Longevity

SII Coin is here to stay. The decentralized community encourages and embraces longterm ecosystem and foundation development to generate genuine use cases and higher benefits than any ephemeral fad.

The Technology Behind SII Coin: Binance Smart Chain

Binance Smart Chain (BSC) was created to enable the use of solidity-based smart contracts at a significantly faster and more efficient rate than other competing chains. With decentralized exchanges on BSC providing lightning-fast transactions and ultra-low costs, BSC has begun to establish itself as one of the most frequently utilized blockchains for Decentralized Finance (DeFi). BSC makes use of the BEP-20 token technology, which the BinanceTeam created. It is a proprietary blockchain that ensures the security and privacy of all users and developers. Its inherent dual-chain interoperability enables crosschain communication and scalability of highperformance decentralized applications (dApps) that demand a quick and fluid user experience. It is EVM compatible and will support all current Ethereum tools and faster and more affordable transactions. Based on the Proof of Staked Authority consensus, its on-chain governance would allow decentralization and substantial community participation via the use of 21 validators that verify transactions.

Ecosystem

NFT Lending

The world's first decentralized marketplace for facilitating NFT and DeFi liquidity. SII Coin marketplace, which is based on BSC, will enable NFT owners to simply borrow against their NFTs as collateral at market rates without selling them. This implies users can make revenue from their NFTs rather than having them collect digital junk.

NFT Marketplace

Users may purchase and sell NFTs on the platform, including those obtained via the NFT Lending platform's liquidated collateral. This creates an unusually competitive market for buying NFTs at a discount to their standard market value. Additionally, the marketplace features a minting tool that enables users to create their own NFTs using images, videos, and other data.

Subscription Platform

We are developing a content subscription platform to create utility for SII Coin where \$SII can be used for purchasing content, tipping & messaging content creators on our content platform. Rewards in BNB ensure that Curators can keep earning stable income without the need to sell their \$SII holdings.
