JagCoin Launches as the First Loyalty-Driven Meme Coin with Real Utility and Heart

LOS ANGELES, CA - May 5, 2025 - JagCoin (\$JAGCOIN), a new meme coin born from loyalty, strength, and community, officially launches as a fresh, doxxed, and value-backed project in the Solana ecosystem. Inspired by a real 10-year-old German Shepherd named Jagger, JagCoin is not just another meme coin-it's a mission.

Created by Michael Rubin, a seasoned crypto investor and author of Block to the Future, JagCoin aims to break the mold of traditional meme coins by infusing real storytelling, transparency, and long-term vision into the market.

"I didn't create JagCoin to chase pumps-I created it to give back to the community that has supported me," says Rubin. "Too many coins are built by bots, influencers, or scammers. JagCoin is built on loyalty. It's a tribute to my dog, to the crypto community, and to those who believe in something more real than just hype."
