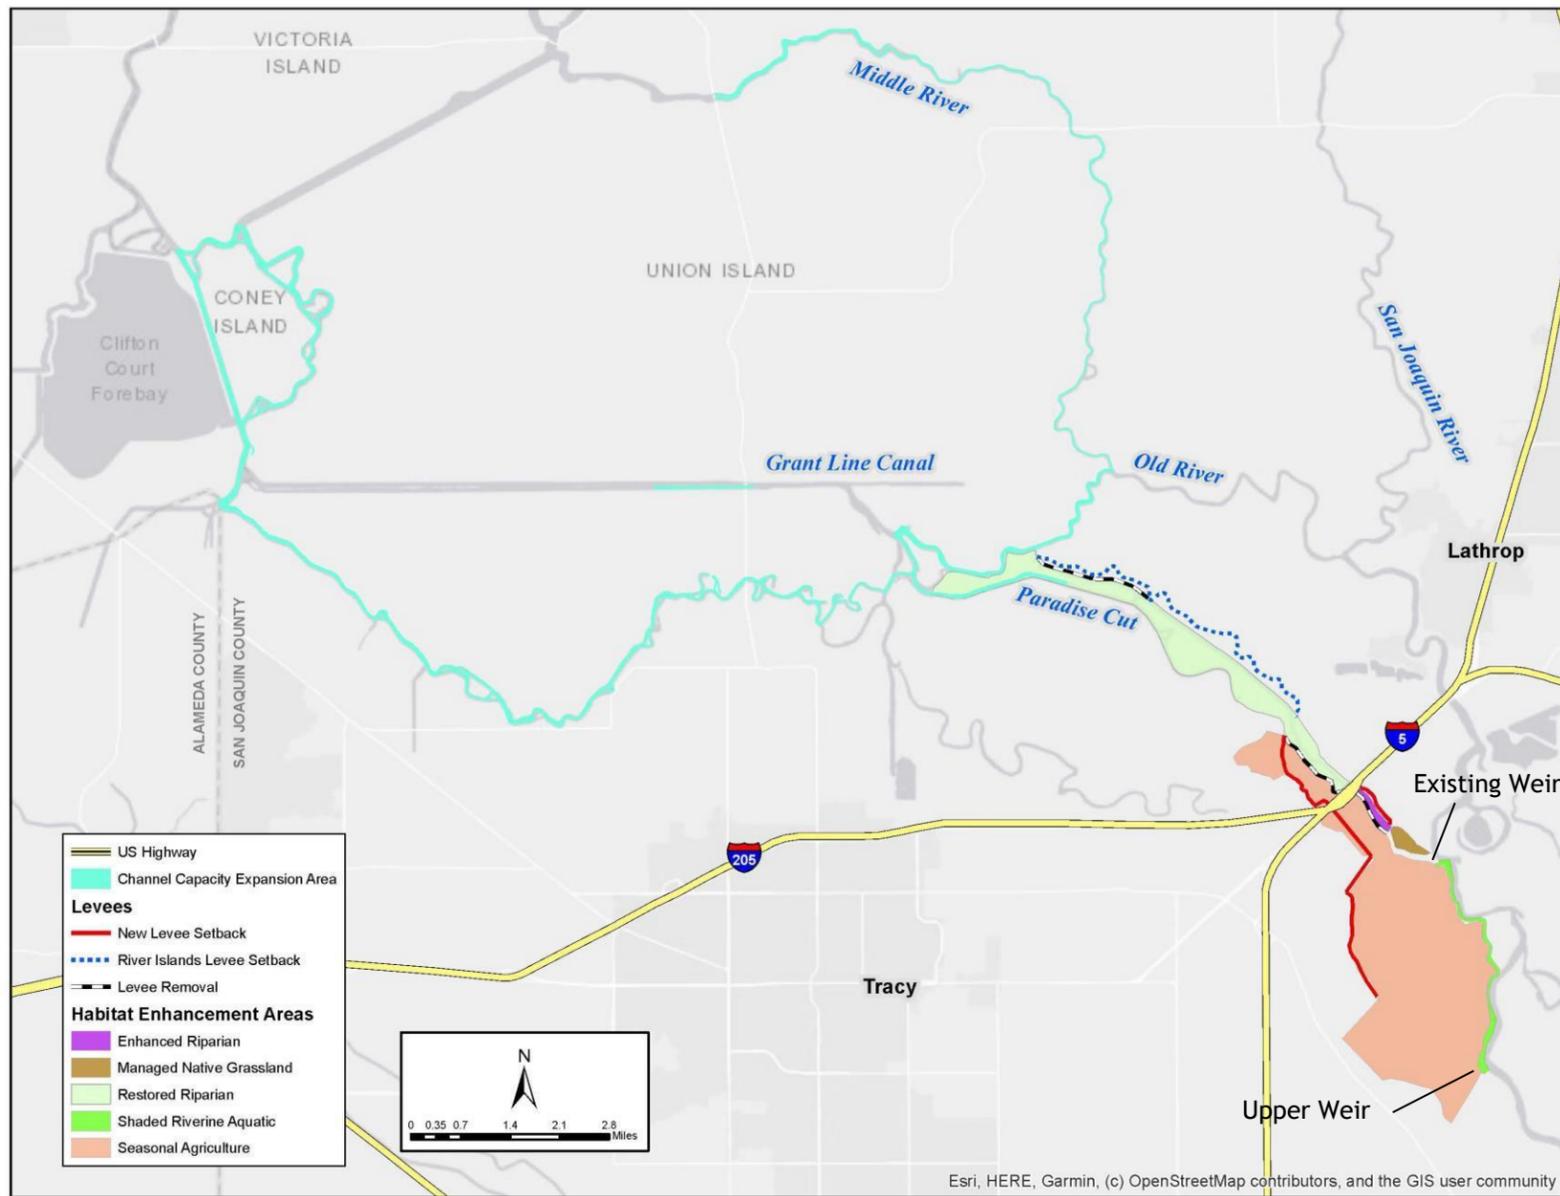

In 2021, the SJCRCRD executed a second grant from the Delta Conservancy for Phase 2 of the project, scheduled for completion in June 2022. This phase will:

- Develop a strategy to address local concerns with downstream impacts of the proposed project
- Make recommendations for addressing critical data gaps
- Establish a local engagement structure to help coordinate implementation of future project phases with state agencies

 MBK Engineers
 Larsen Wurzel & Associates

Project Cost Estimate

This feasibility-level cost estimate (Class 4) includes acquisition of flood and conservation easements as well as design, permitting, and construction costs within the project footprint. It does not include project costs associated with downstream impacts, including dredging, which will be analyzed in Phase 3 of the project. The estimate was developed for planning purposes only and should not be used as a basis for final design or construction, or as an estimate of construction costs for construction planning or project funding.

Timeline of Project Milestones

FINAL PARADISE CUT EXPANSION AND SOUTH DELTA RESTORATION PROJECT PROJECT LEAD OPTIONS

June 28, 2021

The Paradise Cut Expansion and South Delta Restoration Project Phase 2 planning team, organized to implement a Delta Conservancy grant to explore the feasibility of expanding the Paradise Cut Bypass to improve flood protection and enhance habitat, is evaluating options to lead the development and construction of the Paradise Cut Expansion and South Delta Restoration Project (“Project”), as well as any projects to address downstream impacts from the Project. To secure local support for the Project, the planning team recommends expanding the capacity of South Delta channels either before or concurrent with Project construction. The addition of capacity expansion is a new element of the Project, but critical to maintain local support for the overall effort.

Partnerships

In addition to the local agencies considered as project lead options in this memo, the Project’s partners include the City of Lathrop, the Central Valley Flood Protection Board, and the California Department of Water Resources. Without support from these three agencies, the Project cannot move forward. The City of Lathrop benefits from the project because it will reduce flood stage on the San Joaquin River, therefore helping to protect people and property in the event of a flood. The Central Valley Flood Protection Board’s (“Board”) Central Valley Flood Protection Plan lists the Project (without the channel capacity expansion) as a priority in both the 2012 and the 2017 versions. The Board also must serve as the non-federal sponsor for the Project, since it requires involvement of the U.S. Army Corps of Engineers. The California Department of Water Resources similarly will play an important role in the success of the project because it is the mostly likely state agency to assist with funding of the project because of its role as the agency responsible for implementation of the State Plan of Flood Control, of which the Paradise Cut levees are an integral part of the San Joaquin River system. The Department of Water Resources will potentially serve as a sub-applicant for the Federal Emergency Management (FEMA) Building Resilient Infrastructure and Communities (BRIC) grant, which would provide funding for future phases of the Project.

Project Lead Options

The planning team will meet with local reclamation districts and other stakeholders as needed in 2021 to secure feedback on four options: 1) Southern Delta Levee Protection and Channel Maintenance Authority (“Maintenance Authority”); 2) San Joaquin Area Flood Control Agency (“SJAFC”); 3) formation of new joint powers authority (“new JPA”); and 4) San Joaquin County Flood Control and Water Conservation District (“District”). The team also will ask for alternative suggestions as part of the outreach process.

None of the options the planning team is evaluating possess funding for planning, design, engineering, permitting, or construction of the Project. All agencies would need to hire staff and otherwise expand their agency to lead this Project. All agencies also would need funding for long-term management and maintenance of the Project.

[Option 1: Southern Delta Levee Protection & Channel Maintenance Authority](#)

The South Delta Water Agency (“SDWA”) and Reclamation District 2062 (“RD 2062”) formed the Maintenance Authority, a joint powers agency, in 2006 to help local reclamation and water districts fund the maintenance and improvement of South Delta levees and channels to improve flood protection. The Board consists of three members: the President of the South Delta Water Agency, the attorney for the South Delta Water Agency, and the President of RD 2062. The South Delta Water Agency has the authority to assist the following RDs with flood control efforts: 1, 2, 17, 524, 773, 1007, 2058, 2062, 2064, 2075, 2085, 2094, 2095, 2096, and 2107. The Maintenance Authority is funded by River Island homeowners, which each pay \$8/year. This assessment will eventually result in over \$150,000/year in annual revenue. The JPA currently meets as needed and does not have any current projects or staff to support work on projects.

PROS	CONS
Dedicated source of administrative funding to potentially support the Project	Need to update JPA agreement
Framework already in place	No staff
Local agency	Need to add Board members with project expertise
Opportunity to structure agency’s mission as needed to suit the Project	Annual funding may not be sufficient for planning, administration, and technical support for the Project
Positive existing relationships with South Delta RDs and landowners	No track record of successful project construction

Option 2: San Joaquin Area Flood Control Agency

The City of Stockton, San Joaquin County, the San Joaquin County Flood Control and Water Conservation District, the City of Lathrop, and the City of Manteca formed SJAFCA as a joint powers agency. SJAFCA’s mission is to “reduce and manage the region’s flood risk, “according to the 2019 Strategic Plan. SJAFCA has an annual budget of about \$1.6 million and five employees.

PROS	CONS
Local agency	No funding for administration and technical support of the Project
Experience with construction of large projects	Less established relationships with South Delta RDs and landowners than the Maintenance Authority
Established Board of Directors	
Established staff structure	
Cities and County among members	
Established reputation with the community	
Established relationship with relevant state agencies	
Multi-benefit projects are listed in Goal 3 of the Strategic Plan and SJAFCA is open to partnerships on multi-benefit projects	
Staff expertise in grant and contract management	
Established relationship with San Joaquin County for operations and maintenance	
Some financial flexibility to fund projects, subject to Board approval	

Maintains significant reserve to use for project cash flow

Option 3: New JPA

The planning team may recommend the formation of a new JPA for the specific purpose of leading the Project.

PROS	CONS
Local agency Ability to design membership and other elements as needed to suit Project	No framework in place Significant cost to establish
Focus would solely be on Project	No dedicated funding for planning, technical support, and administration of the Project No staff No existing Board of Directors

Option 4: San Joaquin County Flood Control and Water Conservation District

The California State Legislature formed the San Joaquin County Flood Control and Water Conservation District (“District”) in 1956 to protect communities throughout San Joaquin County (“County”) from loss of life and property from floods and droughts, as well as to ensure the County’s water supply reliability. The District is a dependent special district, its jurisdiction covers all of San Joaquin County, and the San Joaquin County Board of Supervisors acts as the governing body. The County Department of Public Works Water Resources Division provides staffing support for the District. The District’s authorities are detailed in the originating statute, including the ability to form zones of benefit within the County to construct, operate and plan flood control, water supply, drainage, and groundwater recharge projects.

PROS	CONS
Established staff structure	No dedicated funding for planning, administration and technical support of the Project
Framework already in place, including financial policies and procedures	No dedicated staff
Local agency	Board is County only; does not include cities or RDs
Established reputation with the community	Less established relationships with South Delta RDs and landowners than the Maintenance Authority
Established Board of Directors Staff expertise in grant and contract management	Project is not in 5-year Strategic Plan
Some financial flexibility to fund project, subject to Board approval Qualifies as lead applicant on FEMA Building Resilient Infrastructure and Communities grant	

Paradise Cut Expansion and South Delta Restoration Project

DRAFT Existing Hydraulic Studies of Paradise Cut

Prepared by Environmental Science Associates for San Joaquin County Resource Conservation District, June 28, 2021

Organization	Year	Title	Local Geography	Project version	Dredging included?	Hydraulic modeling	Modeled flows	Model outputs	Levee analysis?
American Rivers	2019	Conceptual Design Technical Memo: Paradise Cut Expansion Project	Paradise Cut from proposed Upper Weir to Fabian Tract	Minimum Viable Project (current project definition); Potential Maximum Project	Yes	Yes	San Joaquin River Flood Control Project design flood; 1997 flood	Peak flood discharge (cfs), freeboard, and velocity at key measurement points	Freeboard at key measurement points
MBK	2018	Hydraulic Impact Analysis for River Islands at Lathrop, Update for New Existing Condition and Revised No Action Scenario	Vernalis to Fabian Tract, Stockton ship channel and Tracy Blvd crossing of Middle River	Scenarios of MBK (2012) with revisions to scenarios #2 and #3, including completion of River Islands Phase 2A and 2B interior levees	No	Yes	Existing 50-, 100-200- and 500-year floods	Peak water surface elevation	No
DWR	2017	Basin Wide Feasibility Study for San Joaquin Basin	Paradise Cut from proposed Upper Weir to Stark Tract	13 options modeled; Option M-Ag similar to American Rivers (2019) Minimum Viable Project	No	Yes	Existing hydrology 200-year flood	Peak water surface elevation (ft); Ecosystem, recreation, land conversion metrics	Downstream levee improvement costs
MBK	2015	Delta Dialogues Paradise Cut Expansion Scenario	Vernalis to Fabian tract	Primary scenario included new 1000-ft weir and 500-ft opening in UPRR east embankment plus PC levee setbacks	No	Yes	Existing 25-, 100- and 200-yr floods w/ and w/o SLR	Peak water surface elevation with and without project	No
PBI	2014	200-Year Freeboard Analysis & Floodplain Mapping within RD 17	Vernalis to Fabian Tract, Stockton ship channel and Tracy Blvd crossing of Middle River	Existing conditions (as of 2014)	No	Yes	Existing hydrology 200-year flood	Peak water surface elevation, 200-year floodplain under levee breach scenarios for right bank SJR only	Levee breach analysis for right bank SJR below PC only
USACE	2014	Draft Environmental Impact Statement for River Islands at Lathrop, Phase 2B		[Used MBK 2012 hydraulic analysis]					
MBK	2014	River Islands at Lathrop Hydraulic Impact Analysis		[Editorial revisions only to MBK 2012 below]					
MBK	2012	River Islands at Lathrop Hydraulic Impact Analysis	Vernalis to Fabian Tract, Stockton ship channel and Tracy Blvd crossing of Middle River	(1) Pre- River Islands conditions; (2) 2010 existing conditions after River Islands Phase I levee built; (3) setback of right bank PC non-federal levee; (4) River Islands full project w/ Old River levee setback	No	Yes	Existing 50-, 100-, 200- and 500-year floods	Peak water surface elevation; Maximum inundation area; Change in exceedance probability	Levee failure assumed when water level reaches top of levee; overtopping analysis also included
MBK	2010	River Islands at Lathrop Hydraulic Analysis in Support of Risk Based Hydraulic Impact Analysis	Vernalis to Fabian Tract, Stockton ship channel and Tracy Blvd crossing of Middle River	(1) Pre- River Islands conditions; (2) 2010 existing conditions after River Islands Phase I levee built; (3) setback of right bank PC non-federal levee; (4) River Islands full project w/ Old River levee setback	No	Yes	Existing 2-, 10-, 25-, 50-, 100-, 200- and 500-year floods	Peak water surface elevation and peak discharge (cfs)	No
MBK	2006	River Islands at Lathrop Analysis of Hydraulic Impacts on Federal Flood Project Design Capacity	Vernalis to Fabian Tract, Stockton ship channel and Tracy Blvd crossing of Middle River	(1) Pre-River Islands; (2) River Islands project completion; (3) River Islands plus Paradise Cut Improvement Project with setback levee on right bank of PC downstream of Union Pacific Railroad	No	Yes	San Joaquin River Flood Control Project design flood	Peak water surface elevation and peak discharge (cfs)	No
MBK	2002	River Islands at Lathrop Hydraulic Impact Analysis	Vernalis to Fabian Tract, Stockton ship channel and Tracy Blvd crossing of Middle River	(10) Pre-River Islands conditions; (2) River Islands completion plus Paradise Cut Improvement Project with setback levee between Union Pacific Railroad and I-5	No	Yes	Existing 10-, 50-, 100-, and 200-year floods	Peak water surface elevation	Levee failure assumed when water level reaches to within 3 ft of top of levee

DRAFT Existing Ecosystem Studies of Paradise Cut

Prepared by Environmental Science Associates for San Joaquin County Resource Conservation District, June 28, 2021

Organization	Year	Title	Local Geography	Species included	Existing habitat description?	Habitat features/needs quantified?	Habitat mapping?	Incidence of species recorded?	Mitigation measures identified?
DWR	2017	Basin Wide Feasibility Study for San Joaquin Basin	Paradise Cut	Not species specific, but focus is on CS target species esp. salmon and steelhead	No	Yes	Yes	No	No
Matocq et al.	2017	Final Report: Population Genetic Structure of the Riparian Brush Rabbit (<i>Sylvilagus Bachmani</i> Riparius): Using Multiple Marker Systems to Gain Insight into Historic and Ongoing Genetic Connectivity	Lower San Joaquin Valley and South Delta	Riparian brush rabbit	Yes	Yes	Yes	Yes	No
Ascent	2016	USFWS and NMFS Biological Assessment for the River Islands at Lathrop Project	Paradise Cut, Stewart Tract and vicinity	Riparian brush rabbit, giant garter snake, Delta smelt, green sturgeon, Central Valley steelhead, Central Valley spring-run Chinook salmon, Sacramento River winter-run Chinook salmon	Yes	Yes	Yes	Yes	No
USACE	2014	Draft Environmental Impact Statement for River Islands at Lathrop, Phase 2B	Paradise Cut, Stewart Tract and vicinity	55 species including all CS target species except riparian woodrat, bank swallow, California black rail, Least Bell's vireo, and western yellow-billed cuckoo	Yes	Yes	Yes	Yes	Yes
ESA PWA	2012	BDCP South Delta Habitat and Flood Corridor Planning Corridor Description and Assessment Document	South Delta to Vernalis	Not species specific; focused on habitats w/r/t tidal elevation zones	Yes	Yes	Yes	No	No
Sycamore	2004	Riparian Brush Rabbit Mitigation and Management Plan for River Islands at Lathrop	Paradise Cut, Stewart Tract and vicinity	Riparian brush rabbit	Yes	Yes	Yes	Yes	Yes
EDAW	2002	Draft Subsequent Environmental Impact Report for River islands at Lathrop	Paradise Cut, Stewart Tract and vicinity	38 species including all CS target species except bank swallow, CA black rail, least Bell's vireo, western yellow-billed cuckoo, riparian woodrat, and green sturgeon	Yes	No	No	Yes	Yes
San Joaquin County	2000	San Joaquin County Multi-Species Habitat Conservation and Open Space Plan	San Joaquin County	97 species including all CS target species except Least Bell's vireo and Central Valley steelhead and salmon runs	Yes	Yes	Yes	To USGS quad sheet level	Yes

BDCP = Bay Delta Conservation Plan
 CS = Conservation Strategy of the Central Valley Flood Protection Plan
 DWR = CA Department of Water Resources
 NMFS = National Marine Fisheries Service

USACE = US Army Corps of Engineers
 USFWS = US Fish and Wildlife Service
 USGS = United States Geological Survey

DRAFT Needed Technical Studies of Paradise Cut

Prepared by Environmental Science Associates for San Joaquin County Resource Conservation District, June 28, 2021

Technical Analysis and Design Documentation

Extensive technical analysis and design documentation would be required, which could include, but may not be limited to, the following:

- Documentation that the Project meets USACE design and construction standards
- Construction plans
- Geotechnical reports
- Structural analysis reports
- Hydrologic and hydraulic analysis results
- Safety Assurance Review (if requested by USACE, the applicant should select a Safety Assurance Review Team of flood hazard assessment specialists acceptable to the USACE and conduct a Safety Assurance Review)

Prepare a Wetland Delineation

Conduct an aquatic resources delineation (i.e., “wetland delineation”) within the project footprint to document the boundaries of potential waters of the U.S. The Aquatic Resources Delineation Report should include sufficient information to support a USACE Preliminary Jurisdictional Determination (PJD).

Conduct a Biological Resources Study

Prepare a study of sensitive biological resources sufficient to support CEQA/NEPA review. Potential for presence of special-status species and habitats would be determined. The study would provide the basis for the CEQA/NEPA analysis regarding biological resources as well as the initial steps for regulatory permits/authorizations.

Conduct a Cultural Resources Study

Conduct a records search for the Area of Potential Effect (APE) to identify known cultural resources and to assist in the development of a historic context. The records search would include previous cultural resources inventories and previously recorded cultural resources through the appropriate regional Information Centers of the California Historic Resources Information System (CHRIS). Conduct a pedestrian survey to identify cultural resources within the APE. A Cultural Resources Study Report should be prepared to support compliance with Section 106 of the National Historic Preservation Act (NHPA), which would be required. The cultural resources study may be used to support the Assembly Bill 52 consultation.

Conduct Air Quality/Greenhouse Gas Impact Analysis

Air quality impacts of major infrastructure projects can in the Central Valley often be significant. It would therefore be important to conduct an early analysis of the potential air quality impacts and greenhouse gas emissions that would result of the project, such that these impacts can be reduced, if possible. Regional and local air quality, including attainment status for all criteria pollutants should be determined. Sensitive receptors located near proposed construction sites would be identified. Short-term construction-related and long-term operational emissions would be estimated using a combination of emissions modeling software, as needed. To address the California Supreme Court decision in *Sierra Club v. County of Fresno* (Case No. S219783), the connection between the adequacy of the air quality analysis as it relates to health impacts should be addressed.

Conduct a Geotechnical Study

An extensive geotechnical study should be conducted to support project design, including an analysis of all areas where levees would be constructed, and a detailed Geotechnical Report should be prepared.

Conduct a Phase 1 Environmental Site Assessment

A Phase 1 Environmental Site Assessment should be prepared to identify potential or existing environmental contamination liabilities, that addresses both the underlying land as well as physical improvements to the properties where construction of levees would occur.

ITEM 9

Superior Court of California, County of San Joaquin

180 E. Weber Avenue, Ste 1306J

Stockton, CA 95202

Telephone: (209) 992-5695

July 16, 2021

PRIVATE & CONFIDENTIAL

Sir or Madam,

Enclosed you will find a report from the 2020-2021 San Joaquin County Grand Jury on Independent Special Districts: *Transparency "Not Found."*

Pursuant to Penal Code §933.05(f): "A grand jury shall provide to the affected agency a copy of the portion of the grand jury report relating to that person or entity two working days prior to its public release and after the approval of the presiding judge. No officer, agency department, or governing body of a public agency shall disclose any contents of the report prior to the public release of the final report."

The report is scheduled for release to the public on July 26, 2021. If you have any questions, please do not hesitate to contact me at (209) 992-5290.

Sincerely,

Trisa Martinez
Grand Jury Staff Secretary/Judicial Secretary

Enc.

2020 - 2021 San Joaquin County Grand Jury

**Independent Special Districts:
Transparency "Not Found"
Case #0220**

Summary

Independent special districts (ISDs) are standalone government agencies with elected Boards of Directors. They may extend over multiple counties, but generally have a loose relationship with the primary county in which they reside.

Figure 1. Categories of ISDs.

(data from surveys and LAFCO)

With 101 independent special districts (ISDs) within its boundaries, San Joaquin County far exceeds the state average. In total, 68% of those ISDs are related to the agricultural base of the county (Figure 1). The largest components of the agriculture-related districts are reclamation (the Delta) and irrigation.

The 2020-2021 Grand Jury determined that the workings of these districts are often difficult for the public to access, and, for the most part, “not found”.

For instance, every year, property owners of San Joaquin County receive their property tax bill from the Treasurer-Tax Collector’s office. On that bill is a list of assessments and fees based on local bonds and independent special districts (ISDs). Most people pay the bill without question. However, if one were to try to determine what all the fees and assessments were for, it would be a difficult and time-consuming journey of discovery.

The questions being raised by this Grand Jury are not new. Over the years, there have been multiple reports both at the state level and the county level recommending better regulations and accountability for independent special districts. In response to some of these investigations, the state has implemented regulations to increase transparency. The most recent law is Senate Bill 929 ([SB 929](#)), which requires all ISDs to have public websites.

Website: “Not Found”

Despite SB 929, only 52% of ISDs in San Joaquin County have websites.

Of those with websites, only seven minimally satisfied the Grand Jury (Figure 2). The Grand Jury sought only basic compliance with SB 929 and meaningful links to state websites. Improvement is always possible.

This report recommends modest actions needed by each ISD to improve transparency and SB 929 compliance.

Existing County Information About ISDs

There is a great deal of information about ISDs in the county, but it is scattered across a number of agencies and is often not easily accessible. San Joaquin County's Local Agency Formation Commission (LAFCO) has a useful spreadsheet listing all of the ISDs in the county, but the links in the spreadsheet are not active and the information is limited. The San Joaquin County Auditor-Controller's Office (ACO) has recent and historical audits for most ISDs, but they are only available by request. Other county departments like the Treasurer-Tax Collector, Clerk of the Board, and Registrar of Voters also have pieces of information about many ISDs. One of the key recommendations of this report is that LAFCO and the county departments work together to create a definitive webpage for each ISD that consolidates and summarizes the information that resides at the county level. An important element of this is an accurate and active link to each district's website.

Sharing County Services – Strength in Numbers

Another key recommendation is that all ISDs in the county consider sharing county digital services as provided by the Information Systems Division (SJ-IS). Many already do.

The Information Systems Division has a large portfolio of ready-to-use and secure services, including

- website creation;
- payroll;
- email hosting;
- videoconferencing and business messaging; and
- office productivity tools.

Creating a modern cyber-secure website and information services (IS) infrastructure is difficult. Very few of the ISDs have the capabilities to do this. Some ISDs have high-quality websites and a number use third-party vendors with specialized solutions. Other ISDs struggle to produce secure and quality websites.

Moving forward, there needs to be a much higher level of overall transparency for independent special districts. The ISDs, LAFCO, and the county have the ability to make sure that none of the critical information is: "not found".

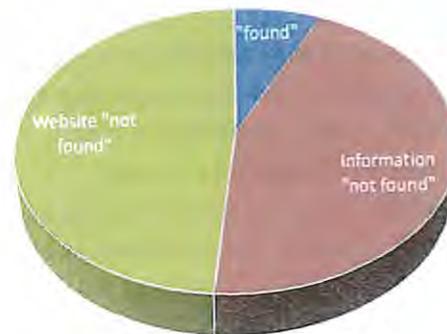

Figure 2. Status of ISD websites.

(data from surveys and LAFCO)

Glossary

- **ADA:** Americans with Disabilities Act, a civil rights law that prohibits discrimination against individuals with disabilities in all areas of public life, including jobs, schools, transportation, and all public and private places that are open to the general public
- **ACO:** Auditor-Controller's Office
- **County:** San Joaquin County
- **CSDA:** California Special District Association, "a not-for-profit association that was formed in 1969 to ensure the continued existence of local, independent special districts." (*CSDA's Guide to Special District Laws and Related Codes*, CSDA 2007, 2 ¶1)
- **District:** San Joaquin County Independent Special District
- **Enterprise districts:** Independent special districts that run similar to businesses that collect fees for services provided
- **GIS:** Graphical Information System
- **IS:** Information Services
- **ISD:** Independent special district, a local government granted by state statutes to serve a community of people by delivering specialized services not provided by city or county
- **LAFCO:** Local Agency Formation Commission, "an independent regulatory commission created by the California Legislature to control the boundaries of cities and special districts." (*It's Time to Draw the Line: A Citizens Guide to LAFCO*, 6). All 58 counties have a LAFCO.
- **MOU:** Memorandum of Understanding, a document between at least two parties that explains the proposed agreement between them
- **MSR:** Municipal Service Review, "...added to LAFCO's mandate with the passage of the Cortese Knox Hertzberg Act in 2000. A service review is a comprehensive study designed to better inform LAFCO, local agencies, and the community about the provision of municipal services. Service reviews attempt to capture and analyze information about the governance structures and efficiencies of service providers, and to identify opportunities for greater coordination and cooperation between providers. The service review is a prerequisite to a sphere of influence determination and may also lead a LAFCO to take other actions under its authority." (CALAFCO website)
- **Multi county district:** A special district whose boundaries fall across multiple counties.
- **Non-Enterprise districts:** Independent special districts that provide a general benefit to an entire community and are funded by property taxes
- **Reclamation district:** An independent special district responsible for reclaiming and/or maintaining land that is threatened by permanent or temporary flooding for agricultural, residential, commercial, or industrial use. The land is reclaimed by removing and/or preventing water from returning via systems of levees, dikes, drainage ditches, and pumps.
- **ROV:** San Joaquin County Registrar of Voters
- **SB 272:** California State Senate Bill 272: Public Records Act: Enterprise System Catalog
- **SB 929:** California State Senate Bill 929 Special districts: Internet Web sites
- **SCO:** State Controller's Office
- **SJ-IS:** San Joaquin County Information Systems Division

- **SOI:** Sphere of Influence is the physical boundaries and service area of a local agency, as determined by LAFCO. (*Guide to the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000*)
- **State:** State of California
- **WCAG 2.1 Level AA:** Web Content Accessibility Guidelines Industry standard accessibility guidelines (pertains to ADA requirements)

Background

History of Independent Special Districts

In the late 1800s, independent special districts (ISDs) were established as a way of accessing services not provided by the cities or counties. Originally, ISDs were formed by farmers who wanted to share the capital costs of large irrigation projects. The Wright Act of 1887 formed the Turlock Irrigation District and gave farmers in the district the ability to capture, store, and distribute Sierra run-off to local farms. In the early 1900s, the formation of water districts brought water to additional agricultural and urban areas.

Starting in the late 1940s and early 1950s, a statewide hospital shortage prompted the establishment of healthcare ISDs. Property owners realized these local governments could serve the public with more than just their water needs, and a boom in the establishment of independent special districts followed. In the 1950s and 1960s, the state experienced a wave of urbanization in unincorporated areas and a need for services not provided by cities or counties. ISDs were formed to provide specialized services including fire protection, road maintenance, sewer treatment, waste disposal, levee maintenance, and parks and recreation. This was

the trend until the late 1990s when the state and county governments became concerned about the increase in ISDs that were essentially outside of their control.

So began the movement to limit the formation of independent special districts. Some ISDs were no longer necessary, while others consolidated with similar service providers to better meet the needs of their community. Since 1997, there has been a 5% decrease in the number of independent special districts. Currently, there are more than 2200 special districts in California. San Joaquin County has one of the highest counts of ISDs in the state with 97¹.

Legislation

State law defines special districts as “any agency of the state for the local performance of governmental or proprietary functions within limited boundaries” ([Government Code section 16271\(d\)](#)).

¹ There are 101 ISDs with land parcels within the county’s boundary. However, four of them are primarily in other counties giving a net of 97 that are considered to be *in* San Joaquin County.

With the explosive growth of independent special districts in the 1950s and 1960s, issues arose including a lack of organization, numerous uncoordinated local governments, lack of economic resource management, and public disinterest in local government. In response, the Knox Nisbet Act of 1963 established the Local Agency Formation Commission (LAFCO) as an independent commission working within the boundaries of each county. Each county LAFCO would help control the borders of cities and special districts, discourage sprawl, and encourage orderly government ([Government Code section 56300](#)). In 2000, the Cortese-Knox-Hertzberg Local Government Reorganization Act was adopted. It established “procedures for local government changes of organization, including city incorporations, annexations to a city or special district, and city and special district considerations” as stated on the [CALAFCO](#) website.

On September 14, 2018, Governor Jerry Brown signed SB 929. It was specifically intended to increase transparency of independent special districts. As of January 1, 2020, the law requires all independent special districts to have a website that contains specific details:

- contact information
- board meeting agendas
- board member or staff information
- financial information
- SB 272 Enterprise System Catalog

Additionally, [Government Code section 7405](#) requires websites to be ADA Compliant.

Little Hoover Commission

Established in 1962, the Little Hoover Commission is California’s Independent State Oversight Commission ([Government Code section 8501](#)). The Commission authors reports and legislative proposals, based on investigations into state government operations and policies. The Commission explores how programs can and should function. In two reports, the Commission found ISDs function in a manner that is largely invisible to the public, compromising oversight and accountability. Consolidations and reorganizations are made difficult even when they make sense. As described in the May 3, 2000, Little Hoover Commission Report, *Special Districts: Relics of the Past or Resources for the Future*, more than 2200 of the 3800 special districts in California are “independent.” ISDs are governed by their own elected boards. The ones that receive their primary funding in the form of taxes and assessments are referred to as non-enterprise districts. Those that primarily receive revenues in the form of fees for service provided are known as enterprise districts.

Past Grand Jury Reports

There have been numerous grand jury reports regarding independent special districts in San Joaquin County and throughout the state. In the 2012-2013 San Joaquin County Grand Jury Informational Report, [#0212, The Great Unwatched-San Joaquin County’s Special Districts](#), the Grand Jury attempted to assemble a comprehensive list of independent special districts in San Joaquin County. Surveys were sent to all ISDs in the county, but more than 20% were returned due to incorrect addresses. The Grand Jury also discovered, as a result of the surveys, that some of the respondents were not familiar with the terms Municipal Service Review or Sphere of Influence. The 2012-2013 Grand Jury published a count of independent special districts which totaled 100 at

the time. The 2020-2021 Grand Jury verified the current count of ISDs and found it to have minimal changes.

Type of District	Number of Districts (2012-2013)	Number of Districts (2020-2021)	Function of Districts
Reclamation	51	50	Levee Maintenance
Fire	19	19	Fire Suppression
Irrigation	8	6	Water Provision
Water Agencies	8	8	Potable Water Provision
Drainage	3	3	Flood Control
Cemetery	2	2	Cemetery Maintenance
Community Services	2	2	General Services
Sanitary	2	2	Sewer Services
Levee	1	1	Flood Control
Mosquito Abatement	1	1	Vector Control
Port	1	1	Port Administration
Resource Conservation	1	1	Conservation Promotion
Storm Drainage	1	1	Flood Control
Total	100	97	

Figure 3. ISD Comparison of 2013 and 2021.

(adapted from 2012-2013 San Joaquin County Grand Jury Informational Report, #0212, The Great Unwatched-San Joaquin County's Special Districts)

Both the 2013-2014 and the 2014-2015 San Joaquin Grand Juries issued reports on groups of independent special districts. In the 2013-2014 report [#0113, San Joaquin County Reclamation Districts: Limited Resources for a Big Task](#), the Grand Jury determined that while the reclamation districts were generally operating well, they lacked transparency and accountability. There were two specific areas of concern noted in the report, a lack of adopted budgets and a lack of contracts for professional services. In the 2014-2015 report, [#1401, It's Time to Come Together: Consolidate the Eight](#), the Grand Jury found inconsistencies in how the fire districts were being run. With these inconsistencies in employment policies, benefits, and tax bases, the Grand Jury recommended

consolidation of the eight fire districts to facilitate more consistent services and accounting across the county. The fire districts did not follow the recommendations of the Grand Jury.

The 2016-2017 Grand Jury, prompted by news coverage regarding the Escalon Cemetery District embezzlement case, published a report, [#0416, San Joaquin County Self-Governing Special Districts: Who is Watching the Cookie Jar?](#) The Grand Jury referenced multiple instances of publicized fraud and embezzlement in the state, prompting the San Joaquin County Grand Jury to take a deeper look into independent special districts and how they are vulnerable to such situations. The Grand Jury found minimal review of audits being conducted. Due to a lack of tools and guidelines, there were ISD board members who did not understand their district's financial reports. This report prompted the Auditor-Controller's Office to take a more involved role by developing and distributing a list of financial best practices to ISDs and requiring the submission of independent audits annually.

These findings are not isolated to San Joaquin County. Multiple Grand Jury reports in counties across the state have made similar findings. These repeated themes are complex and have prompted many reports producing positive incremental impact.

Figure 4. Reclamation districts.

Reason for Investigation

This investigation was initiated by the 2020-2021 Grand Jury in response to the lack of public access to dependable, complete, and transparent information on the independent special districts within the boundaries of San Joaquin County. It is the intention of this Grand Jury to affect change in independent special district transparency and accountability to the populations they serve.

Method of Investigation

The Grand Jury hosted presentations, conducted interviews, and researched past reports on independent special districts. The Grand Jury conducted a survey that was sent to all 101 ISDs.

Discussions, Findings, and Recommendations

1.0 All Independent Special Districts

Public Transparency Requirements

While independent special districts can be an effective form of local government, they are largely not transparent to the public they serve. In an effort to address this, the state adopted SB 929 which requires all ISDs to have a website that contains at least the following information

- contact information;
- board meeting agendas and specifically the current agenda (Brown Act compliance);
- financial transactions (which can be satisfied with a link to the State Controller’s website);
- board compensation;
- [SB 272](#) Enterprise System Catalog; and
- accessibility – [WCAG 2.1 Level AA](#) (Web Content Accessibility Guidelines).

Smaller independent special districts are able to apply for an exemption to SB 929 on an annual basis.

Like any public agency, ISDs must also comply with the [Ralph M. Brown Act](#) (Government Code sections 54950-54963). The Brown Act guarantees the public’s right to attend and participate in meetings of local legislative bodies. Among other requirements, board meeting agendas and meeting attendance instructions must be posted publicly in advance of meetings.

Only 52% of the ISDs in the county have websites ([Figure 2](#)). Of those, compliance with SB 929 is mixed ([Figure 5](#)). Note that in [Figure 5](#), an “Indirect Link” leads to the SCO’s site, but not to the specific information for the district.

Each website was given a cursory check against ADA accessibility standards ([WCAG 2.1 Level AA](#)). The overall average test value of the spot check was 86%.

See [Appendix A – Independent Special Districts](#) for a complete list of all ISDs and their preliminary SB 929 compliance.

Website Creation

Very few ISDs have the resources to create a website that is compliant with all government regulations. Nor do they have the resources to maintain a website that is hardened against cyber-attack. The San Joaquin County’s Information Systems Division (SJ-IS) has these resources and is already used by a number of districts for a variety of services. ([See below, 5.0 Information Systems Division, Shareable Services](#))

There are also specialized private vendors. The Grand Jury was only able to identify some of the vendors and/or website creation tools ([Figure 6](#)). This is informational only and does not constitute an endorsement or a judgement of suitability. ([See Appendix A – Independent Special Districts](#))

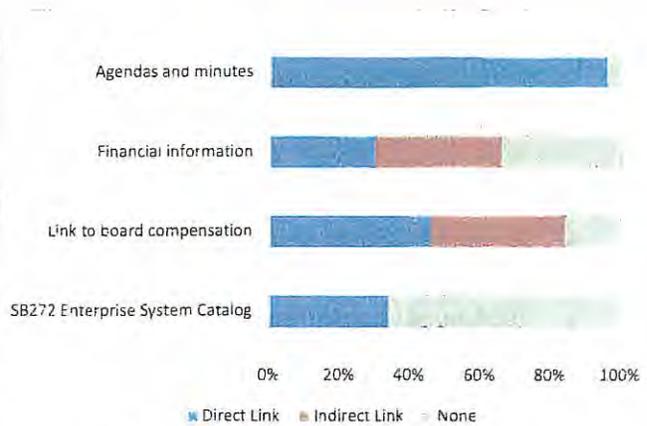

Figure 5. SB 929 Compliance for ISDs with websites.
(data from surveys and LAFCO)

Figure 6. Number of districts using certain software packages.
(data from surveys and LAFCO)

Assessments

ISDs are often funded by assessments. Assessments are taxes assigned to each parcel of land in the district. The actual rates and calculations of assessments are done internally by the district. Each ISD provides their net assessment per parcel to the Auditor-Controller's Office annually by August 12th. The Auditor-Controller's Office takes the supplied figures and attaches them to the corresponding parcel's tax bill. Should a constituent want information on the assessments, the property tax bill contains a contact phone number for each ISD. As such, the primary way a constituent of the ISD can obtain information regarding their assessments is through their annual property tax bill.

Some ISDs publish their rate structure on their website but many do not.

Missing Survey Responses: "not found"

The following districts did not return the survey, nor was the court able to contact them in time for this report:

- Lockeford Community Services District
- Mountain House Community Services District
- Reclamation District #38 Staten Island
- Reclamation District #1007 Pico & Nagle
- Reclamation District #2033 Brack Tract
- Reclamation District #2108 Tinsley Island
- Reclamation District #2114 Rio Blanco Tract
- Dos Rios Storm Water District

Findings

The following findings do not apply to all independent special districts. See [Response Requirements](#) for which findings apply to which districts.

F1.1 No website was found, negatively impacting public transparency, and is not compliant with SB 929.

F1.2 Not all elements of SB 929 compliance are present on the district website, negatively impacting public transparency.

F1.3 Imprecise links to the State Controller's Office website for financial transactions and board compensation make the website harder to use.

F1.4 The financial transactions on the State Controller's Office website do not provide an easily understood picture of the district's finances.

F1.5 The San Joaquin County Auditor-Controller's Office has audits and financial summaries for most districts that provide a more complete picture of the finances.

F1.6 The district could achieve higher levels of functionality and security on its website by leveraging the IS services of the county or other entity that has focused software for special districts.

Recommendations

The following recommendations do not apply to all independent special districts. See [Response Requirements](#) for which recommendations apply to which districts.

R1.1 By March 31, 2022, comply with SB 929. Provide proof of exemption when relevant.

R1.2 By March 31, 2022, contact the San Joaquin County's Information Systems Division (SJ-IS) to discuss the possible benefits of shared services including cyber security and website development.

R1.3 By March 31, 2022, provide a link to the most recent audit on the district website.

R1.4 By November 30, 2021, confirm the accuracy of the information for the district in [Appendix A – Independent Special Districts](#) and provide corrections to the Grand Jury.

2.0 LAFCO

The Local Agency Formation Commission (LAFCO) was formed in 1963 by state law. The law established LAFCOs in all 58 counties to help address the population explosion occurring in California at the time. San Joaquin County's LAFCO has limited oversight of independent special districts within the boundaries of the county. By January 1, 2008, LAFCO was mandated to have conducted a Sphere of Influence (SOI) study for every city and special district in the county. Those SOI studies are to be reviewed and updated every five years thereafter. The SOI study is important to the taxpayer because, along with determining which cities and agencies provide services, it also helps determine what taxes are to be paid.

In accordance with [Government Code section 56425](#), LAFCO shall conduct a Municipal Service Review (MSR) in preparation of any updates to the SOI study. The review includes

- population projections;
- location characteristics;
- planned capacity of public facilities;
- financial ability to provide services;
- opportunities for shared facilities; and
- accountability for community service needs, including governmental structure and operational efficiencies.

Even though the SOI study and MSR reporting is mandated to take place every five years, LAFCO lacks the resources to provide these reports as required. City SOI studies are kept current, but LAFCO depends on ISDs to submit the documentation to perform the reviews. When the ISDs do not submit the information, there is no enforcement protocol. Thus, the most prevalent reasons

for MSRs and updated SOI studies are annexations, dissolutions, or discrepancies requiring review. LAFCO will hold up annexations and dissolutions in order to force compliance.

LAFCO has the definitive list of special districts in the county, both dependent and independent; however, contact and status information is sometimes out of date. On their website, LAFCO has links to all the MSRs conducted since 2009. They also have a PDF containing the ISD mailing list. The list makes the ISDs' contact information publicly available but does not have a link to the county map, date of agency formation, ISD web address, links to the latest MSR for each ISD, nor any links to the SOI studies.

Findings

F2.1 There is no easy access from the LAFCO website to the websites of independent special districts, making it difficult for the public to find information about those districts.

F2.2 There is no comprehensive central directory from which the public can access information on their independent special districts, making such information difficult to find.

F2.3 The public would benefit from the addition of the following to the LAFCO website

- District website link;
- Link to latest Municipal Service Review;
- Link to latest Sphere of Influence study;
- Link to the district map (usually found on the county GIS);
- Date of agency formation; and
- Links to information about each Independent Special District as available from county departments.

Recommendations

R2.1 By March 31, 2022, LAFCO work with the San Joaquin County Information Systems Division (SJ-IS) to create a webpage on the LAFCO website that lists all independent special districts within the boundaries of the county and provide a link to a standard summary page for each district.

R2.2 By March 31, 2022, on the summary webpage for each district, LAFCO provide at least the following information

- A link to the independent special district's website;
- A link to a map of the district's boundaries;
- A link to the most recent Municipal Service Review;
- Links to all past Municipal Service Reviews that are available online;
- A link to most recent Sphere of Influence study; and
- Formation date and a description of the district.

R2.3 By March 31, 2022, LAFCO work with the county on this summary page to also include summary information from any county department which has information on the referenced independent special district. This would include information such as recent audits from the Auditor-Controller's Office, current elections from the Registrar of Voters, and Board of Supervisors' special district board member appointments from Clerk of the Board.

3.0 The County

The county and the ISDs are independent government agencies. One does not report to the other. However, they do interact and as such, in the normal course of business, the county has certain information about many of the ISDs that includes

- The Auditor-Controller's Office receives annual audits and applies parcel assessments to be billed on landowner property taxes. While the Auditor-Controller's Office collects the audits of each of the independent special districts, that information is not available on their website;
- The Treasurer-Tax Collector distributes property tax bills and collects payments. People interested in viewing their own property tax bill can do so on the Treasurer-Tax Collector's [website](#);
- The Board of Supervisors can make board appointments when there are vacancies.
- The Information Systems Division provides services to a number of ISDs;
- The county maintains a [district map](#) that shows the boundaries of most of the special districts, both dependent and independent;
- The Clerk of the Board has limited interactions with ISDs but has the responsibility of providing access to [public records](#) and scheduling appointments to Boards and Commissions; and
- The Registrar of Voters holds local elections for Independent Special District board members when requested to do so.

Website Access

The residents of San Joaquin County do not have access to a website that could lead them to the full information about each of the ISDs within the geographic boundaries of the county. The best they have is LAFCO's [spreadsheet](#).

Other counties have similar limited views, but some have active links to the ISD's websites.

High Number of ISDs

Largely because of its many agricultural districts ([Figure 1](#)), San Joaquin County has one of the highest numbers of ISDs in the state.

County	Number of ISDs	2020 Population	Per 100,000 Citizens
Tulare	87	471,389	18.5
Kern	80	912,316	8.8
Fresno	80	1,010,120	7.9
San Joaquin ²	78	772,948	10.1
Sacramento	61	1,567,490	3.9
San Diego	59	3,379,160	1.7
Riverside	56	2,517,830	2.2
San Bernardino	50	2,208,400	2.3
Los Angeles	50	10,079,000	0.5
Stanislaus	49	558,911	8.8
Contra Costa	44	1,160,920	3.8
Monterey	43	435,828	9.9
Sonoma	42	493,334	8.5
Merced	40	281,615	14.2
Solano	39	452,076	8.6
Placer	35	408,317	8.6
San Luis Obispo	34	286,354	11.9
Santa Barbara	33	448,369	7.4
Ventura	30	851,297	3.5
Orange	27	3,198,000	0.8
Santa Cruz	23	272,555	8.4
San Mateo	22	771,019	2.9
Alameda	18	1,684,000	1.1
Santa Clara	17	1,945,940	0.9
San Francisco	1	891,583	0.1

Figure 7. Number of ISDs in California counties with populations over 270,000.

(adapted from California State Controller's Office website)

² This is an example of inconsistencies in information regarding ISDs. The state incorrectly shows San Joaquin County as having 78 ISDs when the actual count is 97.

Findings

F3.1 There is no easy access from the county website to the websites of independent special districts, making it difficult for the public to find information about those districts.

F3.2 County departments have information on independent special districts that is difficult for the public to access.

Recommendations

Recommendations are listed below by department.

4.0 San Joaquin County Auditor-Controller's Office

Audits

The Auditor-Controller's Office (ACO) receives audits from most ISDs on an annual basis. Summary information about these audits is maintained in an internal spreadsheet. This includes a brief financial analysis. Increasingly, the audits are delivered by the ISDs to the ACO in digital form (PDF), but many are still delivered on paper. Currently, the audits are not available for public access through a website.

The detailed audits that the ACO collects are in sharp contrast to the limited information collected by the State Controller's Office (SCO). The SCO gathers unstructured transactional information³ which is very difficult to assemble into a meaningful financial picture of a district.

The ACO's diligence in auditing has caught instances of malfeasance in the past. In particular, there was embezzlement at the Escalon Cemetery District as noted in the 2016-2017 Grand Jury report [#0416, San Joaquin County Self-Governing Special Districts: Who is Watching the Cookie Jar?](#)

Parcel Tax Assessments for ISDs

ISDs often get a major part of their funding from parcel tax assessments. Each district internally maintains a rate structure for the parcels in its district. Once a year (by August 12th), they compute the net assessment per parcel and send them to the ACO. This information eventually makes it into the property tax statement from the county. The county does not know how the amount is calculated and simply serves as a tax collection agency for the districts.

County Bank and Financial Services

For many districts the ACO provides banking and payroll services.

³ Special districts are annually required to file a [Financial Transactions Report](#). The largest part of this report is a spreadsheet row for every revenue and expense transaction. This is much like the check register of the district and provides very little structure to the information.

Findings

F4.1 The independent special district audits, on file with the Auditor-Controller's Office, are not easily accessible to the public.

F4.2 The brief financial summaries derived from the audits by the Auditor-Controller's Office are not easily accessible to the public.

F4.3 The Auditor-Controller's Office financial summaries provide a clearer picture of a district's finances than that which is found on the State Controller's Office site.

Recommendations

R4.1 By September 30, 2021, the Auditor-Controller's Office require all future independent special district audits to be submitted in an electronic form.

R4.2 By December 31, 2021, make all electronic independent special district audits going forward available on the Auditor-Controller's website.

R4.3 By March 31, 2022, the Auditor-Controller's Office provide the most recent independent special district audit links to LAFCO for their new independent special district summary webpages.

5.0 The Information Systems Division

The San Joaquin County's Information Systems Division (SJ-IS) is a mature and fully functional government Information Services (IS) department with broad capabilities and a forward-looking strategy. It has an experienced management team and professional staff of over 100 employees.

Being a government agency, the department has requirements beyond a normal business entity. Special regulations require the following capabilities, among others

- a high level of security;
- accessibility for those with special needs; and
- public transparency.

Strategy and Cyber Security

The SJ-IS has an extensive [Digital Services & Innovations Strategy](#) including a robust [Cyber Security Strategy](#). Any ISD that shares services with the county benefits from these strategies and their implementation.

Shareable Services

San Joaquin County has software applications for everything from hospitals to tax collection to streetlights. The breadth of requirements for a county IS department means a large catalog of services (see [Appendix B - Enterprise Service Catalog](#)). Many of the services can be partitioned for

private and isolated use by another government agency such as an ISD. Effectively, it would be as if that entity has its own data center. Some of the services available are

- **Overall cyber security** Achieving the levels of security described in SJ-IS's [Cyber Security Strategy](#) is not easy and getting it wrong can be costly;
- **Secure email** An ISD can maintain their existing email addresses and take advantage of the county's infrastructure. County and ISD emails would be completely isolated;
- **Office productivity tools** The SJ-IS can provide an isolated version of Microsoft's Office 365 which includes Word, Excel, and PowerPoint;
- **Document storage** Microsoft SharePoint is part of the Office 365 package;
- **Video conferencing and business messaging** The SJ-IS offers Microsoft Teams, Zoom, and WebEx;
- **Financial and payroll systems** The Division has a full suite of shareable financial packages from Oracle's PeopleSoft; and
- **Content management** This software facilitates the creation and maintenance of webpages. (See [Website Creation and Hosting](#) below).

A number of ISDs already share county services via MOUs. The following ISDs use county financial systems:

- Clements Rural Fire District
- Escalon Cemetery District
- Farmington Rural Fire District
- French Camp McKinley Rural Fire District
- Lathrop Manteca Fire District
- Lockeford Community Services District
- Mokelumne Rural Fire District
- Montezuma Rural Fire District
- Mountain House Community Services District
- San Joaquin County Mosquito Abatement District
- Stockton East Water District
- Tracy Public Cemetery District
- Waterloo Morada Rural Fire District
- Woodbridge Sanitary District

The Mountain House Community Services District additionally uses other shared services provided by SJ-IS including

- GIS (Graphical Information System) for roads, storm, wastewater and water;
- data backup;
- document imaging;
- SJ-IS cloud services; and
- Office 365.

Website Creation and Hosting

The SJ-IS is capable of providing full website support for other government agencies including ISDs. Services include

- creating a basic website that is compliant with regulations including SB 272, SB 929, and WCAG 2.1 (ADA);
- “content management” tools for self-authoring and maintenance of webpages;
- cyber security;
- isolation (the entity’s domain is separate from the county); and
- training.

Registrar of Voters

The San Joaquin County Registrar of Voters (ROV) is part of the SJ-IS and provides election services to ISDs when needed.

Findings

F5.1 The county has a modern, professionally run Information Systems Division with many quality services that can be shared with independent special districts.

F5.2 The county’s robust implementation of its cyber strategy would be difficult for most independent special districts to duplicate.

Recommendations

R5.1 By March 31, 2022, the San Joaquin County Information Systems Division create a catalog of available services, benefits, costs, and sample MOUs, and distribute to all independent special districts.

R5.2 By March 31, 2022, the San Joaquin County Information Systems Division, in conjunction with at least one independent special district, create a working, model website that can be maintained and expanded by the independent special district.

Conclusion

While most independent special districts in San Joaquin County are performing the tasks for which they were created, many are not consistently operating in a manner that is transparent to the constituents they serve. By working together, San Joaquin County, LAFCO, and the independent special districts can and should do a better job of providing information that is easily accessible to the public.

Disclaimers

Grand Jury reports are based on documentary evidence and the testimony of sworn or admonished witnesses, not on conjecture or opinion. However, the Grand Jury is precluded by law from disclosing such evidence except upon the specific approval of the Presiding Judge of the Superior Court, or another judge appointed by the Presiding Judge (Penal Code Section 911. 924.1 (a) and 929). Similarly, the Grand Jury is precluded by law from disclosing the identity of witnesses except upon an order of the court for narrowly defined purposes (Penal Code Sections 924.2 and 929).

Response Requirements

California Penal Code Sections 933 and 933.05 require that specific responses to all findings and recommendations contained in this report be submitted to the Presiding Judge of the San Joaquin County Superior Court within 90 days of receipt of the report.

Note: If the responder is an elected official, the response must be sent within 60 days of receipt.

The San Joaquin County Local Agency Formation Commission (LAFCO) respond to Findings F2.1, F2.2 and F2.3 and Recommendations R2.1, R2.2, and R2.3.

The San Joaquin County Board of Supervisors respond to Findings F3.1, F3.2, F4.1, F4.2, F4.3, F5.1, and F5.2, and Recommendations R4.1, R4.2, R4.3, R5.1, and R5.2.

Each independent special district shall respond to the findings and recommendations marked with a "Y" on their row in the following table.

Response Requirements by District

District	F1.1	F1.2	F1.3	F1.4	F1.5	F1.6	R1.1	R1.2	R1.3	R1.4
Avena Drainage District	Y				Y	Y			Y	Y
Banta-Carbona Irrigation District					Y	Y		Y	Y	Y

Appendix A: Independent Special Districts

The information in that spreadsheet has been compiled by the Grand Jury from public information, the surveys, and study of district websites.

Key

Contact	Managing entity/contact for the district
Address	The business address of the district
Phone	The business telephone number for the district
Website	The district website URL
Software	The solutions provider for the web software (when determined)
SB 929	SB 929 compliance summary (See SB 929 key, next.)
WCAG	Partial measure of accessibility. The percentage is based on the tests run using https://www.webaccessibility.com . This is limited to checking only a few pages. WCAG 2.1 Level AA is the target accessibility; see Web Content Accessibility Guidelines (WCAG)
Board	Information about board members
Meeting	Regular meeting time for the board
Location	The location of the board meeting

SB 929 Key

The following are based on a high-level view of compliance. See the actual law for full details.

- 1 Missing contact information
- 2 Missing next agenda
- 3 Missing financial summary
- 4 Imprecise link to financial transactions. The link given goes the SCO (State Controller's Office) site but not specifically to the special district.
- 5 Missing board staff compensation
- 6 Imprecise link to board staff compensation. The link given goes the SCO (State Controller's Office) site but not specifically to the special district.
- 7 Missing Enterprise System Catalog (SB 272)
